The President

EXECUTIVE ORDER 9594

DESIGNATING THE CHIEF OF ENGINEERS, UNITED STATES ARMY, AS A MEMBER OF THE FEDERAL FIRE COUNCIL IN LIEU OF THE QUARTERMASTER GENERAL

NOTE: Executive Order 9594, dated July 28, 1945, was filed with the Division of the Federal Register as Document No. 45-8860 (NP) on July 31, 1945, at 11:40 a. m.

Regulations

TITLE 6—AGRICULTURE CREDIT

Chapter I—Farm Credit Administration

PART 10—FEDERAL LAND BANKS GENERALLY

LOAN REQUIREMENTS

Section 10.33 of Part 10, Chapter I, Title 6, Code of Federal Regulations, is hereby revoked.

Sections 10.10, 10.183, and 10.198 of Part 10, Chapter I, Title 6, Code of Federal Regulations, are hereby amended, and §§ 10.182–50, 10.223–53, 10.223–55, 10.223–58, 10.223–59, 10.223–60, 10.223–61, 10.223–62, 10.223–63, and 10.223–64 are hereby added thereto to read as follows:

§ 10.10 *Farm unit; required area and yield of farm.* To constitute a proper unit for a loan, except as provided in § 10.24 on outside income Commissioner loans a farm should be of sufficient area to yield at the hands of an ordinarily capable farmer, putting it to the use to which it is generally adapted, using average methods, and receiving normal prices, an income sufficient to maintain the family of the applicant, pay operating expenses and taxes, maintain the property, and discharge the interest and amortization payments on his loan. Since the earning power of land varies because of difference in the quality of soils, climatic conditions, crop adaptation, and market facilities, no arbitrary acreage limit should be established as necessary for a farm unit. Any decision that a particular property does not constitute a proper farm unit should be reached only after careful consideration of standards of living, the factors of production, and the earning power of the individual farm.

(Sec. 6, 47 Stat. 14; sec. 12 "Fifth", 39 Stat. 370, as amended; 12 U.S.C. 665, 771 "Fifth", as amended)

§ 10.182–50 *Interest rate on Commissioner loans.* Under the provisions of the fourth sentence of section 32 of the Emergency Farm Mortgage Act of 1933 the contract rate of interest on Commissioner loans is required to be 1 percent per annum higher than the basic rate on loans made at the same time by the bank through associations, otherwise than pursuant to section 25 (b) of the Farm Credit Act of 1937. This is applicable to all Commissioner loans, including those closed jointly with section 25 (b), direct, or special risk bank loans bearing a higher rate than such basic rate on bank loans made through associations.

(Sec. 32, 48 Stat. 48, as amended; 12 U.S.C. 1016 (c), as amended)

§ 10.183 *Buildings on which insurance must be maintained by mortgagor; amount and type of insurance.* Insurance on buildings shall be required against such risks and in such amounts as the bank may determine to be necessary for adequate protection of the mortgagee's interest. In making the determination consideration should be given to the size of the loan in relation to the value of the security, the extent to which the buildings enter into such value, and the extent to which the borrower's ability to operate the property efficiently

would be affected if a loss occurred and the buildings were not replaced.

(Sec. 12 "Ninth", 39 Stat. 370; 12 U.S.C. 771 "Ninth")

§ 10.198 *Nonapplicability of regulations.* The provisions of §§ 10.190 through 10.197 are not applicable in the case of settlements of losses on buildings not required by the bank to be insured.

(Sec. 12 "Ninth," 39 Stat. 370; 12 U.S.C. 771 "Ninth")

§ 10.223–53 *Reduction of interest rate.* The interest rate on any Commissioner loan, purchase money mortgage, or contract purchased or acquired by the bank must be reduced to the rate applicable to new land bank loans as of the date of the acquisition of the loan, purchase money mortgage, or contract by the bank, but upon acquisition the bank may make the reduced rate effective retroactively. This reduction in interest may be accomplished generally in the same manner and under the same procedure as was used to reduce the contract interest rate on land bank loans to 4 percent. The bank should notify each borrower of the interest reduction when effected. It may also wish to consider furnishing, or offering to furnish upon request of the borrower, an individual instrument in recordable form evidencing the reduction.

(Sec. 6, 47 Stat. 14; 12 U.S.C. 665; sec. 13 "Eighth," 39 Stat. 372)

§ 10.223–55 *Maximum and minimum loanable amounts.* The limitations with respect to the maximum and minimum amounts of loans as provided in section 12 "Seventh" of the Federal Farm Loan Act (12 U.S.C. 771 "Seventh"), shall be applied in connection with the purchase of a Commissioner loan, purchase money mortgage, or contract by the land bank. Accordingly, no such asset may be purchased from the Corporation if the amount thereof will increase the borrower's total indebtedness to the bank and any other banks of the system to an amount in excess of $50,000.

(Sec. 12 "Seventh", 39 Stat. 370; 12 U.S.C. 771 "Seventh"; sec 13 "Eighth", 39 Stat. 372, as amended; 12 U.S.C. 781 "Eighth", as amended)

§10.223–58 *Acquiring stock in addition to any available stock which borrower owns—retirement of stock owned by borrower.* "Any available stock" already owned by the borrower shall be stock in an unimpaired association which is owned by the borrower or in which the borrower owns the beneficial interest, and which, computed at its par value, is in excess of 5 percent of any outstanding bank loan or loans of the borrower through the same association. Also, where an association has been through conservatorship and is operating under section 25 (b) of the Farm Credit Act of 1937 with a completed compartment, any stock owned by the borrower in group 1, computed at its fair book value, which is in excess of 5 percent of any bank loan or loans of the borrower through group 1, may be retired and the proceeds thereof used to purchase stock in group 2 in connection with the asset being acquired. Under the foregoing definition, where a borrower has more than one loan through the association or owns stock in connection with a loan which is secured only in part by the property securing the asset being acquired, any excess stock in connection with such loan or loans is available stock.

(Sec. 6, 47 Stat. 14; 12 U.S.C. 665; sec. 13 "Eighth", 39 Stat. 372, as amended; 12 U.S.C. 781 "Eighth", as amended)

§ 10.223–59 *Farm Credit Administration approval of retirement of association or related bank stock.* The Administration approves the retirement, under section 7 of the Federal Farm Loan Act (12 U.S.C. 721), of related bank stock in an amount equal to such available association stock where such retirement is authorized by the board of directors of the bank and the proceeds are to be used for the purchase of stock needed in connection with the acquired asset.

(Sec. 7, 39 Stat. 465; 12 U.S.C. 721)

§ 10.223–60 *Classes of borrowers; borrowers' disposition of stock or purchase of additional stock; election to membership and purchase of stock by borrowers not members of an association.* It will be necessary to deal with three classes of persons in meeting the foregoing requirements; (a) those who are members of the association through which the paper is being acquired and who own sufficient available stock; (b) those who are members of the association but who do not own sufficient available stock in connection with any paid-down bank loan or loans; and (c) those who are not members of the association and who own no stock in it. As to the first class, the existing available stock or the stock purchased with the proceeds of retired available stock must be pledged as collateral security in accordance with the provisions of the Federal Farm Loan Act, as amended, for the indebtedness being acquired. Persons in the second class must purchase additional stock either in cash or under the methods hereinafter prescribed and pledge such stock, as well as the available stock or the stock purchased with the proceeds of the retired available stock, for the indebtedness being acquired. Persons in the third class must be elected to membership, purchase stock either for cash or under the methods hereinafter prescribed, and pledge such stock as collateral security for the indebtedness being acquired.

(Sec. 6, 47 Stat. 14; 12 U.S.C. 665; sec. 13 "Eighth", 39 Stat. 372, as amended; 12 U.S.C. 781 "Eighth", as amended)

§ 10.233–61 *Personal liability of borrower.* In each of the classes mentioned above the person owning the property subject to the loan, mortgage, or contract being acquired may or may not be personally liable on the indebtedness. If not personally liable, the person must become personally liable on the paper being acquired by the bank.

(Sec. 9, 39 Stat. 368; 12 U.S.C. 744)

§ 10.223–62 *Restrictions on eligibility of borrowers for association membership.* To be eligible for association membership, a person must meet the requirements for assumption of a bank mortgage under section 12, Sixth of the Federal Farm Loan Act, i. e., the person need not be a farmer, but must be a natural person or a livestock corporation eligible for membership.

(Sec. 12 "Sixth," 39 Stat. 370, as amended; 12 U.S.C. 771 "Sixth," as amended)

§ 10.223–63 *Payment in cash by borrower where amount of stock required is not substantial; additional loan to borrower to provide for payment of stock to be purchased; release by bank of conditional payments in amounts sufficient to cover the purchase of required stock; procedure for purchase of stock by borrower.* Where the amount of stock required is not substantial, it may be feasible to obtain payment therefor in cash. In other cases the borrower may desire, and it may be feasible, to provide for payment for the stock by means of an additional loan. It will also be appropriate for the bank to permit the release of conditional payments, under § 10.31, in amounts sufficient to cover the purchase of the required stock. However, where one of these procedures is not followed, the stock may be purchased under the following procedure:

(a) The borrower may apply to the association for credit in an amount sufficient to purchase such stock.

(b) In such application the borrower shall agree that his liability to the association for such stock shall be secured by a lien on the borrower's property which is security for the paper being acquired, junior to any lien held or to be acquired by the Federal land bank on such property. It is not necessary that the lien for the stock indebtedness be recorded.

(c) The association may charge the borrower interest at a rate not to exceed 4 per centum per annum on the unpaid balance of any indebtedness incurred for this purpose.

(d) The total of the amount of any such indebtedness for stock, the unpaid balance (unpaid principal, advances, and any other items properly chargeable to the borrower) of the loan, purchase money mortgage, or contract in connection with which such stock is issued, and any indebtedness to the Federal land bank secured by a prior lien on the property, shall not exceed 65 per centum of the normal value of the farm as deter-

mined upon appraisal made pursuant to the Federal Farm Loan Act.

(e) The association may in turn, pursuant to 12 U.S.C. 743, borrow from the Federal land bank the amount necessary to purchase stock in the bank where it has sold its stock on credit to its borrowers. Such borrowing may be evidenced by an assignment by the association to the bank of the borrower's agreement to pay for stock in the association.

(f) The applicant may request a deferment of principal payments in order to enable the association or the bank, as the case may be, to collect the amount for indebtedness for stock in the association, and the bank may grant such deferments under the provisions of section 13 "Nineteenth" of the Federal Farm Loan Act (12 U.S.C. 781 "Nineteenth").

(Sec. 6, 47 Stat. 14; 12 U.S.C. 665; Sec. 13 "Eighth", 39 Stat. 272, as amended; 12 U.S.C. 781 "Eighth", as amended; Sec. 9, 39 Stat. 368; 12 U.S.C. 743)

§ 10.223–64 *Issuance of new stock sufficient to cover existing loan; retirement of existing stock.* Where an applicant who does not own the outstanding stock in connection with the existing bank loan on the farm covered by the mortgage or contract being purchased by the bank from the Corporation desires or is required to acquire such stock or new stock in lieu thereof but cannot acquire the outstanding stock, the outstanding stock may be retired and paid off and new stock issued to the applicant and pledged in connection with the item being acquired. The Administration hereby approves the retirement of stock in such cases where it is authorized by the bank's board of directors. Where the applicant acquires no stock in connection with the bank loan, then, unless he procures from the owner of the association stock held in connection with the bank loan a power of attorney or other authorization to exercise the exclusive right to vote in connection with both loans, the applicant must agree with the association, in consideration of the bank's purchase of the Corporation asset, to forego the right to vote at any association meeting where he and the other stockholder are present, except when they agree as to which shall cast the one vote.

(Sec. 6, 47 Stat. 14; 12 U. S. C. 665; sec. 13 "Eighth", 39 Stat. 372, as amended; 12 U. S. C. 721; 12 U. S. C. 781 "Eighth", as amended; sec. 7, 39 Stat. 365)

PART 11—NATIONAL FARM LOAN ASSOCIATIONS

RETIREMENT OF STOCK

Section 11.258–50 of Chapter I, Title 6, Code of Federal Regulations, is hereby amended to read as follows:

§ 11.258–50 *Retirement of stock in connection with division of loans.* The Administration approves the retirement under section 7 of the Federal Farm Loan Act (12 U.S.C. 721) of stock of the bank held as security for a loan resulting from the division of a loan in an amount which will reduce the amount of stock outstanding in connection with such loan to the amount which would be required to be purchased in connection with a new loan of like amount: *Provided*, That (a) such retirement is authorized by the board of directors of the bank, (b) a current appraisal shows that the loan is within the 65 percent of the normal agricultural value of the security, and (c) the capital stock of the association is not impaired.

(Sec. 6, 47 Stat. 14; Sec. 7, 39 Stat. 365; 12 U.S.C. 665, 721)

Pursuant to the authority vested in me as chairman of the War Manpower Commission by Executive Orders Nos. 9139 and 9279 (7 F.R. 2919, 10177), §§ 907.2, 907.3, 907.4 (e) and (f), and 907.5 (a), (i), (j), and (l) of Part 907, entitled "War Manpower Commission Regulation No. 7—Governing Employment Stabilization Programs" (8 F.R. 11338), as amended, are hereby amended to read as follows:

§ 907.2 *Control of hiring and solicitation of workers.* All hiring and solicitation of workers in or for work in any locality for which a War Manpower Commission employment stabilization program has been established shall be conducted in accordance with such program.

§ 907.3 *Formulation and approval of programs*—(a) *General.* Employment stabilization programs may be formulated by Area or Regional Manpower Directors after consultation with their Management-Labor War Manpower Committees. No area program shall become operative until approved by the Regional Manpower Director. Regional Manpower Directors are authorized to formulate or approve an employment stabilization program which includes the provisions set forth in § 907.4, and otherwise conforms to the provisions of this part.

(b) *Suspension and termination of programs.* On and after July 1, 1945, any program the operation of which has been suspended for a period of ninety consecutive days shall, unless sooner terminated, be deemed terminated and revoked for all purposes on and after the last day of such ninety-day period.

§ 907.4 *Minimum standards in general.* Except as provided in § 907.5 (a) (5), every employment stabilization program approved after the effective date

of this part shall contain the following provisions: • • •

(e) *Workers who may be hired only upon referral by the United States Employment Service.* A new employee may not be hired solely upon presentation of a statement of availability, but may be hired only upon referral by, or in accordance with arrangements with, the United States Employment Service when:

(1) The new employee is to be hired for work in a critical occupation, or his statement of availability indicates that his last employment was in a critical occupation.

(f) *Exclusions.* No provision of the employment stabilization program shall be applicable to:

(1) The hiring of a new employee for agricultural employment;

(2) The hiring of an employee in any Territory or possession of the United States, except Alaska and Hawaii;

(3) The hiring by a foreign, State, county or municipal government, or their political subdivisions, or their agencies, and instrumentalities, or (for purposes of § 907.4 (a) only) to the hiring of any of their employees, unless such foreign, State, county, or municipal government, or political subdivision or agency or instrumentality has indicated its willingness to conform, to the maximum extent practicable under the Constitution and laws applicable to it, with the program;

(4) The hiring of a new employee for domestic services;

(5) The hiring of a school teacher for vacation employment or the rehiring of a school teacher for teaching at the termination of the vacation period;

(6) The hiring of a veteran of World War II; for the purposes of this paragraph, a veteran of World War II means a person who has served in the active service of the armed forces of the United States subsequent to September 16, 1940, and who has been discharged or released therefrom under conditions other than dishonorable.

• • • • •

§ 907.5 *Optional provisions.* Regional and Area Manpower Directors, after consultation with their Management-Labor War Manpower Committees, may include in employment stabilization programs provisions such as the following designed to meet special manpower needs in the localities affected, but except as specifically authorized herein, no such provision shall conflict with § 907.4 or with any State or Federal law.

(a) Subject to standards and instructions approved by the Chairman of the War Manpower Commission, provision for adding to § 907.4 (e) the following categories of individuals who must be hired only upon referral by, or in accordance with arrangements made with the United States Employment Service:

(1) Individuals for work in specified categories of occupations in activities in which manpower shortages threaten critically needed production, or

(2) Individuals for work in specified shortage occupations (in addition to critical occupations), or

(3) Individuals whose statements of availability indicate that they were most recently employed in such occupations, or

(4) Individuals who can be readily identified as able to meet specifications required for work in such occupations or activities, or

(5) All individuals. A program containing such a provision may apply only to a labor market area which, on the date of the approval of the program, was classified by the War Manpower Commission as a "Group I," or "Group II," area. Such a program may, notwithstanding anything to the contrary in this regulation, include necessary modifications of § 907.4, or

(6) Individuals who have not lived or worked in the locality of the new employment throughout the preceding thirty-day period, or

(7) Individuals whose last regular employment was in agriculture and who are to be hired for non-agricultural work; *Provided*, That no such individual shall be referred to non-agricultural work except after consultation with a designated representative of the War Food Administration; *And Provided*, That such an individual may be hired for non-agricultural work for a period not to exceed six weeks without referral or presentation of a statement of availability.

• • • • •

(i) Provisions designed (1) to permit the hiring of an individual by, or of an individual whose last regular employment was with, a small establishment without regard to the requirements of the program, except that no establishment regularly employing more than eight employees shall be treated as a small establishment for the purpose of this paragraph, or (2) to exclude from the requirements of the program the hiring of individuals last employed in domestic service or last employed by foreign, State or local governments or their instrumentalities, or (3) to exclude the hiring of individuals for supplemental or casual work, or for other types of short-time or intermittent employment, the coverage of any of which would involve undue administrative burdens and would not measurably contribute to the accomplishment of the objectives of this part, or (4) to exclude from the requirements of the program the hiring of readily identifiable types of individuals whose coverage is not required to meet the manpower problems of the locality to which the program applies.

(j) Subject to standards and instructions approved by the Chairman of the War Manpower Commission, provisions for regulating the hiring of new employees through the establishment of fair and reasonable employment ceilings which limit the number of workers or of specified types of workers which may be employed in an establishment or place of employment during specified periods.

(l) Provisions which while conflicting in substantive respects with this section or § 907.4, are approved by the Chairman of the War Manpower Commission after consultation with the Management-Labor Policy Committee and after a finding by him (1) that such provisions are necessary to meet manpower problems peculiar in the locality to which the program applies and are consistent with the fundamental objectives and policies upon which the provisions of this part are based, and (2) that such provisions have previously received the unanimous recommendation of the appropriate area or regional Management-Labor War Manpower Committee and manpower director.

PAUL V. MCNUTT,
Chairman.

tributing wrapping paper, paper bags, and kindred products and in the manufacture of paper plates, was suspended on December 30, 1944, by Suspension Order No. S-624. It appealed from the provisions of the suspension order and, pending determination of the appeal, the suspension order was stayed by the Chief Compliance Commissioner on January 30, 1945. The appeal has been considered by the Chief Compliance Commissioner who has denied the appeal, directed that the stay be terminated, and the suspension order be reinstated and amended.

[Suspension Order S-854]

CAR-MAX MANUFACTURING CO.

Car-Max Manufacturing Company is a sole proprietorship owned by M. M. Naftalin, with principal offices at 16-24 North Eighth Street, Minneapolis, Minnesota. It is engaged in the machine shop and manufacturing business at the above address and at a second plant at 1725 University Avenue, St. Paul, Minnesota. Its Minneapolis plant is for the most part engaged in war work and its St. Paul plant is engaged entirely in the manufacture of civilian products. During the Fourth Quarter of 1944, Car-Max Manufacturing Company unauthorizedly placed fifteen purchase orders for controlled materials using symbols which it had no right to apply. Further, in making three different applications for "spot" authorization under Priorities Regulation No. 25, said company wilfully furnished the War Production Board with false and misleading information. Said company also accepted delivery of new fibre shipping containers, during the fourth quarter of 1944, weighing 40,532 lbs. at a cost of $2,412.55, when it had no established quota and so no right to accept the same. Car-Max Manufacturing Company has thus violated War Production Board CMP Regulation No. 1, Priorities Regulation No. 1 and Order L-317. Its violations have diverted critical materials to uses not authorized by the War Production Board, and have hampered and impeded the war effort of the United States. In view of the foregoing, it is hereby ordered, that:

§ 1010.854 *Suspension Order No. S-854.* (a) Car-Max Manufacturing Company shall not, for a period of one hundred twenty (120) days following the effective date of this order, apply or extend any priority rating or CMP symbol or allotment whatsoever, regardless of delivery date of materials ordered, to purchase materials for use in its St. Paul plant or for use in any civilian work or production in which it is engaged at either its St. Paul or its Minneapolis plant.

(b) Said restriction above shall apply only to the procuration of materials for civilian production and shall not apply to the obtaining of materials for war contracts or war sub-contracts at the Minneapolis plant.

(c) Nothing contained in this order shall be deemed to relieve Car-Max Manufacturing Company from any restriction, prohibition, or provision contained in any other order or regulation of the War Production Board not herein mentioned, except insofar as the same may be inconsistent with the provisions hereof.

(d) The restrictions and prohibitions contained herein shall apply to Car-Max Manufacturing Company, its successors and assigns, or persons acting in its behalf.

(e) This order shall take effect on July 31, 1945.

Issued this 24th day of July 1945.

PART 1010—SUSPENSION ORDERS

[Suspension Order S-856]

STEWART HARDWARE

H. R. Stewart, doing business as Stewart Hardware Company, at Cary, Illinois, is the owner and operator of a hardware store whose principal business is the sale and installation of plumbing and heating equipment. Between February 1, 1943, and October 1, 1944, H. R. Stewart sold, delivered and installed at least thirty items of new metal plumbing equipment and metal heating equipment on unrated orders and without other authority in violation of Limitation Order L-79. In installing such equipment he also engaged in construction, the cost of which was in excess of the amount permitted by Conservation Order L-41, and in violation thereof. These actions constituted grossly negligent violations of the Limitation Order L-79 and Conservation Order L-41.

These violations have diverted critical materials to uses not authorized by the War Production Board. In view of the foregoing, it is hereby ordered, that:

§ 1010.856 *Suspension Order No. S-856.* (a) H. R. Stewart shall not for a period of three months from the effective date of this order apply or extend any preference ratings, regardless of the delivery date named in any purchase order to which such ratings may be applied or extended, unless otherwise authorized in writing by the War Production Board.

(b) No allocation, including allotments, shall be made to H. R. Stewart of any material or product, the supply or distribution of which is governed by any order or regulation of the War Production Board, unless hereafter specifically authorized in writing by the War Production Board.

(c) Nothing contained in this order shall be deemed to relieve H. R. Stewart from any restriction, prohibition or provision contained in any other order or regulation of the War Production Board except insofar as the same may be inconsistent with the provisions hereof.

(d) The restrictions and prohibitions contained herein shall apply to H. R. Stewart, doing business as Stewart Hardware or under any other name, his successors and assigns or persons acting in his behalf. The provisions against the taking of any action include the taking indirectly as well as directly of any such action.

(e) This order shall take effect on July 31, 1945.

Issued this 24th day of July 1945.

PART 1309—COPPER

[RMPR 20,[1] Amdt. 4]

COPPER SCRAP AND COPPER ALLOY SCRAP

A statement of the considerations involved in the issuance of this Amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.

Revised Maximum Price Regulation No. 20 is amended in the following respects:

1. Section 16 (c) (2) is amended by the addition of a new subdivision (iii) to read as follows:

[1] 9 F.R. 3508.

[1] 9 F.R. 756, 4394, 5374; 10 F.R. 2512.

(iii) To the maximum base price for any grade of copper alloy scrap, a special use premium of 1.25 cents per pound may be added: *Provided*, That the scrap has been prepared to meet the consumer's specifications and is suitable for his direct use without further preparation. However, no special use premium may be added on the sale or delivery of any such copper alloy scrap to a copper refiner, a brass and bronze ingot manufacturer, a ferrous or nonferrous foundry, or a brass mill.

(*a*) Any consumer qualified to pay the special use premium provided by this subparagraph who is unable to obtain any grade of copper alloy scrap by payment of the stated premium of 1.25 cents per pound because of unusual specification requirements may apply to the Office of Price Administration for the establishment of a price that he may pay for such material. The price so established shall be a price in line with the general level of prices established by this Revised Maximum Price Regulation No. 20, taking into account the applicant's special requirements and the additional costs to the seller involved in preparing material to meet these requirements.

(*b*) Such application shall be in writing and filed with the Metals Price Branch of the Office of Price Administration at Washington, D. C., and shall state:

(1) The name and address of the applicant;

(2) The nature of applicant's business;

(3) The purpose for which the applicant will use the material which he desires to purchase;

(4) The name and address of the proposed seller or sellers;

(5) A detailed statement of applicant's specifications for the material;

(6) A description of the manner in which the material is to be prepared;

(7) To the extent possible, a statement by the applicant setting forth the reasons why he cannot obtain the required material by payment of the special use premium established by this Regulation, and

(8) The proposed price, f. o. b. point of shipment.

When a maximum price is submitted for approval in this manner, it shall be deemed to be approved unless the Administrator specifically disapproves such price within fifteen days from the date on which receipt of the request for approval is acknowledged. The maximum price for such scrap when once approved shall be the maximum price for all subsequent purchases of such scrap by the buyer to whom such approval is given, unless such approval is specifically withdrawn.

This Amendment shall become effective August 6, 1945.

NOTE: All reporting and record-keeping requirements of this amendment have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

SECTION 1. *Sales and rentals of used household mechanical refrigerators at higher than maximum prices prohibited.* (a) Regardless of any contract or other obligation, no person shall sell, rent, or deliver a used household mechanical refrigerator to any other person at prices or rates higher than the maximum prices or rates fixed by this regulation, and no person shall agree, offer or attempt to do any of these things.

(b) Prices or rates lower than the maximum prices or rates may be charged.

SEC. 2. *To what products, transactions and persons this regulation applies*—(a) *What products are covered by the regulation.* This regulation covers sales and rentals of all household mechanical refrigerators which have ever been used, or which have been in the possession of a consumer for more than five days or were manufactured for use in the year 1940 or earlier.

(b) *What transactions are covered by this regulation.* This regulation covers all sales and rentals of used household mechanical refrigerators by any person to any other person, including sales by an individual who is selling his own refrigerator, and sales by dealers or auctioneers, except (1) sales by a foreign seller to any domestic buyer (this exception includes domestic buyers who purchase through a bona fide agent); and (2) rentals by a landlord who supplies or rents the refrigerator in connection with the use or occupancy of housing accommodations.

(c) *What persons are covered by this regulation.* This regulation applies to any person who sells or rents a used household mechanical refrigerator except (1) foreign sellers and domestic buyers insofar as they purchase from the foreign sellers, and (2) landlords who supply or rent the refrigerators in connection with use or occupancy of housing accommodations, and tenants of such housing accommodations. The term "person" includes: An individual, corporation or any other organized group; their legal successors or representatives; the United States, or any government, or any of its political subdivisions; or any agency of the foregoing.

[Paragraphs (b) and (c) amended by Am. 3, effective 8–6–45]

SEC. 3. *Maximum prices for sales of used household mechanical refrigerators by all persons*—(a) *Reconditioned refrigerators.* As used in the table below a refrigerator is reconditioned if it meets the following standards:

(1) The refrigerator is capable of continuously maintaining, with normal cycling, an average interior cabinet temperature in the food storage space not exceeding 50° F., under no-load conditions, when placed in a room in which the temperature is 90° F.

(2) All cooling units, compressors, condensers, motors and controls, where such parts are exposed to the accumulation of dust, as well as all shelves, hardware and machine compartments, are thoroughly cleaned, and function properly. Belts on open-type units must be free from frays and splits.

(3) A defrosting tray large enough to catch all drip from the cooling unit, and a minimum of two corrosion-resistant ice cube trays with grids are provided.

(4) Cabinet exteriors, finished with either synthetic enamel or lacquer have all metal completely covered and free from chips, stains, scratches, blisters and other blemishes. Any such defects have been buffed, smoothed, filled, and either spot-sprayed, or the entire exterior resprayed, where one of these methods is necessary in order to obtain a finish similar to the original finish. Cabinet exteriors and interiors finished with porcelain are thoroughly cleaned, rust removed from any chips and patched with a suitable porcelain cement.

(b) *"As is" refrigerators.* An "as is" refrigerator is one which does not meet the standards of a reconditioned refrigerator but has all the parts essential for its operation as a refrigerator.

[Paragraph (b) amended by Am. 3, effective 8–6–45]

(c) *Guaranties.* Every refrigerator which is sold as a reconditioned refrigerator must carry a written guaranty for at least 90 days from the date of its installation which provides that any part which proves defective within the guaranty period will be replaced without charge for labor or materials or other services. If the guaranty is to last for one year or more the higher reconditioned price appearing in the table of prices may be charged. In the case of consumer-to-consumer sales this requirement may be satisfied by the seller's giving a written agreement to pay for all parts and repairs needed to fulfill the guaranty.

[Last sentence added by Am. 3, effective 8–6–45]

(d) *Table of maximum prices for certain used household mechanical refrigerators.* The maximum cash price for the following specified models of used household mechanical refrigerators (except those with factory rebuilt units) shall be:

[The note following each model name and the heading "Miscellaneous Makes" in the above tables amended by Am. 3, effective 8-6-45]

(e) *Maximum prices for chest type or lift-top model refrigerators.* The maximum price for any chest type or lift-top model refrigerator shall be $9.00 if it is sold "as is" and $46.50 if it is sold as "reconditioned." For purposes of this section a chest type or lift-top household mechanical refrigerator is one having a net food storage capacity of less than three cubic feet and having the door giving access to its food storage compartment opening upwards from the top.

[Paragraph (e) added by Am. 3, effective 8-6-45. Former (e) deleted by Am. 3]

(f) *Maximum prices for models for which maximum prices are not fixed in the preceding paragraphs.* If the maximum price for any used household mechanical refrigerator is not specified in the preceding paragraphs, the maximum cash price shall be determined by the maximum price of the refrigerator listed in the foregoing table which corresponds most closely to the refrigerator being priced, with regard to age, finish, capacity, type of model and mechanical and cabinet equipment. The maximum price selected from the table shall correspond to the conditions under which the refrigerator is to be sold, i. e., "as is", or reconditioned with a 90-day or a one-year guaranty.

(g) *Maximum prices for refrigerators with new or factory rebuilt units.* (1) This paragraph shall apply only in cases in which:

[Above sentence amended by Am. 3, effective 8-6-45]

(i) The refrigerator meets the standards of a reconditioned refrigerator and is sold with a one-year guaranty.

(ii) The refrigerator contains a new unit or one rebuilt by the original manufacturer, or by a reconditioner who offered such a service in February, 1942, or earlier, and furnished with it at least a one-year guaranty.

(iii) The new or rebuilt unit has been purchased by the person offering the refrigerator for sale.

(2) The maximum cash price for a refrigerator with a new or rebuilt unit meeting the qualifications of the foregoing section shall be the sum of:

(i) The "as is" maximum price for that refrigerator, and

(ii) The manufacturer's net suggested resale maximum price in effect in March, 1942, or subsequently specifically approved by the Office of Price Administration, for the replacement unit contained in the refrigerator, or if no manufacturer's suggested resale price was in existence in March 1942, or later subsequently approved by the Office of Price Administration, the net cost to the dealer for the replacement unit, plus the dollar markup taken for the sale of the most comparable item in March 1942.

(h) *Sales in Western states.* If the sale of the refrigerator is made to a person in the States of Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, or Wyoming, $5.00 may be added to the maximum price.

(i) *Taxes.* Any tax upon or incident to the sale of a used household mechanical refrigerator may be added to the maximum prices established by this Regulation. Thus, if the seller has paid a Federal excise tax upon the rebuilding

of the refrigerator, that tax may be added.

(j) *Sales for export.* The maximum price at which a person may export any used household mechanical refrigerator is established by the provisions of the Maximum Export Price Regulation.[3]

(k) *Credit, delivery and other charges.* Any charge which is not quoted and billed separately shall for the purposes of this Regulation be considered to be part of the selling price of the refrigerator. Charges for the extension of credit or for delivery, packing or installation, may be added to the maximum retail price set forth in this section, provided: (1) the seller during the two-month period ending February 16, 1942, made a separate charge for the extension of credit, delivery, packing or installation services the amount of which was separately stated to the purchaser, (2) the amount charged for the extension of credit or for delivery, installation or packing, is not in excess of the charge in effect during the two-month period ending February 16, 1942 upon sales of used household mechanical refrigerators, and (3) such charges are quoted and billed separately. No seller may require as a condition of sale that the purchaser accept any of the services mentioned.

SEC. 4. *Maximum rental rates.* (a) The maximum rate which may be charged for the rental of a refrigerator shall be determined in accordance with the maximum sale price as set forth in the table below:

Maximum sale price, reconditioned with a 90-day guaranty		Maximum monthly rental rate
From	But below	
$46.50	$55.00	$2.50
55.00	65.00	3.00
65.00	75.00	3.50
75.00	85.00	4.00
85.00	95.00	4.50
95.00	105.00	5.00
105.00	115.00	5.50
115.00	125.00	6.00

Refrigerators whose maximum sale price (reconditioned with a 90-day guaranty) is $125.00 or more may be rented at a maximum monthly rate not to exceed 5 percent of the maximum sale price, calculated to the nearest half dollar.

(b) *Delivery of rental refrigerators.* An additional amount may be added to the rental rate to cover delivery and pick-up of rented refrigerators where such service is rendered, which may not exceed $5.50.

(c) *Maintenance of rented refrigerators.* A rented refrigerator must meet the standards set forth for reconditioned refrigerators in Sec. 3 (a) and during the period of the rental must carry the guaranty provided for in Sec. 3 (c).

(d) *Rental payments in advance.* A person who supplies a rented refrigerator may not ask for or receive rental payments for more than three months in advance.

(e) *Seasonal rentals.* Persons who rented refrigerators prior to April 1, 1942 for a period less than four months for use during that period in a resort community in households occupied by vacationers, shall compute their maximum prices in the manner provided by section 6 of Revised Maximum Price Regulation No. 165.[4] The ceiling price for rentals on a seasonal basis by persons who did not rent refrigerators on a seasonal basis prior to April 1, 1942, is the price in line with level of seasonal rental prices, fixed by the Office of Price Administration after application to it for the fixing of such a price. No such persons may rent refrigerators on a seasonal basis until such an order has been issued.

[Paragraph (e) added by Am. 1, 8 F.R. 9779, effective 7-20-43]

SEC. 5. *Prohibited practices.* (a) Any practice which is devised to get the effect of a higher than ceiling price without actually raising the dollar and cents price, is as much a violation of this regulation as an outright over-ceiling price. This applies to devices making use of commissions, services, transportation arrangements, tying agreements, tying requirements, trade understandings and the like.

(b) The following practice is specifically prohibited:

(1) Offering to sell or rent a refrigerator only on condition that the buyer agree to pay for repairs, parts, and services.

SEC. 6. *Tagging.* No person shall sell or offer to sell, or rent, a used household mechanical refrigerator unless a tag is attached to the refrigerator which states whether the refrigerator is offered for sale "as is" or "reconditioned," the length of the guarantee to be supplied, the make, model and year of the refrigerator, the maximum selling price; and if the refrigerator is offered for rent, the tag also shall state the maximum monthly rental rate. A tag in the following form is satisfactory:

Make
Model
Year
Condition (Reconditioned)
("as is")
Guaranteed for (90 days)
(one year)
Maximum selling price: $_____
(Maximum monthly rental rate: $_____)

This tag must not be removed except by the ultimate consumer. If the maximum price for the refrigerator was determined under paragraph (f) or (g) of Sec. 3, the tag shall so state, and if the refrigerator has a replacement unit, shall carry the name of the supplier of the unit.

SEC. 7. *Sales slips, receipts and invoices.* Regardless of his former practice, every person selling a used household mechanical refrigerator in the course of trade or business shall furnish the purchaser with a sales slip, receipt, invoice or other writing, stating that the refrigerator sold is either "as is" or "reconditioned", the length of the guarantee supplied, the date of the sale, the make, model, number and year, the price charged, the nature and amount of any additional charges, and the name and address of the purchaser. 3. The last sentence of section 1.5 (b) is amended to read as follows: "However, an applicant applying for safety shoes required to protect his health or safety because of the conditions under which he works may be found to have 'need' for them even though a member of his family has a basic shoe ration stamp which the applicant could use."

Nothing in this section shall prevent surplus property which is owned by a Government agency from being transported to the continental United States, its territories or possessions.

§ 8308.16 *Disposal policies*—(a) *Contact with foreign missions and price policy.* In order that foreign disposal operations shall be consistent with foreign policies of the United States, the disposal agencies shall maintain close contact

and cooperation in Washington with the State Department and abroad with United States diplomatic missions and appropriate consular offices and shall keep them fully and currently informed as to all disposal programs which are being initiated or carried out. The governing price policy shall be to obtain for the Government, as nearly as possible, the fair value of surplus property on its disposition.

(b) *Purchasers*—(1) *Government agencies.* Transfer of surplus property to Government agencies for their use in foreign areas shall be given priority over all other disposals. This priority shall extend to transfers to Foreign Economic Administration, not only for its own administrative purposes in foreign areas but also when the Administration is acquiring surplus property for Lend-Lease or to be used by it for the contribution of the United States to the United Nations Relief and Rehabilitation Administration.

(2) *Other than Government agencies.* Disposal agencies may establish such order of priorities among persons other than Government agencies as they may deem appropriate in the respective foreign areas, but shall, to such extent and in such order of priority as they may deem feasible, afford the following persons appropriate opportunity to purchase surplus property:

(i) The following institutions, for use in foreign areas: (*a*) Nonprofit institutions as defined in § 8308.1 (f), and (*b*) nonprofit educational and charitable institutions organized under the laws of a foreign country which are directly supported in whole or in part through use of funds derived from taxation by the United States, its territories or possessions or which are certified by the appropriate diplomatic mission as being supported in whole or in part from funds derived from the United States;

(ii) American manufacturers or distributors, with regard to surplus property bearing their name or trade-mark, for use or disposal in foreign areas or for importation into the United States for the purpose of reconditioning for reexport;

(iii) Foreign governments for relief, rehabilitation and reconstruction purposes.

Although disposal agencies should make reasonable efforts to apprise such persons of any opportunity afforded them to purchase surplus property, it shall be the primary responsibility of such persons to make their requirements known to the disposal agencies.

(c) *Payment*—(1) *Government agencies.* Transfers to Government agencies shall be made at the fair value of the property as fixed by the disposal agency and payment shall be made by transfer of United States dollar funds or by reduction of appropriation unless transfer without reimbursement or transfer of funds is otherwise authorized by law.

(2) *Other than Government agencies.* The determination as to whether disposal agencies shall accept United States dollars or foreign currencies in payment for surplus property located in foreign areas shall be made by the United States Treasury Department in consultation with the State Department. Where foreign currencies are accepted, the Treasury Department, in consultation with the State Department, shall determine the conditions with respect to the over-all acceptable amount of any such currency, the applicable rate of exchange, any provisions for conversion and any guarantee against loss through fluctuations of exchange. Any advice or approval heretofore given by the Treasury Department with regard to the acceptance of United States dollars or of foreign currencies shall continue in effect until changed by the Treasury Department.

(d) *Customs duties and taxes.* When making any agreements with foreign governments relating to the disposal of surplus property, disposal agencies shall, where necessary, seek appropriate arrangements with foreign governments to assure that no customs duties, taxes or other similar charges are levied upon sales of surplus property which are discriminatory or prevent the sale of surpluses at fair prices to the United States Government; and that no duties, taxes or similar charges will be levied upon surplus property prior to its sale by the disposal agencies or upon sales for export from country of sale. Where surplus property is to be disposed of without any agreement between the disposal agency and a foreign government, the disposal agency shall request the State Department or its foreign diplomatic or consular missions to negotiate, where necessary, such arrangements with the foreign government.

§ 8308.17 *Reference of policy matters to the Board.* Disposal agencies and all persons acting under delegated authority shall keep the Board currently informed as to their disposal policies and programs. They shall submit to the Board in writing any matter involving disposal policy of general application and shall not make such policy effective until at least five (5) days after such submittal to the Board unless the Board shall waive such requirement.

§ 8308.18 *Records.* Disposal agencies shall prepare and maintain such records as will show full compliance with this part and with the applicable provisions of the act as to each disposal transaction.

§ 8308.19 *Reports.* Reports shall be made to the Board of property declared surplus, held, and disposed of hereunder in foreign areas at such times and in such form as may be prescribed by the Board.

§ 8308.20 *Regulations by disposal agencies and others to be reported to the Board.* Each disposal agency and each person or Government agency acting under delegated authority for the disposition of surplus property shall file with the Board copies of all regulations, orders, and instructions of general applicability which they may issue in furtherance of the provisions, or any of them, of this part.

(3) When (i) a claim for guaranty is filed, or (ii) when a refinancing occurs and an offer is made as contemplated by subparagraphs (1) and (2) of this paragraph, the creditor shall not be entitled to treat payments theretofore made by the debtor, or another, as liquidated damages, or rentals, or otherwise than as payments on the indebtedness, notwithstanding any provision in the note, or mortgage, or otherwise, to the contrary.

CLAIMS OF NATIVES OF HYDABURG, KLAWOCK AND KAKE, ALASKA

JULY 27, 1945.

Statement of Facts

Hearings upon the petitions of the Indians of Hydaburg (filed June 28, 1944), Klawock (filed April 7, 1942, amended July 6, 1944), and Kake (filed July 5, 1944), Alaska, pursuant to the provisons of § 201.21b of the Regulations for Protection of the Commercial Fisheries of Alaska, 1944, were scheduled to be held, respectively, on September 15, 20, and 25, 1944. Notice of the hearings appeared in three southeastern Alaska papers and in the FEDERAL REGISTER (9 F.R. 9171, July 26, 1944).

The Indians of Hydaburg asserted a claim to the exclusive use and occupancy of the following lands and waters:

The western shore of Prince of Wales Island from Waterfall to Cape Chacon; the eastern shore of Dall Island from Cape Muzon to the northern end of said island; the western shore thereof from the northernmost point thereof to Cape Lookout; the shores of Forrester Island and of all the islands lying between Prince of Wales Island and Dall Island; the waters and submerged land for a distance of three thousand (3,000) feet from said shores; the lakes and the streams emptying into said waters; and the unpatented lands drained thereby.

The Klawock petition claimed:

The western shore of Prince of Wales Island from Point Baker on the north to Waterfall on the south; the shores of all islands to the seaward including Baker Island, Suemez Island, and Kulu Island south of Point Ellis on the west shore and south of Three Mile Arm on the east shore; and the names of the larger islands in this area are Baker Island, Suemez Island, San Fernando Island, Lulu Island, Noyes Island, St. Joseph Island group, Anguella Island group, Timbered Island, Coronation Island, Spanish Island, Warren Island, Hazy Island, and Kosciusko Island; the waters and submerged lands for a distance of three thousand (3,000) feet from said shores; the lakes and streams emptying into said waters; and the unpatented lands drained thereby.

The natives of Kake asserted exclusive claim to:

The northern shore of Kupreanof Island from Boulder Point to Cape Bendel, and the western shore from Cape Bendel to Sumner Strait including Hound Island and other adjacent islands, Turnabout Island off the northern shore of Kupreanof Island; the eastern shore of Kuiu Island from the southern end of Alvin Bay to Cornwallis Point including Keku Islets, Pup Island, Monte Carlo Island, Conclusion Island, Sumner Island, Strait Island and other adjacent islands; and the western shore from Cornwallis Point to the northern end of Port Malmesbury including Windfall Island and other adjacent islands; the southeastern shore of Admiralty Island from Point Brightman to Gambier Island including Elliott Island and other adjacent islands; the eastern shore of Baranof Island from (and including) Red Bluff Bay to (and including) Cape Ommaney; and the shores of Farragut Bay on the mainland of Alaska; the waters and submerged lands for a distance of three thousand (3,000) feet from said shores; the lakes and the streams emptying into said waters; and the unpatented lands drained thereby to a distance of three miles upland from the high-water mark;

The natives of Kake also asserted a claim to the use in common with other Tlingit bands of the following areas:

The shores of Kuiu Island south of Alvin Bay on the east and Port Malmesbury on the west; the shores of Seymore Canal on Admiralty Island, the mainland shore from Point Coke, on the north side of Holkham Bay, to Grant Point, on the south side of Farragut Bay, including the adjacent islands,

the shores of Red Bay on Prince of Wales Island; the waters and submerged lands for a distance of three thousand (3,000) feet from said shores; the lakes and the streams emptying into said waters; and the unpatented lands drained thereby to a distance of three miles upland from the mean high-water mark.

Rules of practice for the conduct of the hearings were published in 9 F.R. 10928 (September 6, 1944). All interested parties who desired to oppose the claims were afforded an opportunity to appear at the hearings. The Department of Agriculture was asked to be represented if it so desired.[1]

The presiding officer permitted the Hydaburg petition to be amended to include the entire western shore of Dall Island. In addition to the hearings which were held in each of the villages, supplementary hearings were conducted on September 27–29, 1944, at Ketchikan, Alaska, and on November 15–21 at Seattle, Washington, at which testimony concerning all of the claims was taken. Upon order of the presiding officer, briefs were filed by all interested parties. The final report of the presiding officer was submitted to the Secretary on March 1, 1945, with copies to each of the parties. The petitioners filed exceptions thereto. A statement was submitted on April 6 by the Alaska Canned Salmon Industry in answer to the exceptions, and the presiding officer on April 12, 1945, transmitted to the Secretary his recommendations thereon.

Findings of Fact

The findings of the presiding officer are modified in the respects hereinafter noted and as so modified are hereby affirmed:

1. Findings Nos. 1 [1a] and 2 [2] of the presiding officer, as qualified by Finding No. 7 [3] of the presiding officer, are affirmed.

2. Finding No. 3 [4] of the presiding officer is affirmed.

3. Finding No. 4 of the presiding officer [5] is modified by deleting the words "which are not upon evidence taken, capable of accurate or definite definement as to either the extent of the areas or boundaries thereof" and, as so modified, is affirmed.

4. Finding No. 5 of the presiding officer is modified, in the light of his recommendation of April 12, 1945, to read as follows, and, as so modified, is affirmed:

5. Towns and villages occupied as of the present time, may be said to have origin in aboriginal right, though in the case of *Hydaburg and Klawock* a change of situs has been had in recent times; some streams (Salmon), gardens, trapping grounds, forest areas for timber products, and other uses have continued to be made with claims to exclusive right of use.

With a change in Indian economic position and a reduction in population these uses have in part been abandoned.

5. Finding No. 6 [6] is modified by deleting the words "not accurately defined" and, as so modified, is affirmed.

On the basis of the evidence adduced and available public records, the foregoing findings are further supplemented by the following additional findings:

6. The natives of Hydaburg, Klawock and Kake constitute, respectively, Indian communities organized along tribal lines and have been traditionally recognized as such by the Indians, by scientific observers, and by administrative authorities.

7. On May 17, 1884, and for decades prior thereto, the natives of Hydaburg exclusively occupied and exclusively claimed as their own the lands and waters set forth in the amended petition, totaling approximately 905,000 acres; the natives of Klawock similarly occupied and claimed the area set forth in their petition, except for Kuiu Island, totaling approximately 1,234,000 acres; and the natives of Kake similarly occupied and claimed the area set forth in their petition, except for Kuiu Island, totaling approximately 1,200,000 acres.

The native population of Hydaburg between 1836 and 1884 ranged from approximately 1,735 to approximately 647 at different times; the per capita acreage utilized and claimed thus ranged from approximately 525 to approximately 1,400 acres. In the same period the natives of Klawock numbered between 1,800 and 500. The population of Kake during this period ranged from approximately 800 to approximately 568. Thus, their per capita acreage amounted to between approximately 685 and 2,468 acres for Klawock; and between 1,500 acres and 2,112 acres for the natives of Kake. This compares with recognized aboriginal landholdings in the State of Washington averaging approximately 3,136 acres per capita (at the time such recognition was first accorded), and in the United States as a whole averaging approximately 6,400 acres per capita. The natives of southeastern Alaska were able to maintain a relatively high standard of aboriginal subsistence in a relatively small area by reason of their advanced technology and trade, which included intensive use of fisheries, the preservation of large quantities of fish through drying and smoking, the building and navigation of the largest boats made in aboriginal North America, and the carrying on of extensive trade in dried fish, furs, copper, blankets, and other articles of handicraft along the coast from Oregon to the Aleutian Islands.

8. Since 1884 the natives of Hydaburg, Klawock and Kake have ceased to maintain exclusive occupancy of approximately 92 per cent of the foregoing described areas, either by reason of voluntary abandonment of lands once claimed or by acquiescence in the superior power and authority of the Federal Government in patenting or otherwise disposing of or controlling certain lands which effectively interfered with Indian use not only of the lands so disposed of but of other lands thereby separated from convenient access.

9. Decision on the areas, totaling approximately 2,008,000 acres, claimed by the natives of Kake in common with other bands of the Tlingit Tribe, and including all of Kuiu Island, exclusively claimed in part by the natives of Kake and in part by the natives of Klawock, is reserved in order to allow other bands to be heard.

10. From May 17, 1884, to the present day the natives of Hydaburg have continuously and exclusively occupied and used, and claimed as their property, an area in the immediate vicinity of the village of Hydaburg amounting to approximately 101,000 acres and described as follows:

Beginning at a point at the head of Soda Bay, approximate latitude 55° 17′ N., longitude 132°55′ W.; from the initial point at lowest low tide, westerly along the line of lowest low tide on the south shore of Soda Bay to a point opposite Hallbut Nose; southeasterly along the line of lowest low tide on the north shore of North Pass and the east shore of Sukkwan Strait to Elk Point; northerly along the line of lowest low tide on the west shore of Hetta Inlet to a point one mile above Deer Bay; northerly and westerly along the divide at the head of the drainage into Sukkwan Strait and North Pass to the point of beginning; and Sukkwan Island; and including the rocks and islets within 3,000 feet from such shores; and further including all lakes within the foregoing areas, all inlets where the distance from shore to shore is less than 1,000 feet, all streams, and the waters within 500 yards of the mouth of each such stream as defined pursuant to the act of April 16, 1934 (48 Stat. 594, 48 U.S.C. secs. 232, 233); excepting from the foregoing any patented lands.

The natives of Klawock have, since May 17, 1884, continuously and exclusively occupied and used, and claimed as their property, the following area in the vicinity of the town of Klawock:

Beginning at a point one mile north of the mouth of the creek emptying into Tuxekan Passage, north of the town of Tuxekan on Prince of Wales Island, on the east shore of Tuxekan Passage, in approximate latitude 55 55′ N., longitude 133°15′ W.; thence easterly and southwesterly along the line of lowest low tide on the east shores of Tuxekan Passage, Tonowek Narrows, and Tonowek Bay to a point of shore east of St. Phillip Island; westerly to east shore of St. Phillip Island; northwesterly, southwesterly and southeasterly along the shore of said island to point on east shore; easterly to point on Prince of Wales Island; easterly along the north shores of San Christoval Channel, San Alberto Bay, and Shinaku Inlet to a point on shore north of Wadleigh Island; southerly through the waters of Shinaku and Klawock Inlets east of Wadleigh Island and west of Klawock Island to a point on shore of Prince of Wales Island south of Klawock Island; southwesterly along the line of lowest low tide on the east shore of Klawock Inlet to a point approximately midway between the towns of Craig and Klawock, in approximate latitude 55°31′ N., longitude 133 08′ W.; southeasterly along the divide between Klawock Lake and Port St. Nicholas to a point on the divide between Klawock Lake and Twelvemile Arm; northerly along the divide to the divide east of Black Bear Lake; northwesterly along divide east of Black Bear Lake to a point one mile east of Big Salt Lake; westerly at a distance of one mile from shore along the north shores of Big Salt Lake, Shinaku Inlet, San Alberto Bay, and San Christoval Channel; northeasterly and westerly at a distance of one mile inland from shore, along the east shores of Tonowek Bay, Tonowek Narrows and Tuxekan Passage to a point one mile from shore north of the town of Tuxekan, westerly to point on shore one mile north of the mouth of creek north of town of Tuxekan and the place of beginning, together with the rocks and islets within 3,000 feet of said shores; and further including all lakes within the foregoing areas, all inlets where the distance from shore to shore is less than 1,000 feet, all streams, and the waters within 500 yards of the mouth of each such stream as defined pursuant to the act of April 16, 1934 (48 Stat. 594, 48 U.S.C. secs. 232, 233); excepting from the foregoing any patented lands; containing approximately 95,000 acres.

The natives of Kake have, since May 17, 1884, continuously and exclusively occupied and used, and claimed as their property, the following area in the vicinity of the town of Kake:

Beginning at a point on the north shore of Keku Strait, at the town of Kake, on the north end of Kupreanof Island, in approximate latitude 56°58′ N., longitude 133°56′ W.; thence southeasterly along line of lowest low tide on the north shores of Keku Strait and Hamilton Bay; westerly on south shore of Hamilton Bay to Hamilton Point; southeasterly and southerly along the north and east shores of Keku Strait to the south end of island on north shore of Sumner Strait; easterly one mile to a point on north shore of said strait; northerly at a distance of one mile from shore along the east shores of Keku Strait and Big John Bay to a point one mile east of north end of bay; northerly to a point one mile east of east end of Hamilton Bay; westerly to a point one mile from shore and five miles southeast of the town of Kake; northeasterly for a distance of two miles, to a point; northwesterly for a distance of ten miles, to a point; southwesterly for a distance of two miles, to a point one mile distant from shore; northerly and southeasterly at a distance of one mile from shore to a point near West Point; northerly one mile to a point at West Point on the south shore of Frederick Sound; westerly and southeasterly along line of lowest low tide on the south shore of Frederick Sound and north shore of Keku Strait to the town of Kake and the place of beginning, including the rocks and islets within 3,000 feet of said shores; and further including all lakes within the foregoing areas, all inlets where the distance from shore to shore is less than 1,000 feet, all streams, and the waters within 500 yards of the mouth of each such stream as defined pursuant to the act of April 16, 1934 (48 Stat. 594, 48 U.S.C. secs. 232, 233); excepting from the foregoing any patented lands; containing approximately 77,000 acres.

11. The "natives of Hydaburg" number today approximately 575;[1] and the per capita share of these natives in the area which has remained within their exclusive possession and use is approximately 180 acres. The per capita share of the natives of Klawock, numbering approximately 500,[2] amounts to approximately 190 acres, and that of the natives of Kake, who number approximately 380, amounts to approximately 200 acres. These areas compare with contemporary landholdings of Indians in the State of Washington averaging approximately 180 acres per capita, and of Indians in the continental United States as a whole averaging approximately 244 acres per capita.

12. The following areas have been effectually removed from Indian occupancy and possession by reason of extensive mineral entries, homestead patenting and other disposition of lands:

HYDABURG

Beginning at a point at the town of Sulzer on Hetta Inlet, approximate latitude 55°17′ N., longitude 132°38′ W., thence southeasterly along trail to a point on the divide between Hetta Inlet and West Arm of Cholmondeley Sound; southeasterly along divide between Hetta Inlet and South Arm to the divide between Nutkwa Lagoon and Klakas Inlet; southwesterly along said divide to Keete Inlet; thence along ordinary high water on north shore of Keete Inlet and along shores of Nutkwa Inlet and Nutkwa Lagoon to Lime Point; thence northerly along ordinary high water on east shore of Hetta Inlet to Sulzer and the place of beginning; containing approximately 59,900 acres.

KLAWOCK

Beginning at a point at the town of Shakan on the north end of Kosciusko Island in approximate latitude 56°08′ N., longitude 133° 28′ W.; thence northeasterly along ordinary high water on the east shore of Shakan Strait and easterly and southerly along the south and west shores of El Capitan Passage to Devilfish Bay; southwesterly along the north shore of Devilfish Bay to a point at the west end of said bay; westerly to the east shore of Shipley Bay; thence along ordinary high water on the north shore of Shipley Bay, east shore of Sumner Strait, and south shores of Shakan Bay and Shakan Strait to the town of Shakan and the place of beginning, containing approximately 27,600 acres.

Beginning at a point on the north shore of Shakan Bay west of Calder Bay on the north end of Prince of Wales Island, in approximate latitude 56°11′ N., longitude 133° 32′ W.; thence northerly to the divide between Sumner Strait drainage on the north and the drainage of Calder Bay, Shakan Bay, Shakan Strait, and El Capitan Passage on the south; southeasterly along said divide to a point in approximate latitude 55°56′ N., longitude 133°03′ W.; southwesterly on the divide between Sarkan Lake and Tuxekan passage to a point one mile north of the mouth of creek emptying into Tuxekan Passage north of the town of Tuxekan; northwesterly along ordinary high water on east shore of Tuxekan Passage, east and north shores of El Capitan Passage, and the north shore of Shakan Bay to Calder Bay; thence along shore around Calder Bay and to the place of beginning, containing approximately 75,600 acres;

Marble Island, containing approximately 6,500 acres;

Baker Island, containing approximately 30,000 acres.

KAKE

Beginning at a point at Cape Ommaney on the southern end of Baranof Island, thence northerly along ordinary high water on the east shore of said island to Red Bluff Bay; northwesterly along the south shore of Red Bluff Bay to a stream near end of bay; southwesterly to the divide between Chatham Strait and the Pacific Ocean; southerly along said divide to Cape Ommaney and the place of beginning, containing approximately 131,800 acres.

13. As to all areas within the scope of the three petitions which are not covered by Findings 9, 10, and 12, totaling approximately 2,735,000 acres, the petitioners have ceased to maintain exclusive occupancy. Within this area, however, so far as claimed by the respective petitioners, each of the three native groups has continued to use existing trails and waterways, and to hunt, fish, gather natural resources, and trap, subject to applicable conservation regulations, except in relatively small areas disposed of by the Federal Government and thereafter closed to hunting, fishing, trapping, or trespass.

14. Such hunting, trapping, and fishing have been carried on by petitioners in common with all other citizens, except in those areas closed to commercial fishing where natives are legally entitled to take fish for subsistence purposes.

Petitioners have appealed from all the findings of fact of the presiding officer. Their appeal is rejected.

Conclusions of Law [1]

I hereby affirm the following conclusions of law adopted by the presiding officer:

1. Occupancy necessary to establish aboriginal possession of land by an Indian tribe, band or individual Indian is a question of fact.

2. Lands included in the ancestral home of Indians in the sense that they constituted definable territory occupied exclusively by them are lands to which they have "Indian Title" until same is extinguished by the Congress.

3. The policy of the Government to respect the aboriginal possession of land by Indians applies to lands ceded by Russia, under the treaty of 1867, with the United States.

4. An Indian aboriginal claim to land will be recognized although it has no

[1] Letter from Assistant Secretary Chapman, dated August 23, 1944, to the Secretary of Agriculture.

[1a] 1. Petitioners or claimants have not established with respect to claimed right of exclusive use of tidal waters (for fishing), involved in the areas described in the petition, the exclusive possession of definable territory, in such areas, that is necessary to the recognition of such exclusive use claimed by them not being shown.

[2] 2. There has been an abandonment by claimants of an exclusive fishing right in tidal waters, claimed by petitioners, by acquiescence in the use of such waters for fishing by non-Indians.

[3] 7. Since aboriginal times the only fishing waters in the areas included within claimants' petitions, where claimants have asserted exclusive fishing rights are an unknown number of small streams and nearby bays and harbors.

[4] 3. Such evidence of aboriginal rights in tidal waters, produced at the hearings largely dealt with fishing uses to meet domestic food requirements, now not so essential, through a change in the Indian economic conditions, and this use is not shown to be substantially impaired under present conditions.

[5] 4. Within land areas described, in the three petitions, the claimants established a prima facie case of aboriginal right to possession and occupancy of some portions of the areas claimed which are not upon evidence taken, capable of accurate or definite definement as to either the extent of the areas or boundaries thereof.

[6] 6. Some areas, not accurately defined, are shown to be subject to occasional use as camps when the Indians are engaged in seasonal fishing and curing their catch; smokehouses are more or less scattered through the areas in question, all of which uses appear based upon aboriginal possession with present, and past, basis in an exclusive use.

[1] The population of the "natives of Hydaburg" consists of the total number of Haidas in southeastern Alaska, minus the Haidas of Kasaan, as compiled in the 1940 census.

[2] This figure, based on a survey made by the Bureau of Indian Affairs for the year ending June 30, 1935, is used instead of the latest statistics of the population so as to include members of the village who are temporarily absent.

basis in any treaty, statute, or other formal Government action.

5. Intent of Congress to extinguish Indian title through statutory enactment is not to be lightly implied, all doubts in the construction of the statute being resolved in favor of the Indians.

6. The policy of the United States in dealing with the Indians has been to accept the subdivisions of the Indians into such tribes or bands as the Indians themselves adopted, and to treat with them accordingly.

The presiding officer's conclusion concerning the abandonment of aboriginal rights is modified to read as follows:

7. Abandonment of an exclusive aboriginal right occurs when the aboriginal claimants have indicated a general consent to the participation by others in those rights. A right to hunt or fish in common with others, or any other nonexclusive aboriginal right, is not abandoned by the consent of the aboriginal claimants to participation by others in the exercise of such right.

The presiding officer's conclusions of law are supplemented by adding the following conclusions:

8. Those lands referred to in Findings 12 and 13 (3,066,000 acres) are legally open to disposition under applicable public land laws without encumbrance of Indian title.

9. The petitioners' possession of those lands referred to in Finding 4, and more precisely defined in Finding 10 (273,000 acres), is protected not only by the policy referred to in Conclusion 3 but also by the following statutes: Section 8 of the act of May 17, 1884 (23 Stat. 24); section 14 of the act of March 3, 1891 (26 Stat. 1101); act of May 14, 1898 (30 Stat. 409, 413); act of June 6, 1900 (31 Stat. 321, 330), and act of May 25, 1926 (44 Stat. 629).

10. All rights of petitioners in tidelands and inland waters and bays are subject to the public right of navigation.

HAROLD L. ICKES,
Secretary of the Interior.

SEC. 6. *General.* A new employee, who during the preceding 60-day period was engaged in an essential or locally needed activity, may be hired only if such hiring would aid in the effective prosecution of the war. Such hiring shall be deemed to aid in the effective prosecution of the war only if:

(a) Such individual is hired for work in an essential or locally needed activity or for work to which he has been referred by the United States Employment Service, and

A worker shall be deemed to have been discharged for all purposes of this plan, if, after leaving his employment and failing to qualify for a statement of availability he is directed by the United States Employment Service, and agrees to return to his former employment, and the employer thereupon refuses to reemploy him in his former or in a comparable position without prejudice to his seniority and other rights, or

(b) He has been laid off for an indefinite period, or for a period of seven days or more, or

(c) Continuance of his employment would involve undue personal hardship, or

(d) Such employment is or was at a wage or salary or under working conditions below standards established by State or Federal law or regulation, or

(e) Such employment is or was at a wage or salary below a level established or approved by the National War Labor Board (or other agency authorized to adjust wages or approve adjustments thereof).

(f) Male workers receiving Statement of Availability from their employers may not be hired upon presentation of the Statement of Availability by the new male employee. Either the employer or employee may within 3 days after receipt of notice of action taken by the United States Employment Service on a request for a statement of availability, take an appeal therefrom as provided in section 27 of this plan.

(b) A statement of availability shall be issued by the United States Employment Service to any individual in the employ of an employer who the War Manpower Commission finds, after notice, hearing and final decision, has not complied with any War Manpower Commission employment stabilization plan, regulation or policy, and for so long as such employer continues his non-compliance after such finding.

(c) The worker should remain on the job until such time as a statement of availability is granted or denied.

SEC. 9. *Surrender, filing and inspection of statements of availability or referral card.* The original statement of availability issued to an employee or referral card must be surrendered by him at the time of hiring, to the new employer who shall file and retain such statement and make his file available for inspection upon request by the United States Employment Service of the War Manpower Commission.

SEC. 10. *Referral in case of under-utilization.* If an individual is employed at less than full time or at a job which does not utilize his highest recognized skill for which there is a need in the war effort, the United States Employment Service may, upon his request, refer him to other available employment in which it finds that the individual will be more fully utilized in the war effort.

SEC. 11. *Workers who may be hired only upon referral by the United States Employment Service.* A new employee may not be hired solely upon presentation of a statement of availability, but he may be hired only upon referral by, or with the consent of, the United States Employment Service when:

(a) The new employee has not lived or worked in the locality of the new employment throughout the preceding 30-day period.

(b) The new employee's last regular employment was in agriculture and he is to be hired for non-agricultural work except after consultation with a designated representative of the War Food Administration, and provided that such an individual may be hired for non-agricultural work for a period not to exceed six weeks without referral or presentation of a statement of availability.

(c) The new employee's last regular employment was in an essential or locally needed activity and he is to be hired for work in a less essential activity.

(d) The new employee is a male.

SEC. 12. *Standards governing referral of male workers subject to priority referral.* (a) To the greatest degree consistent with war needs, workers subject to priority referral shall be given the maximum possible freedom of choice as to the jobs they wish to accept, and employers shall be given the maximum freedom of choice as to the workers they wish to employ, except that workers shall seek jobs and employers shall recruit workers only through the United States Employment Service or other referral agencies with which arrangements have been made with the War Manpower Commission.

(b) To achieve this objective, the United States Employment Service and other authorized referral agencies shall offer each worker subject to priority referral successive job opportunities in the order of their relative urgency in the war program. Referral shall be made in the following order:

(1) To jobs which utilize the applicant's highest skill in establishments with orders on the manpower priority list, in the order of their relative priority. This includes clearance openings which have an established priority;

(c) Good cause for refusing referral to a job without prejudice to further job offers shall include:

(1) Any case in which the worker, if he accepted the job, would be entitled to a statement of availability or to referral under the employment stabilization plan;

(2) A case in which wages or working conditions in the offered employment are not reasonably comparable to those in similar employment in similar establishments in the community;

(3) Any case in which acceptance of the job offered would require the worker to join or resign from or refrain from joining a bona fide labor organization.

SEC. 13. *Assignment of priority ratings.* The Area Director, in assigning a priority rating to a job order, shall consider the following factors:

(c) Except as authorized by the Area Manpower Director, no employer shall hire any new employee for work in such establishment if the hiring of such employee would result in such establishment's exceeding the employment ceiling or allowance currently applicable to it.

SEC. 3. *Control of hiring and solicitation of workers.* All hiring and solicitation of workers in, or for work in, the Scranton-Wilkes-Barre Area shall be conducted in accordance with the provisions of this employment stabilization plan.

SEC. 4. *Adaptation of area plan*—(a) *Adaptation to meet area conditions.* This plan may be adapted as the need arises to meet changing area conditions by the Area Manpower Director after consultation with the appropriate Management-Labor Manpower Committee: *Provided*, That such adaptations are not in conflict with minimum national standards as set forth in Regulation 7 and with regional standards: *And provided further*, That such adaptations are approved by the Regional Director.

(b) *Area Labor-Management Manpower Committee.* The Area Labor-Management Manpower Committee is hereby authorized to consider questions of policy standards and safeguards in connection with the establishment and administration of this plan and to make recommendations on these subjects to the Area Director.

SEC. 5. *Minimum standards*—(a) *General.* A new employee, who during the preceding 60-day period was engaged in an essential or locally needed activity, may be hired only if such hiring would aid in the effective prosecution of the war. Such hiring shall be deemed to aid in the effective prosecution of the war only if:

(1) Such individual is hired for work in an essential or locally needed activity or for work to which he has been referred by the United States Employment Service, and

(2) Such individual presents a statement of availability from his last employment in an essential or locally needed activity, or is referred by the United States Employment Service of the War Manpower Commission, or is hired with its consent, as provided herein.

(b) *Issuance of statements of availability by employers.* An individual whose last employment is or was in an essential or locally needed activity shall receive a statement of availability from his employer if:

(1) He has been discharged, or his employment has been otherwise terminated by his employer, or

(2) He has been laid off for an indefinite period, or for a period of seven or more days, or

(3) Continuance of his employment would involve undue personal hardship, or

(4) Such employment is or was at a wage or salary or under working condi-

tions below standards established by State or Federal law or regulations, or

(5) Such employment is or was at a wage or salary below a level established or approved by the National War Labor Board (or other agency authorized to adjust wages or approve adjustments thereof) as warranting adjustment, and the employer has failed to adjust the wage in accordance with such level or to apply to the appropriate agency for such adjustment or approval thereof.

(c) *Issuance of statements of availability by United States Employment Service.* (1) A statement of availability shall be issued promptly to an individual when any of the circumstances set forth in paragraph (b) of this section is found to exist in his case. If the employer fails or refuses to issue a statement, the United States Employment Service of the War Manpower Commission upon finding that the individual is entitled thereto, shall issue a statement of availability to the individual.

(2) A statement of availability shall be issued by the United States Employment Service to any individual in the employ of an employer who, the War Manpower Commission finds, after notice, hearing, and final decision, has not complied with any War Manpower Commission employment stabilization plan, regulation or policy, and for so long as such employer continues his non-compliance after such finding.

(d) *Referral in case of under-utilization.* If an individual is employed at less than full time or at a job which does not utilize his highest recognized skill for which there is a need in the war effort, the United States Employment Service may, upon his request, refer him to other available employment in which it finds that the individual will be more fully utilized in the war effort.

(e) *Workers who may be hired only upon referral by the United States Employment Service.* A new employee may not be hired solely upon presentation of a statement of availability, but may be hired only upon referral by, or with the consent of, the United States Employment Service when:

(1) The new employee is to be hired for work in a critical occupation, or his statement of availability indicates that his last employment was in a critical occupation.

(2) The new employee has not lived or worked in the locality of the new employment throughout the preceding 30-day period.

(3) The new employee's last regular employment was in agriculture and he is to be hired for non-agricultural work: *Provided*, That no such individual shall be referred to non-agricultural work except after consultation with a designated representative of the War Food Administration: *And provided*, That such an individual may be hired for non-agricultural work for a period not to exceed six weeks without referral or presentation of a statement of availability.

(f) *Exclusions.* No provision of the employment stabilization plan shall be applicable to:

(1) The hiring of a new employee for agricultural employment.

(2) The hiring of a new employee for work of less than seven days' duration, or for work which is supplementary to the employee's principal work; but such work shall not constitute the individual's "last" employment for the purpose of this program, unless the employee is customarily engaged in work of less than seven days' duration.

(3) The hiring by a foreign, State, county, or municipal government, or their political subdivisions, or their agencies and instrumentalities, or the hiring of any of their employees, unless such foreign, State, county, or municipal government, or political subdivision or agency or instrumentality has indicated its willingness to conform, to the maximum extent practicable under the Constitution and laws applicable to it, with the program.

(4) The hiring of a new employee for domestic service, or to the hiring of a new employee whose last regular employment was in domestic service.

(5) The hiring of a school teacher for vacation employment or the rehiring of a school teacher for teaching at the termination of the vacation period.

(g) *Appeals.* Any worker or employer may appeal from any act or failure to act by the War Manpower Commission under this employment stabilization plan, in accordance with regulations and procedures of the War Manpower Commission.

(h) *Content of statements of availability.* A statement of availability issued to an individual pursuant to this plan shall contain only the individual's name, address, social security account number, if any, the name and address of the issuing employer, or War Manpower Commission Officer and office, the date of issuance, a statement as to whether or not the individual's last employment was in a critical occupation, and such other information not prejudicial to the employee in seeking new employment as may be authorized or required by the War Manpower Commission.

(i) *Solicitation of workers.* No employer shall advertise or otherwise solicit for the purpose of hiring any individual if the hiring of such an individual would be subject to restrictions under this employment stabilization plan, except in a manner consistent with such restrictions.

(j) *Hiring.* The decision to hire or refer a worker shall be based on qualifications essential for performance of or suitability for the job, and shall be made without discrimination as to race, color, creed, sex, national origin, or except as required by law, citizenship.

(k) *Representation.* Nothing contained in this plan shall be construed to restrict any individual from seeking the advice and aid of, or from being represented by, the labor organization of which he is a member, or any other representative freely chosen by him, at any step in the operation of this plan.

(l) *General referral policies.* No provision in the program shall limit the authority of the United States Employment Service to make referrals in accordance with approved policies and instructions of the War Manpower Commission.

SEC. 6. *Existing contracts.* Nothing in this plan shall be construed to prejudice existing seniority rights of an employee under any agreement with his employer.

SEC. 7. *Advertising.* Advertising for employees:

(a) Shall not be of a nature which will have a disruptive effect upon the labor market in a particular area, including either the publication of wage rates which induce turnover and piracy or the solicitation of workers by employers outside an area except through arrangements with the United States Employment Service of the War Manpower Commission.

(b) Should state clearly that employees now employed in essential activity cannot be considered without a statement of availability.

(c) Should state clearly that before employers hire employees possessing skills which appear on the list of critical occupations, clearance must be obtained from the United States Employment Service.

SEC. 8. *Advance notice of lay-offs.* Employers are required when possible to provide at least three days advance notice to the United States Employment Service whenever a lay-off of ten or more employees will occur and such notice shall contain a statement as to the number of employees to be laid off by occupations.

SEC. 9. *Limited statements of availability.* Limited statements of availability specifying a particular date on which employees shall be returned to their previous employer shall be issued by the United States Employment Service of the War Manpower Commission, whenever, in the judgment of the appropriate Area Manpower Director, the best interests of the war effort will be served by such action: *Provided*, That such action is agreeable to both the employer and employees involved: *And provided further*, That such limited statements of availability shall not be issued for a period longer than 3 months.

SEC. 10. *Request to remain on or return to a job.* The United States Employment Service of the War Manpower Commission shall request any employee to return to or remain on his job and shall request any employer to retain such employee in his employ:

(a) Pending any determination on the employee's request for a statement of availability.

(b) Pending decision on the employee's appeal from a determination denying him a statement of availability.

(c) Upon a final determination that the employee is not entitled to a statement of availability.

WHEREAS after an investigation I find and proclaim that the plants and facilities of the United States Rubber Company, located in or around Detroit, Michigan, are equipped for the manufacture and production of articles and materials that are required for the war effort, or that are useful in connection therewith; that there are existing interruptions of the operation of said plants and facilities as a result of a labor disturbance; that the war effort will be unduly impeded or delayed by these interruptions; and that the exercise, as hereinafter specified, of the powers vested in me is necessary to insure, in the interests of the war effort, the operation of these plants and facilities;

NOW, THEREFORE, by virtue of the power and authority vested in me by the Constitution and laws of the United States, including Section 9 of the Selective Training and Service Act of 1940 (54 Stat. 892) as amended by the War Labor Disputes Act (57 Stat. 163), as President of the United States and Commander in Chief of the Army and Navy of the United States, it is hereby ordered as follows:

1. The Secretary of War is hereby authorized and directed, through and with the aid of any persons or instrumentalities that he may designate, to take possession of the plants and facilities of the United States Rubber Company, located in or around Detroit, Michigan, and, to the extent that he may deem necessary, of any real or personal property, and other assets wherever situated, used in connection with the operations thereof; to operate or to arrange for the operation of the plants and facilities in any manner that he deems necessary for the successful prosecution of the war; to exercise any contractual or other rights of the United States Rubber Company, and to continue the employment of, or to employ, any persons, and to do any other thing that he may deem necessary for, or incidental to, the operation of the said plants and facilities and the production, sale and distribution of the products thereof; and to take any other steps that he deems necessary to carry out the provisions and purposes of this order.

2. The Secretary of War shall operate the said plants and facilities in accordance with the terms and conditions of employment which are in effect at the time possession thereof is taken, subject to the provisions of Section 5 of the War Labor Disputes Act.

3. The Secretary of War shall permit the management of the plants and facilities taken under the provisions of this order to continue with its managerial functions to the maximum degree possible, consistent with the aims of this order.

4. All Federal agencies, including but not limited to the War Manpower Commission, the National Selective Service System, and the Department of Justice, are directed to cooperate with the Secretary of War to the fullest extent possible in carrying out the purposes of this order. Upon request of the Secretary of War, the Department of Justice, through the Federal Bureau of Investigation, shall immediately undertake an investigation of any matter affecting the operation of said plants, facilities, and property.

5. Possession, control, and operation of any plant or facility, or part thereof, taken under this order shall be terminated by the Secretary of War within 60 days after he determines that the productive efficiency of the plant, facility, or part thereof prevailing prior to the existing interruptions of production, referred to in the recitals of this order, has been restored.

TITLE 7—AGRICULTURE

Chapter I—Office of Marketing Services

Subchapter C—Regulations Under the Farm Products Inspection Act

PART 51—FRUITS, VEGETABLES, AND OTHER PRODUCTS (INSPECTION AND CERTIFICATION)

BASIS FOR CHARGES

Pursuant to the provisions of the Perishable Agricultural Commodities Act, 1930 (46 Stat. 531, as amended; 7 U.S.C. 499a et seq.), and the provisions of the Department of Agriculture Appropriation Act, 1946, approved May 5, 1945 (59 Stat. 136), the provisions in § 51.36 of the regulations issued thereunder relating to inspection and certification of fruits, vegetables, and other products (7 CFR, Cum. Supp., 51.36; 10 F.R. 1691), are hereby amended to read as follows:

§ 51.36 *Basis for charges.* The fee for each lot of products inspected by a salaried inspector acting exclusively for the Department of Agriculture, except for peanuts, pecans, and other nuts, and except under the provisions of § 51.19, shall be on the following basis: For an inspection covering quality or condition, $5.00 when the quantity involved is more than ½ a carload of the customary size for such products in the area from which shipped but not more than a full carload, and $3.00 when the quantity involved is not more than ½ of such carload, but the maximum fee for any carload not exceeding the customary size shall be $9.00. For each lot of peanuts, pecans, or other nuts inspected, except under § 51.19 the fee shall be $8.75 when the quantity involved is not more than a full carload, provided that different grades and varieties of peanuts shall be considered separate lots. When the lot involved is in excess of a carload the quantity shall be calculated in terms of carloads and fractions thereof of the customary size for such carloads and the carload rates aforesaid applied provided that said fractions shall be calculated in terms of fourths or next higher fourths. When inspections are made on which formal certificates are not issued, as provided in § 51.19, or when the products inspected cannot readily be calculated in terms of carloads, or when the services rendered are such that a charge on the carload basis would be inadequate or inequitable, charges for inspection may be based on the time consumed by the inspector in connection with such inspections computed at the rate of not to exceed $2.50 per hour, or the charges may be based upon the number of pounds or number of containers in the lot inspected, provided such charges are in substantial conformity with the hourly or carload rate.

This amendment shall become effective on August 1, 1945.

Supp., § 53.41 (a)) are hereby amended to read as follows:

APPLICATION AND COMMITMENT

§ 532.1 *Information for preliminary examination.* (a) Information required for the examination of a Rental Housing Project under section 207 shall be submitted in the form of an application for mortgage insurance by an approved mortgagee and by the sponsors of such project through the local Federal Housing Administration office, on approved FHA Application Form (executed in triplicate). No application will be considered unless the exhibits called for by such form are furnished and a fee of one dollar and fifty cents ($1.50) per thousand of the face amount of the mortgage loan applied for (referred to as "Application Fee") is paid.

(b) A further sum (referred to as "commitment fee") which when added to the "application fee" will aggregate three dollars ($3.00) per thousand of the face amount of the mortgage loan set forth in the commitment shall be paid within fifteen days from delivery of the commitment, otherwise the commitment will be null and void unless extended in writing by the Commissioner.

(c) Upon application for an increase in the amount of an existing commitment, an additional application fee of one dollar and fifty cents ($1.50) per thousand dollars shall be paid based upon the amount of the increase requested. Any increase in the amount of a commitment shall be subject to the payment of an additional commitment fee which, when added to the additional application fee will aggregate three dollars ($3.00) per thousand of the amount of the increase. If the amount of the insured mortgage is increased after insurance either by amendment or by the substitution of a new insured mortgage, the fees herein provided for shall be based upon the amount of such increase.

(d) If the application is rejected prior to an estimate of cost by the Commissioner, the application fee will be returned to the applicant. Subsequent to such estimate of cost the fee paid will not be returned.

§ 532.2 *Issuance of commitment.* (a) Upon approval of an application a commitment will be issued setting forth the terms and conditions upon which the mortgage will be insured, including special requirements applicable to the project and requiring the submission in final form within a time specified of all appropriate documents, drawings, plans, specifications, estimates, and other instruments evidencing full compliance satisfactory to the Commissioner with this part and with such terms and conditions.

(b) Such commitment may be on a form providing for advances of mortgage money during construction and the insurance of such advances as made, or it may be on a form providing for the insurance of the mortgage after completion of the improvements.

(c) No commitment shall be valid unless signed by the Commissioner or his agent authorized for that purpose, and shall be effective for a stated period, not in excess of 120 days, but may be renewed in such manner as the Commissioner may from time to time specify.

(d) In the case of a Public Housing Project, the fee to be paid under § 532.1 shall be fixed by the Commissioner, but shall not exceed $3.00 per thousand of the original face amount of the mortgage.

ELIGIBLE MORTGAGES

§ 532.3 *Mortgage forms.* The mortgage must be executed upon a printed form approved by the Commissioner for use in the jurisdiction in which the property covered by the mortgage is situated, by a mortgagor with the qualifications hereinafter set forth in §§ 532.14 and 532.15, must be a first lien upon property that conforms with the property standards prescribed by the Commissioner, and the mortgagee must be obligated, as a part of the mortgage transaction, to disburse the entire principal amount of the mortgage to, or for the account of, the mortgagor in conformity with the terms of the commitment. Any changes in the printed form desired by the mortgagor and mortgagee must receive prior written approval of the Commissioner.

§ 532.4 *Eligibility for insurance.* In order to be eligible for insurance under this part, a mortgage shall create a first lien securing a principal obligation not in excess of $5,000,000, and such part thereof as may be attributable to dwelling use shall not exceed $1,350 per room, depending upon the location of the project and local building costs and rental conditions. The principal obligation of such mortgage shall not exceed eighty per centum (80%) of the amount which the Commissioner estimates will be the value of the property or project when the proposed improvements are completed; *Provided*, That such mortgage shall not in any event exceed the amount which the Commissioner estimates will be the cost of the completed physical improvements on the property or project, exclusive of the following: Public utilities except lead-ins from abutting streets to the project; public streets except approaches from abutting streets to private streets in the project; abutting sidewalks and curbing outside the project site; real estate taxes, interest on the mortgage, hazard insurance, owner's liability insurance, and other insurance customarily payable by the mortgagor; organization and legal expenses; financing charges; and miscellaneous charges during or incidental to construction and customarily payable by the mortgagor, including but not limited to Federal Housing Administration appraisal and inspection fees and mortgage insurance premium, title and recording expenses, and cost of surveys and contour maps.

§ 532.5 *Maturity.* The mortgage shall have a maturity satisfactory to the Commissioner, depending upon the risk involved and the general character of the project, and shall contain complete amortization or sinking fund provisions satisfactory to the Commissioner.

§ 532.6 *Payment requirements.* The mortgage shall provide for monthly payments on the first day of each month by the mortgagor to the mortgagee on account of interest and principal. Such monthly payments may be on a level annuity or declining annuity basis as agreed upon by the mortgagor and mortgagee. Where the insured mortgage does not exceed $200,000, payments on account of principal shall begin not later than the first day of the twelfth month following execution of the mortgage. Where the mortgage does exceed $200,000, such principal payments shall begin not later than the first day of the twenty-fourth month following execution of the mortgage. In cases where a commitment to insure upon completion has been issued, the respective dates for commencement of amortization will be figured on the same basis from the date the commitment is issued.

§ 532.7 *Interest rate.* The mortgage shall bear interest, not exceeding four per centum (4%) per annum, as may be agreed upon between the mortgagor and mortgagee. All charges made in connection with the mortgage transaction shall be subject to the approval of the Commissioner.

§ 532.8 *Release provisions.* The mortgage shall cover the entire property included in the housing project. The mortgage may include provisions for the release from the lien thereof of any of the improvements and the land upon which they are located upon conditions to be determined by the Commissioner at the time of the release. Where the mortgage does not contain such release provisions no property shall, except with the consent of the mortgagee and the Commissioner, be released from the lien thereof so long as the mortgage insurance is in force.

§ 532.9 *Covenant against liens.* The mortgage shall, except in the case of a Public Housing Project, contain a covenant against the creation by the mortgagor of liens against the property inferior to the lien of the mortgage.

§ 532.10 *Covenants for fire insurance.* The mortgage shall contain a covenant binding the mortgagor to keep the property insured by a standard policy or policies against fire and such other hazards as the Commissioner, upon the insurance of the mortgage, may stipulate, in an amount which will comply with the coinsurance clause applicable to the location and character of the property, but not less than eighty percent (80%) of the actual cash value of the insurable improvements and equipment of the project. The initial coverage shall be in an amount estimated by the Commissioner at the time of completion of the entire project or units thereof. The policies evidencing such insurance shall have attached thereto a standard mortgagee clause making loss payable to the mortgagee and the Commissioner, as interests may appear.

§ 532.11 *Soundness of project.* No mortgage shall be accepted for insurance unless the Commissioner finds that the property or project with respect to which the mortgage is executed is economically sound.

§ 532.12 *Accumulation of next premium.* The mortgage shall provide for payments by the mortgagor to the mortgagee on each interest payment date of an amount sufficient to accumulate in the hands of the mortgagee one payment period prior to its due date, the next annual mortgage insurance premium payable by the mortgagee to the Commissioner. Such payments shall continue only so long as the contract of insurance shall remain in effect. The mortgage shall provide that upon the payment of the mortgage before maturity, the mortgagor shall pay the adjusted premium charge referred to in § 533.3 of this chapter.

The mortgage shall also provide for such equal monthly payments by the mortgagor to the mortgagee as will amortize the ground rents, if any, and the estimated amount of all taxes, water rates and special assessments, if any, and fire and other hazard insurance premiums, within a period ending one month prior to the dates on which the same become delinquent. The mortgage shall further provide that such payments shall be held by the mortgagee, for the purpose of paying such ground rents, taxes, water rates and assessments, and insurance premiums, before the same become delinquent. The mortgage must also make provision for adjustments in case the estimated amount of such taxes, water rates and assessments, and insurance premiums shall prove to be more, or less, than the actual amount thereof so paid by the mortgagor.

§ 532.13 *Application of payments.* (a) All monthly payments to be made by the mortgagor to the mortgagee shall be added together and the aggregate amount thereof shall be paid by the mortgagor upon each monthly payment date in a single payment. The mortgagee shall apply the same to the following items in the order set forth:

(1) Premium charges under the contract of insurance;

(2) Ground rents, taxes, special assessments and fire and other hazard insurance premiums;

(3) Interest on the mortgage;

(4) Amortization of the principal of the mortgage.

Any deficiency in the amount of any such aggregate monthly payment shall constitute an event of default under the mortgage unless paid within thirty days from the date due.

(b) The mortgagee may include in the mortgage a provision for such additional charge in the event of prepayment of principal as may be agreed upon between the mortgagor and mortgagee: *Provided, however*, That the mortgagor must be permitted to prepay up to fifteen per centum (15%) of the original principal amount of the mortgage in any one calendar year without any such additional charge.

(c) In the event that bonds are to be issued as a part of the insured mortgage transaction, all arrangements with respect to the issuance and sale of such bonds shall be subject to approval by the Commissioner.

CLASSIFICATION OF ELIGIBLE MORTGAGORS

§ 532.14 *Private mortgagors.* In order to be eligible for insurance as a mortgagor of a Rental Housing Project under section 207 such mortgagor must be a private corporation, association, cooperative society which is a legal agent of the owner-occupants, or trust (referred to in this part and in Part 533 of this chapter as "mortgagor", "corporation", or "mortgagor corporation"), formed or created, with the approval of the Commissioner, for the purpose of providing housing for rent or sale, and possessing powers necessary therefor and incidental thereto, which corporation, association, cooperative society, or trust, is regulated or restricted by the Commissioner as to rents or sales, charges, capital structure, rate of return, and methods of operation. Such regulation or restriction shall remain in effect until such time as the mortgage insurance contract terminates without obligation upon the Commissioner to issue debentures as a result of such termination. So long as such contract of insurance is in effect, the corporation, association, cooperative society, or trust shall engage in no business other than the construction and operation of a Rental Housing Project; or

§ 532.15 *Public Mortgagors.* A Federal or State instrumentality, a municipal corporate instrumentality of one or more States, or a limited dividend corporation formed under and restricted by Federal or State housing laws as to rents, charges, capital structure, rate of return, or methods of operation (projects of such mortgagors are herein referred to as "Public Housing Projects").

SUPERVISION OF MORTGAGORS

§ 532.16 *In general.* (a) In the case of an eligible mortgagor described in § 532.15, the Commissioner is not required under the act to regulate or restrict the mortgagor. Such mortgagor, however, must have initial funds which may be considered in lieu of the equity required of other mortgagors. Such funds (which may be in the form of Government loans, grants, or subsidies, or in other form) if sufficient in amount will be considered satisfactory provided they do not create a lien against the property prior to that of the insured mortgage. Liens inferior to the lien of the insured mortgage may be allowed against properties of such mortgagors.

(b) In all other cases a mortgagor must establish that after final disbursement of the loan the property covered by the mortgage is free and clear of all liens other than such mortgage, and that there will not be outstanding any other unpaid obligation contracted in connection with the mortgage transaction or the purchase of the mortgaged property, except obligations which are secured by property or collateral owned by the mortgagor independently of the mortgaged property.

(c) Supervision of such other mortgagors is required by the provision of section 207 of the act that such mortgagors shall be regulated or restricted by the Commissioner. Such regulation or restriction will be set forth in the certificate of incorporation or other instrument under which the mortgagor is created (hereinafter referred to as the "charter") and will be made effective through the issuance of certain shares of special stock (or other evidence of a beneficial interest in the mortgagor) which stock or interest will acquire majority voting rights in the event of default under the mortgage or violation of

a provision of the charter, but only for a period coexistent with the duration of such default or violation. Such special stock or interest issued to the Commissioner, his nominee or nominees and/or Federal Housing Administration shall be in sufficient amount to constitute under the laws of the particular State a valid special class of stock or interest and shall be issued in consideration of the payment by the Commissioner of not exceeding in the aggregate $100. Such stock shall be represented by certificates issued in the name of the Commissioner, and/or in the name of his nominee or nominees, and/or in the name of the Federal Housing Administration, as the Commissioner shall require. Upon the termination of all obligations of the Commissioner under his contract of mortgage insurance or any succeeding contract or agreement covering the mortgage obligation, including the obligation upon the Commissioner to issue debentures as a result of such termination, all regulation and restriction of the mortgagor shall cease. When the right of the Commissioner to regulate or restrict the mortgagor shall so terminate, the shares of special stock or other evidence of beneficial interest shall be surrendered by the Commissioner upon reimbursement of his payments therefor plus accrued dividends, if any, thereon.

§ 532.17 *Required supervision of private mortgagors.* The following are the items which will be regulated or restricted in the charter to the extent indicated, except in the case of mortgagors of public housing projects:

(a) *Capital structure.* (1) The sponsor's equity in a project, for dividend purposes, shall mean, (i) the Commissioner's estimate of the value of the project upon completion less the face amount of the mortgage plus (ii) required cash working capital. Such equity when contributed shall be in the form of unencumbered property, and such cash and services as the Commissioner shall require.

(2) Such number of shares of capital stock, either with or without par value, in the case of a corporation, or such appropriate evidences of interest, in the case of an association, a cooperative society, or a trust, may be issued as sponsors may deem appropriate. Such stock or interest, together with paid in surplus, if any, shall represent such equity. Additional stock or evidences of interest may be authorized but the charter shall provide that it shall not be issued except with the approval of the Commissioner. No stock or interest shall be redeemed, purchased, or paid off by the mortgagor during the period in which the mortgage insurance is in force, except with the approval of the Commissioner.

(3) The shares of stock or interest issued to the Commissioner shall be in sufficient amount to constitute, under the laws of the particular jurisdiction, a valid special class of stock or interest and shall be issued in consideration of the payment by the Commissioner of not exceeding $100.

(b) *Rate of return.* Regular dividends or distribution of income may be declared or paid only as of the end of a semiannual or annual fiscal period. Dividends or distribution of income may be declared and paid only from earned income legally available for dividends or distribution of income in excess of all operating expenses, taxes, assessments, fixed charges, mortgage insurance premiums, required allocations to the Fund for Replacements, and interest and principal on the insured mortgage including principal payments permitted to be passed by reason of prepayments theretofore made. No regular dividends or distribution of income may be declared or paid for any fiscal year in excess of six per centum (6%) per annum of the equity as valued by the Commissioner but may be cumulative from year to year, and the dollar amount of such dividends or distribution of income shall be stated in the charter: *Provided*, That one-half of such earned income in excess of regular dividends or distribution of income may be declared or paid as extra dividends or distribution of income for a fiscal year as of the end of such year. The charter will make provision for dividends or distribution of income as provided herein and will also provide that in any event one-half of earned income in excess of regular dividends or distribution of income shall be applied annually in reduction of principal of the insured mortgage.

(c) *Control of funds during construction.* (1) From its capital funds the mortgagor shall deposit with the mortgagee or, in a depositary satisfactory to the mortgagee and under control of the mortgagee, an amount equivalent to not less than three per centum (3%) of the original principal amount of the mortgage, for the purpose of meeting the cost of equipping and renting the project subsequent to completion of construction of the entire project or units thereof and, during the course of construction, for allocation by the mortgagee to the accruals for taxes, mortgage insurance premium, hazard insurance premiums and assessments required by the terms of the mortgage as outlined in § 532.13. Any balance of said fund not used or allocated for the above purposes shall be returned to the mortgagor upon completion of construction of the entire project to the satisfaction of the Commissioner.

(2) The mortgagor must establish in a manner satisfactory to the Commissioner that, in addition to the proceeds of the insured mortgage, the mortgagor has funds sufficient to assure completion of construction of the project and to pay all carrying charges, financing and organization expenses incidental to the construction of the project which funds shall be deposited with and held by the mortgagee in a special account or by an acceptable depository designated by the mortgagee under an appropriate agreement approved by the Commissioner which will require all such construction funds to be expended for work and material on the physical improvements prior to the advance of any mortgage money and for other charges and expenses to be paid when due.

(3) The Commissioner may require the deposit with the mortgagee or with an acceptable trustee or escrow agent designated by the mortgagee under an appropriate agreement of such cash as may be required for the completion of off-site public utilities and streets.

(4) The Commissioner, the mortgagor and the mortgagee shall, prior to the insurance of the mortgage, agree with respect to the manner and conditions under which advances (if any) during construction are to be made by the mortgagee and approved for insurance by the Commissioner.

(5) Such agreement shall require the mortgagee to notify the Commissioner, through the insuring office having jurisdiction over the territory in which the property is situated, in writing, on an application form prescribed by Commissioner, of the proposed date and the amount of the advance to be made, and the Commissioner shall deliver to the mortgagee within a reasonable time from the date of such notice a certificate executed on behalf of the Commissioner on a form prescribed by him setting forth the amount approved for insurance or advising the mortgagee of the Commissioner's nonapproval and setting forth the reasons therefor.

(6) Such agreement shall be set forth on a form prescribed by the Commissioner, shall contain such additional terms, conditions, and provisions as the Commissioner shall in the particular case prescribe or approve, and when properly executed by the Commissioner and the mortgagee, shall constitute a part of the mortgage insurance contract. When all advances of mortgage money approved for insurance by the Commissioner have been made, the original credit instrument will be finally endorsed for insurance for the total of such advances as provided for in the Administrative Regulations.

(7) No advance under any mortgage shall be eligible for insurance unless there is filed with the application for such advance a certificate or certificates in the form required by the Commissioner, certifying that the laborers and mechanics employed in the construction of the dwelling or dwellings or housing project involved have been paid not less than the wages prevailing in the locality in which the work was performed for the corresponding classes of laborers and mechanics employed on construction of a similar character, as determined by the Secretary of Labor prior to the beginning of construction and after the date of filing of the application for insurance.

(8) Assurance for the completion of a project shall be either (i) the bond of a surety company satisfactory to the Commissioner on the standard form prescribed by the Commissioner in the penal sum of at least ten per centum (10%) of the cost of construction of the project, (ii) a bond, in at least the same amount, of a surety satisfactory to the Commissioner written in the standard A. I. A. form of performance bond with the mortgagor and the mortgagee as joint-obligees, or (iii) a deposit with the mortgagee, or with a depository satisfactory to the mortgagee and the Commissioner, of cash or securities of, or fully guaranteed as to principal and interest by, the United States of America, under a Completion Assurance Agreement prescribed by the Commissioner, of an amount at least equal to ten per centum (10%) of the cost of construction of the project, or (iv) may be in such other form as may be recommended by the mortgagee and approved in writing by the Commissioner.

(d) *Rents and charges.* Except as hereinafter provided:

(1) No charge shall be made by the mortgagor corporation for the accommodations offered by the project in excess of a rental schedule to be filed with the Commissioner and approved by him or his duly constituted representative prior to the opening of the project for rental, which schedule shall not exceed, except with the consent of the Commissioner, a maximum average rental fixed prior to the insurance of the mortgage. In establishing such maximum and in passing upon applications for changes, consideration will be given the following and similar factors:

(i) Rental income necessary to maintain the economic soundness of the project;

(ii) Relation of the proposed rentals to those currently being paid in the given community for similar accommodations.

(2) The established maximum rental shall be the maximum authorized charge against any tenant for the accommodations offered exclusive of telephone, gas, electric, and refrigeration facilities. Charges in addition to such maximum rental may be made against a tenant for telephone, gas, electric, refrigeration, and other facilities and privileges furnished by the mortgagor, but only with the approval of the Commissioner.

(3) So long as the maximum rents are fixed and regulated by another agency of the United States Government, the rental established by such agency of the United States will be accepted by the Commissioner as an approved rent schedule under the provisions of subparagraphs (1) and (2) of this paragraph. Upon the expiration of the authority of any such agency to fix maximum rentals, the established maximum rental schedule then in force with respect to the project shall be the established maximum rental schedule within the provisions of subparagraphs (1) and (2) of this paragraph, and shall not thereafter be changed except upon approval of the Commissioner.

(e) *Methods of operation.* (1) No compensation shall be paid by the corporation except for necessary services and except at such rate as is fair and reasonable in the locality for similar services, nor, except with the prior written approval of the Commissioner, shall any compensation be paid by the corporation to its officers, directors, or stockholders, or to any person, or corporation for supervisory or managerial services, nor shall any compensation be paid by the corporation to any employee in excess of two thousand dollars ($2,000) per annum, except with such prior written approval. No officer, director, stockholder, agent, or employee of the corporation shall in any manner become indebted to the corporation.

(2) The corporation shall maintain its project, the grounds, buildings, and equipment appurtenant thereto, in good repair and in such condition as will preserve the health and safety of its tenants.

(3) A fund for replacements shall be accumulated and maintained with the mortgagee so long as the mortgage insurance is in force, and the amount and type of such fund and the conditions under which it shall be accumulated, replenished and used, shall be specified in the charter. Failure to comply with the terms of this requirement may be considered by the Commissioner as a default under the terms of the charter.

(4) The corporation, its property, equipment, buildings, plans, offices, apparatus, devices, books, contracts, records, documents, and papers shall be subject to inspection and examination by the Commissioner or his duly authorized agent at all reasonable times.

(5) The books and accounts of the corporation shall be kept in accordance with the uniform system of accounting prescribed by the Commissioner. The corporation shall file with the Commissioner the following reports verified by the signature of such officers of the corporation as the Commissioner may designate and in such form as prescribed by the Commissioner:

(i) Monthly occupancy reports, when required by the Commissioner;

(ii) A semiannual financial statement within sixty (60) days after the declaration of any semiannual dividends;

(iii) Annual reports prepared by a certified public accountant, to be filed within sixty (60) days after the end of each fiscal year; and

(iv) Specific answers to questions upon which information is desired from time to time relative to the operation and condition of the property and the status of the insured mortgage;

(v) Copies of minutes of stockholders' meetings certified to by the Secretary of the Corporation.

ELIGIBLE MORTGAGEES

§ 532.18 *Classification.* (a) The following may become the mortgagee of a mortgage insured under section 207 of the National Housing Act:

(1) Any institution or organization which is approved as a mortgagee under the National Housing Act; and

(2) Any other chartered institution or permanent organization having succession, upon its approval by the Commissioner for a particular transaction.

(b) The mortgagee must demonstrate to the satisfaction of the Commissioner its ability to make the mortgage and service the same. The Commissioner reserves the right to refuse to approve any institution or organization as the mortgagee of a particular mortgage or to withhold any such approval pending compliance by such institution or organization, with additional conditions which in the discretion of the Commissioner are required in the particular case.

(c) Approval of a mortgagee may be withdrawn by notice from the Commissioner for cause sufficient to the Commissioner, but no withdrawal will in any way affect the insurance on mortgages theretofore accepted for insurance.

§ 532.19 *Required inspections.* As a condition precedent to insurance, the mortgagee must agree that so long as the mortgage is an insured mortgage, it will ascertain the general physical condition of the mortgaged property in each calendar year commencing with the calendar year following completion of the project and will furnish the Commissioner with a copy of its inspection report. If at any time it be determined by the mortgagee that, in addition to ordinary wear and tear, the mortgaged property is being subjected to permanent or substantial injury, through unreasonable use, abuse or neglect, the mortgagee will, unless adequate provision satisfactory to a prudent lender is made for the prompt restoration of the mortgaged property, forthwith take such action as may be available to it under the mortgage and appropriate to the particular case, for the protection and preservation of the mortgaged property and the income therefrom, and the submission of an application for insurance shall be evidence of such agreement.

ELIGIBLE PROPERTIES

§ 532.20 *Eligibility of property.* (a) In order for property to be eligible as the subject of an insured mortgage, such property must be held in fee simple, or consist of the interest held under a leasehold for not less than ninety-nine (99) years which is renewable, or under a lease having not less than fifty (50) years to run from the date the mortgage is executed. Such mortgage may also cover additional property approved by the Commissioner.

(b) The property constituting security for the mortgage must be held by an eligible mortgagor as herein defined and must at the time the mortgage is insured be free and clear of all liens other than that of such mortgage except as provided in § 532.16 (a) in connection with public housing projects.

§ 532.21 *Development of property.* At the time the mortgage is insured:

(a) The mortgagor shall be obligated to construct and complete new housing accommodations on the mortgaged property designed principally for residential use, conforming to standards satisfactory to the Commissioner, and consisting of not less than twelve (12) rentable dwelling units on one site and may be detached, semidetached, or row houses, or multifamily structures.

(b) There shall be located on the mortgaged property a building or buildings, which, upon completion of proposed improvements, shall provide housing accommodations designed principally for residential use, conforming to standards satisfactory to the Commissioner, and containing at least twelve (12) rentable dwelling units preferably but not necessarily contiguous and so located in relation to one another as to effect a substantial improvement of housing standards and conditions in the neighborhood.

(c) Such dwelling and other improvements, if any, must not violate any zoning or deed restrictions applicable to the project site and must comply with all

applicable building and other governmental regulations.

TITLE

§ 532.22 *Eligibility of title.* In order for the mortgaged property to be eligible for insurance, the Commissioner must determine that marketable title thereto is vested in the mortgagor as of the date the mortgage is filed for record. The title evidence will be examined by the Commissioner and the original endorsement of the credit instrument for insurance will be evidence of its acceptability.

§ 532.23 *Title evidence.* Upon insurance of the mortgage, the mortgagee, without expense to the Commissioner, shall furnish to the Commissioner a survey satisfactory to him and a policy of title insurance as provided in paragraph (a) of this section, or, if the mortgagee is unable to furnish such policy for reasons satisfactory to the Commissioner, the mortgagee, without expense to the Commissioner, shall furnish such evidence of title as provided in paragraphs (b), (c), or (d) of this section, as the Commissioner may require.

(a) A policy of title insurance with respect to such mortgage, issued by a company satisfactory to the Commissioner. Such policy shall comply with the "L. I. C. Standard Mortgagee Form", or the "A. T. A. Standard Mortgagee Form", or such other form as may be approved by the Commissioner; shall be payable to the mortgagee and the Commissioner as their respective interests may appear; and shall become an owner's policy, running to the mortgagee as owner upon the acquisition of the property by the mortgagee in extinguishment of the debt through foreclosure or by other means as provided in § 533.5 (b) of this chapter, and to the Commissioner as owner upon the acquisition of the property by him pursuant to the mortgage insurance contract.

(b) An abstract of title satisfactory to the Commissioner, prepared by an abstract company or individual engaged in the business of preparing abstracts of title, accompanied by a legal opinion satisfactory to the Commissioner, as to the quality of such title, signed by an attorney at law experienced in the examination of title.

(c) A Torrens or similar title certificate.

(d) Evidence of title conforming to the standards of a supervising branch of the Government of the United States of America, or of any State or Territory thereof.

§ 532.24 *Effective date.* This part shall be effective as to all mortgages with respect to which a commitment to insure shall be issued on or after the date hereof.

(a) If the date of the first principal payment is more than one year following the date of such initial insurance endorsement the mortgages, upon the anniversary of such insurance date, shall pay a second premium equal to one-half of one per centum (½ of 1%) of the original face amount of the mortgage. On the date of the first principal payment the mortgagee shall pay a third premium equal to one-half of one per centum (½ of 1%) of the average outstanding principal obligation of the mortgage for the following year which shall be adjusted so as to accord with such date and so that the aggregate of the said three premiums shall equal the sum of (1) one per centum (1%) of the average outstanding principal obligation of the mortgage for the year following the date of initial insurance endorsement and (2) one-half of one per centum (½ of 1%) per annum of the average outstanding principal obligation of the mortgage for the period from the first anniversary of the date of initial insurance endorsement to one year following the date of the first principal payment.

(b) If the date of the first principal payment is one year or less than one year following the date of such initial insurance endorsement the mortgages, upon such first principal payment date, shall pay a second premium equal to one-half of one per centum (½ of 1%) of the average outstanding principal obligation of the mortgage for the following year which shall be adjusted so as to accord with such date and so that the aggregate of the said two premiums shall equal the sum of (1) one per centum (1%) per annum of the average outstanding principal obligation of the mortgage for the period from the date of initial insurance endorsement to the date of first principal payment and (2) one-half of one per centum (½ of 1%) of the average outstanding principal obligation of the mortgage for the year following the date of the first principal payment.

(c) Where the credit instrument is initially and finally endorsed for insurance pursuant to a Commitment to Insure Upon Completion, the mortgagee on the date of the first principal payment shall pay a second premium equal to one-half of one per centum (½ of 1%) of the average outstanding principal obligation of the mortgage for the year following such first principal payment date which shall be adjusted so as to accord with such date and so that the aggregate of the said two premiums shall equal the sum of one-half of one per centum (½ of 1%) per annum of the average outstanding principal obligation of the mortgage for the period from the date of the insurance endorsement to one year following the date of the first principal payment.

(d) Until the mortgage is paid in full or until claim under the contract of insurance is made or until the contract of insurance shall terminate the mortgage, on each anniversary of the date of the first principal payment, shall pay an annual mortgage insurance premium equal to one-half of one per centum (½ of 1%) of the average outstanding principal obligation of the mortgage for the year following the date on which such premium becomes payable.

(e) The premiums payable on and after the date of the first principal payment shall be calculated in accordance with the amortization provisions without taking into account delinquent payments or prepayments.

(f) Premiums shall be payable in cash or in debentures issued by the Commissioner under Title II of the act at par plus accrued interest. All premiums are payable in advance and no refund can be made of any portion thereof except as hereinafter provided in § 533.3 (f).

§ 533.3 *Adjusted premium charge.* In the event that the principal obligation of any mortgage accepted for insurance is paid in full prior to maturity, the mortgagee shall within thirty (30) days thereafter notify the Commissioner of the date of prepayment and shall collect from the mortgagor and pay to the Commissioner in the case of a mortgage prepaid within five years from the date of the initial endorsement for insurance, an adjusted premium charge, in the nature of a prepayment premium, of two per centum (2%) of the original face amount of the prepaid mortgage, and in the event the mortgage is prepaid after five years from the date of initial endorsement for insurance, an adjusted premium charge of one per centum (1%) of the original face amount of the prepaid mortgage, except that if at the time of any such prepayment there is placed on the mortgaged property a new insured mortgage in an amount less than the original principal amount of the mortgage, the adjusted premium charge provided above shall be based upon the difference between such amounts.

In no event shall the adjusted premium charge exceed the aggregate amount of premium charges which would have been payable if the mortgage had continued to be insured until maturity.

No adjusted premium charge shall be due the Commissioner in the following cases:

(a) Where at the time of such prepayment there is placed on the mortgaged property a new insured mortgage for an amount equal to or greater than the original principal amount of the prepaid mortgage; or

(b) Where the final maturity specified in the mortgage is accelerated solely by reason of partial prepayments made by the mortgagor which do not exceed in any one calendar year fifteen per centum (15%) of the original face amount of the mortgage; or

(c) Where the final maturity specified in the mortgage is accelerated solely by reason of payments to principal to compensate for (1) damage to the mortgaged property, or (2) a release of a part of such property; if approved by the Commissioner; or

(d) Where payment in full is made of a delinquent mortgage on which foreclosure proceedings have been commenced, or for the purpose of avoiding foreclosure, if the Commissioner, in his discretion, agrees in writing to waive the payment thereof; or

(e) Where, at the time of such prepayment, there is placed on the property a new insured mortgage less than the original principal amount of the prepaid mortgage: *Provided,* That the Commissioner finds that the collection of such charge would be inequitable under the particular circumstances of the transaction.

Upon such prepayment the contract of insurance shall terminate.

(f) If at the time of prepayment a new insured mortgage is placed on the same property, the Commissioner will refund to the mortgagee for the account of the mortgagor an amount equal to the prorata portion of the current annual mortgage insurance premium theretofore paid, which is applicable to the portion of the year subsequent to such prepayment.

INSURANCE ENDORSEMENT

§ 533.4 *Form of endorsement.* (a) Upon compliance satisfactory to the Commissioner with the terms and conditions of his commitment to insure, the Commissioner shall endorse the original credit instrument in form as follows:

(b) The mortgage shall be an insured mortgage from the date of such endorsement. The Commissioner and the mortgagee shall thereafter be bound by this part with the same force and to the same extent as if a separate contract had been executed relating to the insured mortgage, including the provisions of this part and of the National Housing Act.

(c) After all advances under the mortgage have been made with the approval of the Commissioner, the Commissioner shall, upon presentation of the original credit instrument, make a notation below the insurance endorsement in form as follows:

RIGHTS AND DUTIES OF A MORTGAGEE UNDER THE CONTRACT OF INSURANCE

§ 533.5 *Benefits of Insurance.* The mortgagee shall be entitled to receive the benefits of the insurance, at its option, either as provided in paragraph (a) or paragraph (b) of this section.

(a) *By assignment.* If the mortgagor fails to make any payment due under or provided to be paid by the terms of the mortgage and such failure continues for a period of thirty (30) days, the mortgage shall be considered in default, and the mortgagee shall, within thirty (30) days thereafter, give notice in writing to the Commissioner of such default.

At any time within thirty (30) days after the date of such notice, or within such further period as may be agreed upon by the Commissioner in writing, the mortgagee shall, in such manner as the Commissioner may require, assign, transfer, and deliver to the Commissioner the original credit instrument and the mortgage securing the same, without recourse or warranty, except that the mortgagee must warrant that no act or omission of the mortgagee has impaired the validity and priority of the mortgage, that the mortgage is prior to all mechanic's and materialmen's liens filed of record subsequent to the recording of such mortgage regardless of whether such liens attached prior to such recording date, and prior to all liens and encumbrances which may have attached or defects which may have arisen subsequent to the recording of such mortgage except such liens or other matters as may be approved by the Commissioner, that the amount stated in the instrument of assignment is actually due and owing under the mortgage, that there are no offsets or counterclaims thereto, and that the mortgagee has a good right to assign the mortgage and other items enumerated below:

(1) All rights and interest arising under the mortgage so in default;

(2) All claims of the mortgagee against the mortgagor or others, arising out of the mortgage transaction;

(3) All policies of title or other insurance or surety bonds or other guaranties, and any and all claims thereunder;

(4) Any balance of the mortgage loan not advanced to the mortgagor;

(5) Any cash or property held by the mortgagee or its agents or to which it is entitled, including deposits made for the account of the mortgagor and which have not been applied in reduction of the principal of the mortgage indebtedness; and

(6) All records, documents, books, papers, and accounts relating to the mortgage transaction.

Nothing contained in this paragraph shall be so construed as to prevent the mortgagee from taking action at a later date than herein specified, provided the Commissioner agrees thereto in writing. The mortgagee, prior to the assignment of the mortgage to the Commissioner, shall offer evidence satisfactory to him that the original title coverage has been extended to include all advances of mortgage money made up to the date of assignment showing title satisfactory to the Commissioner as defined in § 533.8.

(b) *By conveyance of property.* If the mortgagor fails to make any payment to the mortgagee required by the mortgage, or fails to perform any other covenant or obligation under the mortgage, and such failure continues for the period of grace, if any, set forth in the mortgage, the mortgage shall be considered in default, and the mortgagee, within a period of thirty (30) days after the occurrence of a default arising on account of such failure to make any such payment or within thirty (30) days after the mortgagee shall have knowledge of the occurrence of a default arising on account of such failure to perform any other covenant or obligation under the mortgage, shall give notice in writing to the Com-

missioner of such default. At any time within a period of thirty (30) days after the date of such notice or within such latter time as may be agreed upon by the Commissioner in writing, the mortgagee, at its election, shall either:

(1) With, and subject to, the consent of the Commissioner, acquire by means other than foreclosure of the mortgage, possession of, and title to, the mortgaged property;

(2) Institute proceedings for the foreclosure of the mortgage and either obtain possession of the mortgaged property and the income therefrom through the voluntary surrender thereof by the mortgagor or institute, and prosecute with reasonable diligence, proceedings for the appointment of a receiver of the mortgaged property and the income therefrom or proceed to exercise such other rights and remedies as may be available to it for the protection and preservation of the mortgaged property and to obtain the income therefrom under the mortgage and the law of the particular jurisdiction: *Provided*, That if the laws of the State in which the mortgaged property is situated do not permit the institution of such proceedings within such period of time, the mortgagee shall institute such proceedings within thirty (30) days after the expiration of the time during which the institution of such proceedings is prohibited by such laws. Nothing contained in this paragraph shall be so construed as to require the mortgagee to take any action when the necessity therefor has been waived in writing by the Commissioner nor to prevent the mortgagee from taking action at a later date than herein specified provided the Commissioner so agrees in writing. The mortgagee shall promptly give notice in writing to the Commissioner of the institution of foreclosure proceedings under this subsection and shall exercise reasonable diligence in prosecuting such proceedings to completion. If after default and prior to the completion of foreclosure proceedings the mortgagor shall pay to the mortgagee all payments in default and such expenses as the mortgagee shall have incurred in connection with the foreclosure proceedings, notice thereof shall be given to the Commissioner by the mortgagee, and the insurance shall continue as if such default had not occurred.

§ 533.6 *Computation of benefits received by assignment.* If the mortgagee elects to proceed under, and does proceed under and in accordance with, the provisions of § 533.5 (a), and furnishes evidence satisfactory to the Commissioner that there are no past due and unpaid ground rents, general taxes, or special assessments, and furnishes the warranties described in said paragraph, the Commissioner shall deliver to the mortgagee:

(a) Debentures of the Housing Insurance Fund as set forth in section 207 of the act having a total face value equal to the value of the mortgage as defined in section 207 (g) of the act, which value shall be determined by adding to the original principal of the mortgage which was unpaid on the date of default the amount the mortgagee may have paid for (1) taxes, special assessments, and water rates which are liens prior to the mortgage; (2) insurance on the property; and (3) reasonable expenses for the completion and preservation of the property; less the sum of (i) an amount equivalent to two per centum (2%) of the amount of the mortgage advanced to the mortgagor and unpaid; (ii) any amount received on account of the mortgage after such date; and (iii) any net income received by the mortgagee from the property after such date. Such debentures shall be issued as of the date of such assignment transfer and delivery, bearing interest from such date at the rate of two and three-quarters (2¾%) per centum per annum, payable semi-annually on the first day of January and the first day of July of each year, shall be registered as to principal and interest and all or any such debentures may be redeemed at the option of the Commissioner with the approval of the Secretary of the Treasury at par and accrued interest on any interest payment date on three months' notice of redemption given in such manner as the Commissioner shall prescribe. Such debentures shall be issued in multiples of $50.00 and any difference not in excess of $50.00 between the amount of debentures to which the mortgagee is otherwise entitled hereunder and the aggregate face value of the debentures issued shall be paid in cash by the Commissioner to the mortgagee.

(b) A certificate of claim in accordance with section 207 (h) of the act which shall become payable, if at all, upon the sale and final liquidation of the interest of the Commissioner in such mortgage or such property, in accordance with section 207 (h) of the act. This certificate shall be for an amount which the Commissioner determines to be sufficient, when added to the face value of the debentures issued and the cash adjustment paid to the mortgagee, to equal the amount which the mortgagee would have received if, on the date of the assignment, transfer and delivery to the Commissioner provided for in § 533.5 (a), the mortgagor had extinguished the mortgage indebtedness by payment in full of all obligations under the mortgage. Such certificate of claim shall provide that there shall accrue to the holder of such certificate, with respect to the face amount of such certificate, an increment at the rate of three per centum (3%) per annum, which shall not be compounded. If any excess is realized from the mortgage, and all claims in connection therewith so assigned, transferred and delivered, and from the property covered by such mortgage and all claims in connection with such property, after deducting all expenses incurred by the Commissioner in handling, dealing with, acquiring title to, and disposing of such mortgage and property and in collecting such claims, such excess shall be applied in payment of the certificate of claim and any balance thereafter shall be paid to the mortgagor, as provided in section 207 (h) (1) of the act.

§ 533.7 *Computation of benefits received by conveyance.* If the mortgagee elects to proceed under, and does proceed under and in accordance with, the provisions of § 533.5 (b) and at any time within thirty (30) days (or such further time as may be allowed by the Commissioner in writing) after acquiring title to and possession of the mortgaged property in accordance with such paragraph (b), tenders to the Commissioner possession thereof and a deed thereto containing a covenant which warrants against acts of the mortgagee and of all parties claiming by, through, or under the mortgagee, together with a bill of sale covering all personal property to which the mortgagee is entitled by reason of the mortgage transaction, conveying title to such property satisfactory to the Commissioner, as provided in § 533.8, and assigns (without recourse or warranty) any and all claims which it has acquired in connection with the mortgage transaction and as a result of the foreclosure proceedings or other means by which it acquired such property, including but not limited to any claims on account of title insurance and fire or other hazard insurance, except such claims as may have been released with the prior approval of the Commissioner, the Commissioner shall promptly accept conveyance of such property and such assignments, notwithstanding that the buildings or improvements thereon shall be incomplete or may have been destroyed, damaged, or injured in whole or in part, and shall deliver to the mortgagee:

(a) Debentures of the housing insurance fund as set forth in section 204 of the act and dated as of the date foreclosure proceedings were instituted, or the property was otherwise acquired by the mortgagee after default in a principal amount equal to the principal of the mortgage advanced with the approval of the Commissioner and unpaid on either of such dates, plus the amount of all payments made by the mortgagee for (1) taxes, ground rents and water rates, which are liens prior to the mortgage; (2) special assessments which are noted on the application for insurance or become liens after the insurance of the mortgage; (3) insurance on the mortgaged property; and (4) any mortgage insurance premiums paid after either of such dates; less (i) any amount received on account of the mortgage after such date; and (ii) any amount received as rent or other income from the property, after deducting therefrom reasonable expenses incurred in handling the property, after either of such dates.

(b) A certificate of claim as defined in § 533.6 (b) except that it may include a reasonable sum for necessary expenses incurred by the mortgagee in connection with the foreclosure proceedings or the acquisition of the mortgaged property otherwise and the conveyance thereof to the Commissioner.

§ 533.8 *Title in case of conveyance.* Title satisfactory to the Commissioner within the meaning of § 533.7 will be such title as was vested in the mortgagor as of the date the mortgage was filed for record, but must be free and clear of all mechanics' and materialmen's liens filed of record subsequent to the recording of such mortgage, regardless of whether such liens attached prior to such recording date, and free and clear of all liens and encumbrances which may have attached, or defects which may have arisen subsequent to the recording of such mortgage, except such liens or other matters as may be approved by the Commissioner.

§ 533.9 *Evidence of title.* The mortgagee, at the time a deed is tendered in accordance with § 533.7, shall furnish to the Commissioner, without expense to him, satisfactory evidence of title. Such title evidence shall be executed as of a date to include the recordation of the deed to the Commissioner and shall consist of the same type of title evidence accepted by the Commissioner at the time the mortgage was insured.

§ 533.10 *Fire and hazard insurance.* The mortgaged premises shall at all times be insured against fire and other hazards as provided in the mortgage. The duty shall be upon the mortgagee to provide such coverage in the event the mortgagor fails to do so. If the mortgagee fails to pay any premiums necessary to keep the mortgaged premises so insured, the contract of insurance may be terminated at the election of the Commissioner. If at the time claim is filed for debentures, the property has been damaged by fire or other hazards and loss has been sustained by reason of failure to keep the property insured as provided in the mortgage, the amount of such loss may be deducted from the amount of the debentures. In the event a loss has occurred to the mortgaged property under any policy of fire or other hazard insurance and the amount of any funds received by the mortgagee in payment of such loss shall be sufficient to pay in full the entire mortgage indebtedness, the mortgage shall, upon receipt of such funds by the mortgagee, be deemed paid and the contract of mortgage insurance made with the Commissioner shall thereupon terminate. If, however, any funds so received shall be insufficient to pay such mortgage indebtedness in full, the mortgagee shall not exercise its option under the mortgage to use the proceeds of such insurance for the repairing, replacing or rebuilding of such premises or to apply such proceeds to the mortgage indebtedness without prior written approval of the Commissioner. If the Commissioner shall fail to give his approval to the use or application of such funds for either of said purposes within thirty (30) days after written request by the mortgagee, the mortgagee may use or apply such funds for any of the purposes specified in the mortgage without the approval of the Commissioner.

§ 533.11 *Mortgage default and termination.* If after the mortgage becomes in default, as provided in § 533.5, the mortgagee does not make the assignment provided in § 533.6, or does not foreclose or otherwise acquire the mortgaged property and make the conveyance provided in § 533.7, and written notice thereof is given to the Commissioner, or in the event that the mortgagor pays the obligation under the mortgage in full prior to the maturity thereof and the mortgagee pays the adjusted premium charge required under the provisions of § 533.3 and written notice thereof is given to the Commissioner, the obligation to pay the annual premium charge shall cease, and all rights of the mortgagee and the mortgagor under §§ 533.6 and 533.7 shall terminate as of the date of such notice.

ASSIGNMENTS

§ 533.12 *In general.* (a) Bonds or other obligations issued in connection with an insured mortgage executed in the form of an indenture of trust providing for the issue and sale of such bonds or other obligations and appointing a trustee to act on behalf of the holders of such bonds or other obligations may be transferred as provided in the indenture of trust.

(b) An insured mortgage, other than those described in § 533.12 (a), may not be transferred or pledged prior to the full disbursement of the mortgage loan, except with the prior written approval of the Commissioner which approval may be subject to such conditions and qualifications as the Commissioner may prescribe. Subsequent to full disbursement such mortgage may be transferred only to a transferee who is a mortgagee approved by the Commissioner. Upon such transfer and the assumption by the transferee of all obligations under the contract of insurance the transferor shall be released from its obligations under the contract of insurance.

§ 533.13 *Termination of mortgage insurance by assignment.* The contract of insurance shall terminate with respect to mortgages described in § 533.12 (b) upon the happening of either of the following events:

(a) The transfer or pledge of the insured mortgage to any person, firm, or corporation, public or private, other than an approved mortgagee.

(b) The disposal by a mortgagee of any partial interest in the insured mortgage by means of a declaration of trust or by a participation or trust certificate or by any other device, unless with the prior written approval of the Commissioner, which approval may be subject to such conditions and qualifications as the Commissioner in his discretion may prescribe: *Provided*, That this paragraph shall not be applicable to any mortgage so long as it is held in a common trust fund maintained by a bank or trust company (1) exclusively for the collective investment and reinvestment of moneys contributed thereto by the bank or trust company in its capacity as a trustee, executor or administrator; and (2) in conformity with the rules and regulations prevailing from time to time of the Board of Governors of the Federal Reserve System, pertaining to the collective investment of trust funds: *Provided further*, That this paragraph shall not be applicable to any mortgage so long as it is held in a common trust estate administered by a bank or trust company which is subject to the inspection and supervision of a governmental agency, exclusively for the benefit of other banking institutions which are subject to the inspection and supervision of a governmental agency, and which are authorized by law to acquire beneficial interests in such common trust estate, nor to any mortgage transferred to such a bank or trust company as trustee exclusively for the benefit of outstanding owners of undivided interests in the trust estate, under the terms of certificates issued and sold more than three years prior to said transfer, by a corporation which is subject to the inspection and supervision of a governmental agency.

§ 533.14 *No vested right.* Neither the mortgagee nor the mortgagor shall have any vested or other right in the Housing Insurance Fund.

§ 533.15 *Amendments of regulations.* This part may be amended by the Commissioner at any time and from time to time, in whole or in part, but such amendments shall not affect the contract of insurance on any mortgage already insured or to be insured on which the Commissioner has made a commitment to insure.

Effective date. This part shall be effective as to all mortgages with respect to which a commitment to insure is issued on or after the date hereof. The Commissioner with the consent of the mortgagor and the mortgagee may, subject to such conditions as he may impose, amend to conform to this part any contract of insurance or any commitment to insure, issued prior to February 3, 1938. Any mortgagee entitled to receive debentures upon default of a mortgage insured prior to February 3, 1938, may elect to receive, in lieu of such debentures, a cash adjustment and debentures issued as provided in § 533.7 and bearing interest at the rate current at the time of such election.

Issued at Washington, D. C., this first day of August 1945.

[SEAL] RAYMOND M. FOLEY,
Federal Housing Commissioner.

Section 3287.11 [1] *General Limitation Order L-60* is amended to read as follows:

The fulfillment of requirements for the defense of the United States has created a shortage of revolvers and shotguns for use in police work, plant patrol and other local guard duties; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 3287.11 [1] *General Limitation Order L-60*—(a) *Definitions.* For the purposes of this order:

(5) "Distributor" means any person other than a manufacturer or dealer engaged in the business of selling revolvers or shotguns.

(6) "Farmer or rancher" means any person who as owner or tenant of owner operates a farm or ranch on which livestock, poultry, fowl, crops or other agricultural products are grown or produced for the purpose of sale. The term "farm or ranch" does not include a "Victory Garden".

(b) *Restrictions on sales of new defense revolvers.* No person other than a manufacturer or distributor shall sell, lease, trade, lend, deliver, ship, transfer or otherwise dispose of any new defense revolver except:

(1) For government's use only to any agency, department, office, or officer of the Federal Government or of any state or local government; or pursuant to orders placed by the government of the United Kingdom, Canada, and other Dominions; Crown Colonies and Protectorates of the British Empire, Belgium, China, Greece, the Kingdom of the Netherlands, Norway, Poland, Russia and Yugoslavia; or for the account of any foreign country pursuant to the Act of March 11, 1941, "An Act to Promote the Defense of the United States" (Lend-Lease Act);

(c) *Restrictions on sales of new defense shotguns.* (1) No person other than a manufacturer or distributor shall sell, lease, trade, lend, deliver, ship, transfer or otherwise dispose of any new defense shotgun, the net cost of which to him was $45 or less, except:

(i) For government's use only to any agency, department, office, or officer of the Federal Government or of any state or local government; or pursuant to orders placed by the government of the United Kingdom, Canada, and other Dominions; Crown Colonies and Protectorates of the British Empire, Belgium, China, Greece, the Kingdom of the Netherlands, Norway, Poland, Russia and Yugoslavia; or for the account of any foreign country pursuant to the Act of March 11, 1941, "An Act to Promote the Defense of the United States" (Lend-Lease Act);

(iii) That the limitations of this paragraph do not apply to any sales to or deliveries by the Defense Supplies Corporation.

(2) The War Production Board may at any time issue individual written directives to manufacturers or to distributors requiring delivery of defense shotguns for emergency use. Application for such directives shall be made by the manufacturer, distributor or dealer in writing on his own letterhead and shall state the facts showing that the shotguns applied for are needed to meet the requirements of farmers and ranchers who live in an area where there is an unseasonal or exceptional need for such shotguns for the protection of crops and live-stock. These applications shall be filed with the Government Bureau, War Production Board, Washington 25, D. C., Ref.: L-60. In emergency, applications may be made by telephone or telegraph.

The following direction is issued pursuant to General Preference Order M-21:

(a) *Definitions.* (1) "Chromium" means low-carbon ferrochrome in the .06% maximum and .10% maximum carbon grades, low carbon chrome-x, and any other ferrochrome alloy containing .10% carbon or less.

(d) *Restrictions on deliveries of chromium.* Chromium may be ordered and delivered on rated orders or on unrated orders. However, suppliers of chromium must fill any order supported by an allocation in any one month before they may fill any unrated order for chromium calling for delivery in that month.

(e) *Basis of allocations.* The War Production Board will allocate chromium and chrome metal only to meet the requirements of rated orders. These allocations will include the specific quantities allocated and the particular persons authorized to receive delivery.

(f) *Applications for specific authorization.* Applications for specific authorization to melt or otherwise process chromium on rated or unrated orders and to melt or otherwise process chrome metal on rated orders shall be made on Form WPB-2933 or Form WPB-1770 or on such other form as may be prescribed for the purpose by the War Production Board.

PART 3293—CHEMICALS

[General Allocation Order M-300, Interpretation 1]

SHIPMENT ON CONSIGNMENT

The following interpretation is issued with respect to General Allocation Order M-300:

Where Order M-300 requires a person to get authorization to make or accept a delivery, the requirement applies, in the absence of a contrary provision in the applicable schedule, to the making and acceptance of a shipment on consignment where the shipper retains ownership of the material after delivery. The War Production Board may, however, pursuant to paragraph (w) of Order M-300, authorize persons to make and accept shipments on consignment without getting specific authorization for each shipment but subject to their getting further authorization before transferring ownership or making any further delivery. This might be done to enable persons to carry on a usual course of business, as for example, where a person ships to a distributor for storage as property of the shipper pending sale by the distributor.

Material which has been shipped to another person on consignment is a part of the shipper's inventory under Order M-300 as long as he retains title, and in reporting inventory under Order M-300 he must report the material accordingly.

PART 1340—FUEL

[MPR 120, Amdt. 145]

BITUMINOUS COAL DELIVERED FROM MINE OR PREPARATION PLANT

A statement of considerations involved in the issuance of this amendment has been issued simultaneously herewith and filed with the Division of the Federal Register.

Maximum Price Regulation No. 120 is amended in the following respects:

1. In § 1340.210 (a) a new subparagraph (18) is added to read as follows:

(18) A producer who in October 1941 was selling his coals for shipment by any

[1] 8 F.R. 4608, 4542, 7257, 7595, 7769, 7909, 9630, 9750, 13553, 13669; 9 F.R. 604, 1054, 3649, 4390, 4944, 5987, 6505, 8242, 11106.

means other than rail, river, truck or wagon, such as by conveyor belt and pricing them by either his truck price schedule or rail schedule may continue to price his coals for such a shipment according to either the price schedule for all methods of transportation except truck or wagon or according to the schedule for shipment by truck or wagon whichever prices he used at that time. In the event he was not selling his coals for shipment by the same method of transportation in October 1941 or cannot determine a price for any reason he may request the establishment of prices for a sale by other means of transportation.

2. In § 1340.212 a new paragraph (c) is added to read as follows:

(c) Under the provisions of this regulation a differential of 18 cents per net ton is established between coals produced at a strip mine and coals produced at a deep mine. A producer of coals from a strip mine or a producer who buys coal from strip mines for preparation and resale may apply for a removal of this differential and the differential will be removed by order upon a showing, First, That his coals are such that they can be prepared so as to be generally acceptable in coal consuming markets. Second, that his preparation plant or tipple is equipped with screens, picking tables and, in general, with adequate facilities for preparing coal by removing refuse before loading into transportation facilities; Third, That his coal as loaded into transportation facilities is adequately prepared by use of such facilities.

If such preparation is not maintained, the Administrator may at any time reestablish the price differential.

3. In § 1340.213 paragraph (e) is amended by deleting the words "In paragraph (b) (2) of this section a differential of 25" before the words "cents per ton" and inserting in lieu thereof the words "Under the provisions of this regulation a differential of 30."

4. In § 1340.215 a new paragraph (c) is added to read as follows:

(c) Under the provisions of this regulation a differential of 26 cents per net ton is established between coals produced at a strip mine and coals produced at a deep mine. A producer of coals from a strip mine blending coals with deep mine coals or a producer who buys coal from strip mines for preparation and resale and blends them with deep mine coals may apply for a removal of this differential and the differential will be removed by order upon a showing; first, that his coals are such that they can be prepared so as to be generally acceptable in coal consuming markets, second, that his preparation plant or tipple is equipped with screens, picking tables and, in general, with adequate facilities for preparing coal by removing refuse before loading into transportation facilities; third, that his coal as loaded into transportation facilities is adequately prepared by use of such facilities. Fourth, that his coal contains not less than approximately 25% of coals produced at a deep mine or mines.

If such preparation is not maintained, the Administrator may at any time reestablish the price differential.

This Amendment No. 145 shall become effective August 1, 1945.

Issued this 31st day of July 1945.

CHESTER BOWLES,
Administrator.

For the reasons set forth in the accompanying statement of considerations, and by virtue of the authority vested in me by the Price Control Act of 1942 as amended, and Executive Orders Nos. 9250 and 9328, I find that the issuance of this amendment to Maximum Price Regulation No. 120 is necessary to aid in the effective prosecution of the war.

ARTICLE I—PROHIBITION AND SCOPE OF REGULATION

SEC. 1. *Prohibition against dealing in used egg cases and used component parts at prices higher than maximum prices.* Regardless of any contract, agreement, or other obligation, no person may sell or deliver, and no person may buy or receive used egg cases or used component parts at prices higher than the maximum prices established in this regulation; and no person shall agree, offer, or attempt to do any of these things.

[1] 9 F.R. 3301, 8814, 12038; 10 F.R. 6238, 6796, 7496.

The provisions of this regulation shall not be applicable to sales or purchases, if, prior to the effective date of the regulation, used egg cases or parts have been received by a carrier, other than one owned or controlled by the seller, for delivery to the purchaser.

SEC. 2. *Less than maximum prices.* Nothing in this regulation shall prevent the sale or purchase of used egg cases or used component parts at less than maximum prices.

SEC. 3. *Transactions and products covered by the regulation*—(a) *Transactions covered.* This regulation covers all sales and all purchases of used egg cases or component parts within the continental limits of the United States.

(b) *Products covered.* This regulation covers all used standard egg cases of 30 dozen capacity, whether made of wood or fiber, and used standard fiber egg cases of 15 dozen capacity and all used component parts thereof.

SEC. 4. *Definitions*—(a) "Used egg case." As used in this regulation, "used egg case" is a used standard container, either wood or fiber, with a capacity of 30 dozen eggs, with new or used cover, new or used flats and new or used fillers, or a standard fiber container with a capacity of 15 dozen eggs with a new or used cover, new or used flats and new or used fillers.

(b) *An "egg producer."* An egg producer is anyone engaged in raising poultry for the production of eggs for sale. The prices provided for sales of egg cases to egg producers are intended to cover only sales of cases used in marketing the egg producer's output and do not cover sales to dealers in egg cases who incidentally market some eggs.

(c) *Poultrymen's cooperative association.* A "poultrymen's cooperative association" as used in this regulation is any association of poultry producers which satisfies the standards for a cooperative association as established in the Capper-Volstead Act (42 Stat. at Large 388, (1922), 7 U. S. C., sections 291–2) and which is recognized as a cooperative association by the Farm Credit Administration of the Federal Government.

ARTICLE II—MAXIMUM PRICES AND TERMS OF SALE

SEC. 5. (a) *Maximum prices.* Sales by governmental agencies (including military and naval installations) and sale and purchases by poultrymen's cooperatives are provided for separately. The maximum prices for all other sales of used egg cases and used component parts are set forth below:

Egg producers may pay a maximum delivered price of 40¢ each for a complete used 30-dozen egg case (20¢ for a fifteen-dozen case) with utility equal to that of a new case measured in terms of one time carrying of eggs from producer to market provided there is affixed an easily noticeable paper label stating that the case is warranted by a registered seller to have the utility of a new case and setting forth the name and address of the guarantor and his registration number.

Used egg cases having the utility of new cases measured in terms of one time carrying ability from egg producer to market to which there is affixed an easily noticeable paper label stating that the case is warranted by a registered seller to have the utility of a new case and setting forth the name and address of the guarantor and his registration number may be sold to persons other than egg producers at 32 cents each for a 30-dozen case or 16 cents each for a 15-dozen case f. o. b. seller's loading point or cars.

The maximum price on all other sales of used egg cases, except by governmental agencies (including military and naval installations), shall be 17 cents for a 30-dozen case and 9 cents for a 15-dozen case f. o. b. seller's loading point or cars.

Poultrymen's cooperatives shall, for the purposes of this regulation, be considered egg producers, but they shall be permitted to sell used egg cases to their members at purchase cost plus handling and delivery cost.

All sellers desiring to become registered sellers with the privilege of warranting cases to have new case utility must fill out a form provided by the Regional Office of Price Administration or a duly authorized District Office and receive a certificate of registration. Registered sellers must affix an easily noticeable paper label to all cases or parts which they sell stating that the cases or parts are warranted to be in new case condition, giving the name and address of the seller and giving the registration number provided him by the appropriate Regional Office or a duly authorized District Office of the Office of Price Administration. All other labels must be effaced. Registered sellers shall be required to sell all cases handled by them under warranty that they are in new case condition.

SEC. 6. *Additions for delivery* except on sales to egg producers (in which case the price listed is a delivered price). On shipments by common or contract carriers the actual cost of transportation paid or incurred by the seller may be added to the maximum price, f. o. b. seller's loading plant. If shipment is by private truck owned or controlled by the seller, actual transportation costs may be added; except that in no case shall the addition exceed 80 percent of the common carrier truck charges for the same shipment.

SEC. 7. *Prohibited practices.* Any practice which is a device to get the effect of a higher-than-ceiling price without actually raising the dollars-and-cents price is as much a violation of this regulation as an outright over-ceiling price. This applies to devices making use of commissions, services, transportation arrangements, premiums, special privileges, tying-agreements, trade understandings, changes in discount practices, dealing in eggs on a "cases returned" basis and the like.

ARTICLE III—MISCELLANEOUS

SEC. 8. *Adjustable pricing.* Any person may agree to sell at a price which can be increased up to the maximum price in effect at the time of delivery; but no person may, unless authorized by the Office of Price Administration, deliver or agree to deliver at prices to be adjusted upward in accordance with action taken by the Office of Price Administration after delivery. Such authorization may be given when a request for a change in the applicable maximum price is pending, but only if the authorization is necessary to promote distribution or production and if it will not interfere with the purposes of the Emergency Price Control Act of 1942, as amended. The authorization may be given by the Administrator or by any official of the Office of Price Administration to whom the authority to grant such authorization has been delegated. The authorization will be given by order, except that it may be given by letter or telegram when the contemplated revision will be the granting of an individual application for adjustment.

SEC. 9. *Applications for adjustment and petitions for amendment*—(a) *Government contracts.* (1) The term "Government contracts" is here used to include any contract with the United States or any of its agencies, or with the Government or any governmental agency of any country whose defense the President deems vital to the defense of the United States under the terms of the Act of March 11, 1941, entitled "An Act to pro-

mote the defense of the United States." It also includes any subcontract under this kind of contract.

(2) Any person who has made or intends to make a "Government contract" and who thinks that a maximum price established in this regulation is impeding or threatens to impede distribution of used egg cases and used component parts which are essential to the war program and which are or will be the subject of the contract, may file an application for adjustment in accordance with Procedural Regulation No. 6,[1] issued by the Office of Price Administration.

(b) *Petitions for amendment.* Any person seeking an amendment of any provision of this regulation may file a petition for amendment in accordance with the provisions of Revised Procedural Regulation No. 1,[2] issued by the Office of Price Administration.

SEC. 10. *Records and reports.* (a) All persons making sales covered by this regulation which amount to $50.00 or more in any one month must keep records which will show a complete description of the containers sold, the quantity, price, date of sale and the name and address of the buyers. Buyers whose purchases covered by this regulation amount to $50.00 or more in any one month must keep similar records including the name and address of the seller.

These records must be kept for two years, or for the duration of the Emergency Price Control Act of 1942, as amended, whichever period is the shorter, for inspection by the Office of Price Administration.

SEC. 11. *Licenses.* A license is necessary to make sales of the commodities covered by this regulation. A license is automatically granted to all persons now or hereafter making these sales. The license may be suspended for violations in connection with sales of any commodity which the seller is licensed to sell, and no person whose license is suspended may sell any such commodity during the period of suspension.

SEC. 12. *Registration.* All persons desiring to become registered sellers with the privilege of warranting used egg cases to have new case utility must file their qualifications on a form provided by the Regional Office of Price Administration or a duly authorized District Office within 30 days from the issuance of the regulation or within 30 days from entering business and receive a certificate of registration. Certificates of registration will be granted by letter to persons who qualify. Registration of all sellers may later be required. All outstanding registrations are cancelled as of the effective date of this regulation.

SEC. 13. *Enforcement.* (a) Persons violating any provision of this regulation are subject to the criminal penalties, civil enforcement actions, suits for treble damages, and proceedings for revocation of licenses provided for by the Emergency Price Control Act of 1942, as amended.

(b) War procurement agencies and their contracting or paying finance officers are not subject to any liability, civil or criminal, imposed by this regulation. "War procurement agencies" include the War Department, the Navy Department, the United States Maritime Commission and the Lend-Lease Section in the Procurement Division of the Treasury Department, or any of their agencies. Sales and purchases by such agencies are nevertheless subject to the terms of the regulation.

SEC. 14. *Relation to other regulations.* (a) *General Maximum Price Regulation.* Any sale or delivery covered by this regulation is not subject to the General Maximum Price Regulation,[3] except that sales, purchases and deliveries of commodities covered by this regulation which originate outside of and are imported into the continental United States are governed by the Maximum Import Price Regulation.[4]

(b) *Second Revised Maximum Export Regulation.* The maximum price for export sales of used egg cases is governed by the Second Revised Maximum Export Regulation.[4]

This regulation shall become effective August 31, 1945.

NOTE: All reporting and record-keeping requirements of this regulation have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Issued this 1st day of August 1945.

PART 1394—RATIONING OF FUEL AND FUEL PRODUCTS

[Rev. RO 11,[7] Amdt. 63]

FUEL OIL

A rationale for this amendment has been issued simultaneously herewith and has been filed with the Division of the Federal Register.

Revised Ration Order 11 is amended in the following respects:

Section 1394.5159 (b) is amended to read as follows:

(b) *PAW exceptions and authorizations.* The restrictions contained in paragraphs (a) (2), (a) (4) or (a) (11) shall not apply if the Petroleum Administration for War has granted the applicant a currently valid exception under Petroleum Distribution Order No. 13, as amended, with respect to the specific restriction. The restriction in paragraph (a) (12) shall not apply if the Petroleum Administration for War has granted the applicant a currently valid waiver of the provisions of Petroleum Directive No. 72, as amended, with respect to the restriction. In such cases the ration shall be issued (pursuant to the applicable provisions of this order) only for the period and in the amount specified in the exception or waiver granted by the Petroleum Administration for War. If the exception or waiver limits the applicant to the use of a specified grade of fuel oil, the ration issued may not be used to acquire or consume any grade of fuel oil other than that specified.

This amendment shall become effective August 1, 1945.

PART 1499—COMMODITIES AND SERVICES

[MPR 586, Supp. Storage Reg. 3]

MODIFICATIONS OF MAXIMUM PRICES ESTABLISHED BY MAXIMUM PRICE REGULATION 586 FOR COTTON WAREHOUSING IN THE SOUTHEAST

Sec.
1. General statement.
2. Definitions.
3. Producer loan cotton.
4. Government purchase cotton (not reconcentrated).
5. Government pooled cotton and reconcentrated Government purchase cotton.
6. Government owned cotton of crops prior to 1944.
7. Shipper cotton.
8. Transferring cotton from one program to another.
9. Reweighing and resampling.
10. Incidental services.
11. Determination of storage period—8-day rule.

AUTHORITY: § 1499.692 issued under 56 Stat. 23, 765; 57 Stat. 566; Pub. Law 383, 78th Cong.; Pub. Law 108, 79th Cong.; E.O. 9250, 7 F.R. 7871; E.O. 9328, 8 F.R. 4681.

SECTION 1. *General statement.* (a) This regulation covers all modifications of maximum prices established by Maximum Price Regulation 586[1] for the storage and handling of cotton by "non-compress" warehouses in the Southeast. To this extent it supersedes Supplementary Storage Regulation 2[2] under Maximum Price Regulation 586.

(b) The provisions of this regulation supersede the general pricing provisions (sections 5, 6, and 7) of Maximum Price Regulation 586. Storage and terminal services affected by this regulation are, however, subject to all other provisions of Maximum Price Regulation 586 unless provided to the contrary in particular sections herein.

(c) This regulation covers "non-compress" cotton warehousing services within the states of Alabama, Florida, Georgia, North Carolina, South Carolina, and Virginia. It does not cover gin yard storage subject to Maximum Price Regulation 211. (See section 3 (c) (6) of Maximum Price Regulation 586.)

(d) Maximum prices established by this regulation apply only to services performed on or after August 1, 1945. Increased storage rates may be applied to cotton in storage as of the beginning of the next storage month (as customarily computed) following July 31, 1945. The increased charges for handling-in-and-out apply *only* to cotton received on or after August 1, 1945.

SEC. 2. *Definitions.* (a) The term "producer loan cotton" means cotton which is subject to a loan made by the United States Government or any agency thereof and which is still subject to redemption of individual notes by individual producers. It also includes cotton harvested after August 1, 1945, which is eligible for government loan or purchase but which is actually subject to similar loans made by banks, and cotton being accumulated by producers for tender under government loan, bank loan, or government purchase programs. The producer may signify his intention of placing the cotton under such programs by paying or offering to pay the 60¢ handling charge provided in Section 3 at the time the cotton is received by the warehouse.

(b) The term "government pooled cotton" means cotton which is subject to a loan made by the United States Government or any agency thereof, but which by the terms of the loan may no longer be released by redemption of individual notes, although the original producers may still have an equity in the final proceeds of the sale of such cotton.

(c) The term "government owned cotton" means cotton harvested prior to August 1, 1944, which is owned by the United States Government or any agency thereof.

(d) The term "government purchase cotton" means cotton purchased by the United States Government or any agency thereof, out of crops harvested since August 1, 1944.

(e) The term "shipper cotton" means all cotton not included under the above definitions of "producer loan cotton", "government pooled cotton", "government owned cotton", or "government purchase cotton".

(f) The term "handling in and out of warehouse" includes receiving, tagging, weighing on arrival, taking one set of samples on arrival, incidental storage of such samples and transmitting the samples to designated classing offices, filling out schedules of warehouse receipts, picking out by tag numbers, and loading according to custom into cars or trucks.

(g) The term "non-compress" refers to cotton storage and handling services of a warehouse which does not have compress facilities, or a warehouse which does not customarily make a charge for compressing cotton or make a penalty charge for delivery of uncompressed cotton even though such warehouse does operate compress facilities.

SEC. 3. *Producer loan cotton.* Maximum charges for storage and handling of "producer loan cotton" shall be:

(a) For "handling in and out of warehouse", 35¢ per bale plus surcharge 25¢ per bale, total 60¢ per bale.

(b) For storage per bale per month or fraction thereof, including fire insurance:

(1) First 6 months, 20¢ plus surcharge 5¢, total 25¢.

(2) After the first 6 months, 17½¢ plus surcharge 5½¢, total 23¢.

SEC. 4. *Government purchase cotton (not reconcentrated).* Maximum charges for storage and handling of "government purchase cotton" in the same warehouse as when purchased shall be:

(a) For "handling in and out of warehouse," 35¢ per bale plus surcharge 25¢ per bale, total 60¢ per bale.

(b) For storage per bale per month or fraction thereof, 17½¢ plus surcharge 5½¢, total 23¢.

(c) Warehousemen are not required to provide fire insurance but from the foregoing storage rate shall be deducted one-half of the average fire-insurance rate per $100 per month paid under the warehouseman's insurance policy covering cotton on which the warehouseman has insured warehouse receipts outstanding, or under the standard form of fire insurance policy approved by the State in which the cotton is stored.

In computing insurance deductions average rates applying to a particular warehouseman and other means of facilitating computations mutually agreed upon by the warehouseman and government may be used.

SEC. 5. *Government pooled cotton and reconcentrated Government purchase cotton.* Maximum charges for storage and handling of "government pooled cotton" and reconcentrated government purchase cotton shall be:

(a) For services of receiving, weighing, tagging, sampling, issuing warehouse receipts, and placing the cotton in storage, 25¢ per bale plus surcharge 4¢ per bale, total 29¢ per bale.

(b) For storage per bale per month or fraction thereof:

(1) Not compressed, 17½¢ plus surcharge 5½¢, total 23¢.

(2) Compressed, 15¢ plus surcharge 3¢, total 18¢.

(c) Warehousemen are not required to provide fire insurance but from the foregoing storage rates shall be deducted one-half of the average fire insurance rate per $100 per month paid under the warehouseman's insurance policy covering cotton on which the warehouseman has insured warehouse receipts outstanding, or under the standard form of fire insurance policy approved by the State in which the cotton is stored.

In computing insurance deductions average rates applying to a particular warehouseman and other means of facilitating computations mutually agreed upon by the warehouseman and government may be used.

SEC. 6. *Government owned cotton.* Maximum charges for storage and handling of "government owned cotton" shall be:

(a) For services of receiving, weighing, tagging, sampling, issuing warehouse receipts and placing the cotton storage, 25¢ per bale plus surcharge 4¢ per bale, total 29¢ per bale.

(b) For storage per bale per month or fraction thereof:

(1) Not compressed, 15¢ plus surcharge 5¢, total 20¢.

(2) Compressed, 12½¢ plus surcharge 2½¢, total 15¢.

(c) Warehousemen are not required to provide fire insurance but from the foregoing storage rates shall be deducted one-half of the average fire insurance rate per $100 per month paid under the warehouseman's insurance policy covering cotton on which the warehouseman has insured warehouse receipts outstanding, or under the standard form of

[1] 10 F.R. 5797.
[2] 10 F.R. 5804.

fire insurance policy approved by the State in which the cotton is stored.

In computing insurance deductions average rates applying to a particular warehouseman and other means of facilitating computations mutually agreed upon by the warehouseman and government may be used.

SEC. 7. *Shipper cotton.* Maximum charges for storage and handling in and out of warehouse of "shipper cotton" shall be either the charges determined under paragraph (a) below or the charge set forth in paragraph (b) below, depending upon the election made by each warehouseman on or before November 8, 1942 (and then required to be filed in District Offices):

(a) Maximum charges for storage and handling in and out of warehouse computed under section 5 of Maximum Price Regulation 586, plus 17 per cent thereof.

(b) Specific maximum charges:

(1) For "handling in and out of warehouse", 35¢ per bale plus surcharge 25¢ per bale, total 60¢ per bale.

(2) For storage per bale per month or fraction thereof, including fire insurance if the seller included fire insurance in the storage charges made to purchaser of the same class during the month of March 1942:

(i) For the first 6 months, 20¢ plus surcharge 5¢, total 25¢.

(ii) After 6 months, 17½¢ plus surcharge 5½¢, total 23¢.

SEC. 8. *Transferring cotton from one program to another.* The following rules must be observed when cotton is transferred from one program or category to another:

(a) If cotton is transferred between loan, purchase, or shipper categories without physical handling (other than reweighing or resampling for which separate charges are provided), no charge may be made for the transfer nor may the total charges for handling in and out exceed the highest charges applicable under any one of the programs.

(b) In computing these charges the extent to which the storage charge on shipper cotton for the first month exceeds storage charges for subsequent months shall be considered a handling-in charge. For example, if a warehouseman's shipper tariff provides 41¢ for the first month and 29¢ for subsequent months and cotton tendered originally under this tariff is transferred to the loan or purchase program, the warehouseman may collect the difference between 60¢ and 12¢ or 48¢ at that time. If the cotton is subsequently sold to a shipper, the storage charges will thereafter begin to accrue at 29¢ rather than at 41¢.

(c) No charges for turnout or delivery services included in the definition of "handling in and out" may be assessed unless such turnout charge applicable on shipper cotton is sufficient when combined with the handling-in charge to exceed 60¢. In the example given above, the warehouseman could collect from the shipper 11¢ out of a 59¢ turnout charge.

SEC. 9. *Reweighing and resampling.* Maximum charges for reweighing, (including furnishing weight sheets) or resampling (including furnishing one set of samples and delivering samples locally), per bale, shall be:

(a) Reweighing at time of shipment, 10¢, no surcharge, total 10¢.

(b) Resampling at time of shipment, 10¢, no surcharge, total 10¢.

(c) Reweighing, except at time of unloading or shipment, 20¢ plus 5¢ surcharge, total 25¢.

(d) Resampling, except at time of unloading or shipment, 20¢ plus 5¢ surcharge, total 25¢.

PART 1499—COMMODITIES AND SERVICES

[MPR 586, Amdt. 1 to Supp. Storage Reg. 2[1]]

MODIFICATIONS OF MAXIMUM PRICES ESTABLISHED BY MAXIMUM PRICE REGULATION 586 FOR COTTON WAREHOUSING AND COTTON COMPRESSING

A statement of the considerations involved in the issuance of this amendment has been issued simultaneously herewith and filed with the Division of the Federal Register.

Supplementary Storage Regulation 2 is amended in the following respects:

1. In section 1 the last undesignated paragraph is amended to read as follows:

This regulation covers all cotton warehousing and cotton compressing performed within the cotton belt except cotton warehousing performed in "non-compress" facilities in the "Southeast", which services are covered by Supplementary Storage Regulation 3. It does not cover gin-yard storage subject to Maximum Price Regulation 211. (See section 3 (c) (6) of MPR 586.)

2. In section 2, paragraphs (b) and (h) are amended and paragraph (i) is added, to read as follows:

(b) The term "government loan cotton" means cotton which is subject to a loan made by the United States Government or any agency thereof and which is still subject to redemption of individual notes by individual producers. It also includes cotton harvested after August 1, 1945 which is eligible for government loan or purchase but which is actually subject to similar loans made by banks, and cotton being accumulated for tender under government loan, bank loan, or government purchase program.

(h) The term "non-compress facilities" refers to cotton storage and handling services of a warehouse which does not have compress facilities, or which does not customarily make a charge for compressing cotton or assess a penalty charge for delivery of uncompressed cotton even though it does operate compress facilities.

(i) The "Southeast" means the states of Alabama, Florida, Georgia, North Carolina, South Carolina, and Virginia.

3. Section 3 (b) (2) is amended to read as follows:

(2) Storage of cotton in "non-compress" facilities, 21½¢ per bale per month, or fraction thereof, for first 6 months of storage and 20¢ per bale per month, or fraction thereof, thereafter.

4. Section 4 (b) (2) is amended to read as follows:

(2) Storage of uncompressed cotton in "non-compress" facilities, 20¢ per bale per month or fraction thereof.

5. Section 5 (b) (2) (ii) is amended to read as follows:

(ii) Storage of uncompressed cotton in "non-compress" facilities, 17½¢ per bale per month, or fraction thereof.

[1] 10 F.R. 5804.

6. In section 6 the section heading and the textual matter preceding paragraph (a) is amended to read as follows:

SEC. 6. *Government owned cotton of the 1944-45 and later crops.* Maximum prices for storage and handling services performed on government owned cotton harvested since August 1, 1944 shall be:

7. Section 6 (b) is amended to read as follows:

(b) For storage:

(1) Cotton, compressed or uncompressed, stored in warehouses operating compress facilities, 18¢ per bale per month or fraction thereof.

(2) Compressed cotton stored in "non-compress" facilities, 18¢ per bale per month or fraction thereof.

(3) Uncompressed cotton stored in "non-compress" facilities, 23¢ per bale per month or fraction thereof.

8. Section 7 (b) (2) (ii) is amended to read as follows:

(ii) Cotton stored in "non-compress" facilities, 21½¢ per bale per month or fraction thereof, for the first 6 months of storage and 20¢ per bale per month, or fraction thereof, thereafter.

9. Section 9 is amended to read as follows:

SEC. 9. *Recompression from standard density to high density.* Any compress operator whose maximum charges for recompressing cotton from standard density to high density are less than his maximum charges for compressing uncompressed cotton to high density may increase his charges for recompressing cotton from standard density to high density to the same as his charges for compressing uncompressed cotton to high density.

10. In section 10, the section heading and paragraph (a) are amended, to read as follows:

SEC. 10. *Surcharge.* (a) Cotton warehousemen may charge, for the services of storing, receiving, handling, and compressing cotton and for miscellaneous services in connection with the warehousing of cotton, their maximum charges established by this Supplementary Storage Regulation (or by Maximum Price Regulation 586 if this regulation does not establish a specific maximum charge), plus a surcharge of 17 per cent, unless the application of such surcharge is expressly barred or limited by particular provisions herein (See section 6 (d)).

11. A new section 11 is added, to read as follows:

SEC. 11. *Determination of storage period—8-day rule.* (a) Maximum storage charges shall be computed at the applicable maximum rates through the eighth day after the first valid shipping date regardless of when the cotton actually is shipped.

(b) The first valid shipping date for a given lot shall be the latest of the following:

(1) The date on which shipping instructions accompanied by warehouse receipts are received by the warehouseman.

(2) A date specified in the shipping instructions as a shipping date.

(3) The first valid shipping date authorized in a permit from the Office of Defense Transportation or other government agency if such a permit is required.

(4) The date on which cotton ordered from other plants for consolidation is actually received.

(c) This section shall not be construed as authorizing increased charges against transit cotton when the shipper has complied with the free-time requirements of the transit rules.

(d) Notwithstanding provisions of this section, the United States Government or any agency thereof may pay for additional storage to the extent determined by it to be reasonable in view of extraordinary circumstances such as the furnishing of shipping instructions covering large numbers of bales.

This amendment shall become effective August 1, 1945.

Issued this 31st day of July 1945.

Acting Administrator.

On all sales other than sales to ultimate consumers, the adjustment charge provided herein may be made and collected only if stated separately on each invoice.

The maximum prices of the manufacturer, as adjusted, are subject to its customary terms, discounts, allowances and other price differentials in effect during March, 1942 on sales to each class of purchaser.

(b) *Maximum prices of purchasers for resale.* A person who hereafter buys an article covered by this order and resells it in substantially the same form, may collect from his customer, in addition to his properly established maximum price in effect immediately before this order was issued, an adjustment charge in the same amount as the adjustment charge herein authorized and which he pays to his supplier. If he did not have a maximum price in effect for the article at the time this order was issued, he may add the same adjustment charge to the maximum price which he hereafter establishes for his sales under the applicable regulation. If the applicable regulation requires the maximum resale price to be computed on the basis of cost, the reseller must find his maximum resale price (not including the permitted adjustment charge) by using as cost his invoice cost less any adjustment charge stated on the invoice as a separate amount.

On all sales other than sales to the ultimate consumer this adjustment charge may be made and collected only if it is separately stated on each invoice. The adjusted price is subject to each seller's customary terms, discounts, and allowances on sales of the same or similar articles.

(c) *Notification.* At the time of, or prior to, the first invoice to a purchaser for resale, showing a price adjusted in accordance with the terms of this order, the seller shall notify the purchaser in writing of the method established in paragraph (b) of this order for determining adjusted maximum prices for sales of the article covered by this order. This notice may be given in any convenient form.

(d) *Statements to be submitted to the Office of Price Administration.* After the effective date of this order, The Globe-Wernicke Co. shall submit to the Office of Price Administration, Washington, D. C., a detailed quarterly profit and loss statement, within thirty days after the close of each quarter.

(e) This order may be revoked or amended by the Price Administrator at any time.

(f) This order shall become effective on August 1, 1945.

Issued this 31st day of July 1945.

[RMPR 194, Order A-1]

WOMEN'S, GIRLS', CHILDREN'S AND INFANTS' OUTERWEAR GARMENTS

RETAILERS' MAXIMUM PRICES

For the reasons set forth in an opinion issued simultaneously herewith and filed with the Division of the Federal Register, and pursuant to section 18 (a) of RMPR 194, it is ordered:

SECTION 1. *Scope of this order*—(a) *What garments are covered.* The garments covered by this order are the women's, girls', children's and infants' outerwear garments which are listed and described in section 9, Appendix A. Hereafter these outerwear garments are referred to as "garment" or "garments".

(b) *What kind of sales are covered.* This order applies to all sales at retail. All sales to individual ultimate consumers by persons who sell imported garments in substantially the same form in which they purchase them are "sales at retail". Sales to industrial, commercial or institutional users are also "sales at retail" if made by persons who sell principally to individual ultimate consumers.

(c) *What geographical areas are covered.* This order applies to the 2d and 4th Judicial Divisions, to the coastal towns on Bristol Bay and to the City of Anchorage. "Judicial Divisions" refers to the four district court and recording divisions of the Territory of Alaska and their boundaries established by Chapter XII, Article I, Section 1091, Compiled Laws of Alaska, 1933.

(d) Relationship of this order to Revised Maximum Price Regulation 194. This order replaces the pricing provisions of sections 5 and 6 and modifies other provisions of Revised Maximum Price Regulation 194. All other provisions of Revised Maximum Price Regulation 194 not inconsistent with the provisions of this order remain in effect. All letters, letter-orders and general orders previously issued under MPR 194 or RMPR 194, approving or establishing your maximum price for any garment listed in Appendix A, are superseded by this Order A-1.

SEC. 2. *How to figure your ceiling prices under this order.* Your ceiling price for a garment shall be your net invoice cost thereof plus a markup of 85% on such cost. (This calculation can be easily made by multiplying the net invoice cost by 1.85).

(a) "Net invoice cost" means the price you paid to your supplier after deducting all discounts except the discount for prompt payment up to and including 8%. "The price you paid to your supplier" must not exceed your supplier's ceiling price.

(b) "Supplier" means a manufacturer or wholesaler. Your ceiling prices for garments purchased from another retailer are established under this order by Section 3.

(c) Do not include as part of your "net invoice cost" any commission (including but not limited to a resident buyer's commission), service, premium, transportation or any other charge not specifically provided for in this order.

SEC. 3. *Maximum prices for garments which have been bought from another retailer.* If the garment you sell was purchased from another retailer in Alaska, your ceiling price shall be your supplier's retail ceiling price for that garment as established by this order. If the garment you sell was purchased from another retailer in the continental United States, your ceiling price shall be your supplier's retail ceiling price for that garment as established by the applicable regulation in the continental United States. Transportation or other similar charges may not be added.

SEC. 4. *Marking of garments.* Each garment sold must be marked in accordance with the requirements of either paragraph (a) or (b) below.

(a) *What marking is required.* On and after September 1, 1945, you may not sell, offer for sale or deliver any garment unless it is marked with a label or ticket containing all of the following information:

(1) The name of your supplier as it appears on your purchase invoice.

(2) Your purchase invoice number.

(3) Your supplier's lot number. This must be a different number for each group of garments having a different ceiling price. Style number may be substituted for lot number if each group of garments having a different ceiling price carries a different style number.

(4) Your ceiling price in one of the following ways: "Our ceiling $_____"; or, "Ceiling price $_____".

EXAMPLE OF MARKING

John Smith Company
Invoice No. 164
Lot No. 111
Ceiling price $16.50

(b) You may substitute for the information specified in subparagraphs (1), (2) and (3) of paragraph (a) above, any other method of marking which will be easiest for you, *Provided*, That the garment so marked can be readily traced to the garment on the invoice covering your purchase of that garment. (For example, you may arrange your purchase invoices in alphabetical or chronological order and mark each invoice with a code symbol of your own such as a number or letter or a combination of the two, and then mark the label or ticket itself with a corresponding identification.)

EXAMPLE OF MARKING

Invoice Code No. 45
Garment Code No. D
Ceiling price $34.75

(c) *Manner of marking.* The required marking must be attached to each garment by stitching, adhesive, pins or staples, or by some other method which attaches the label or ticket securely to the garment. All the words and figures on the label or ticket must be clearly visible to the purchaser. The label or ticket shall not be removed but must remain attached to the garment when delivered to the purchaser.

SEC. 5. *Sales slips, receipts and invoices.* Regardless of whether the buyer requests it, you must give the buyer a sales slip, receipt or invoice showing (a) the date, (b) your name and address, (c) a description of each garment sold, and (d) the price received for each garment. You must make a duplicate copy of such sales slip, receipt or invoice and mark thereon the same information that is marked on the label or ticket attached to the garment pursuant to section 4. All duplicate sales slips, receipts or invoices must be kept at your place of business and preserved for inspection by the OPA so long as the Emergency Price Control Act of 1942, as amended, remains in effect.

SEC. 6. *Preserving purchase invoices.* Section 10 (b) (2) of Revised Maximum Price Regulation 194 requires you to preserve all purchase invoices. You must continue to preserve the purchase invoices which you heretofore received and hereafter receive for all garments covered by this order. You must keep these invoices in alphabetical, numerical or chronological order, or according to some other recognized filing system. All such invoices must be kept at your place of business and preserved for inspection by the OPA for so long as the Emergency Price Control Act of 1942, as amended, remains in effect.

SEC. 7. *Service charges.* If prior to April 1, 1942, you customarily supplied repair, alteration or remodeling services in connection with the sale of any garment subject to this order without extra charge, you may not curtail, change or discontinue such services without reducing your ceiling price by an amount which will compensate the customer for such curtailment, change or discontinuance. If you customarily made an extra charge for a service and such charge was in effect during March 1942, or if you were not in business prior to April 1, 1942, the charge for a service must be determined under Revised Maximum Price Regulation 165—Services. Any extra charge for a service must be stated separately on the sales slip furnished pursuant to section 5 of this order.

SEC. 8. *Adjustment of maximum prices in special cases*—(a) *Nationally advertised garments.* You may apply for adjustment to the Territorial Director if you can show all of the following:

(1) That your maximum price for a garment established under this order is less than the maximum retail price fixed by the manufacturer of the garment;

(2) That the garment and the price so fixed are nationally advertised by the manufacturer;

(3) That you are required by the manufacturer to observe such nationally advertised price;

(4) That such garment, or similar garments produced by such manufacturer, was generally sold at retail at prices no lower than the nationally advertised prices within the locality of your selling establishment.

In such case the Territorial Director is authorized to increase the retailers maximum price to the nationally advertised price.

SEC. 9. *Appendix A—Garments which must be priced under this order.* The garments listed below, if made from yard goods (including knitted fabrics and laces), must be priced under this order. Uniforms, work clothing, sportswear and utility wear are included within the classifications of garments given below. Garments made of artificial leather are, however, excepted. "Boys'" are included within the term "children's" as used in this order, except such garments as are generally known in the trade as "boys'" rather than "children's" garments.

(a) *Coats.* "Coats" include all outerwear garments commonly known as coats, untrimmed, trimmed, fur-trimmed and fur-lined, including capes and wraps, but not including rainwear garments. "Rainwear garments" are those which are commonly regarded as having their chief use as protection against rain.

(b) *Suits.* "Suits" include all outerwear garments of two or more pieces commonly known as suits, untrimmed, trimmed and fur-trimmed.

(c) *Jackets.* "Jackets" include all outerwear garments commonly known as jackets, including boleros, jerkins, weskits and other garments of the same type.

(d) *Skirts.* "Skirts" include all outerwear garments commonly known as skirts, including culottes.

(e) *Dresses.* "Dresses" include all outerwear garments of one or more pieces commonly known as dresses, including dresses used for street, evening, house or utility wear. Bridal gowns, jumpers, pinafores, brunch coats, smocks and similar garments are considered to be dresses.

(f) *Blouses.* "Blouses" include all outerwear garments, commonly known as blouses or shirtwaists.

(g) *Snowsuits.* "Snowsuits" include all outerwear garments commonly known as snowsuits or ski suits.

(h) *Leggings and Legging Sets.* "Leggings" and "legging sets" include all outerwear garments commonly known as leggings and legging sets.

(i) *Ski pants.* "Ski pants" include all outerwear garments commonly known as ski pants.

(j) *Slacks.* "Slacks" include all outerwear garments commonly known as slacks, including slacks with any attached sleeveless bodice commonly known as "overalls" or "jumperalls".

(k) *Slack suits.* "Slack suits" include all outerwear garments commonly known as slack suits or slack sets. Garments commonly known as "coveralls" are included.

SEC. 10. *Revocation, amendment.* This Order No. A-1 may be revoked or amended by the Price Administrator at any time.

This order shall become effective August 15, 1945.

NOTE: The record-keeping provisions in this order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Issued this 31st day of July 1945.

(b) The manufacturer and wholesalers shall grant, with respect to their sales of each brand and size or frontmark of domestic cigars for which maximum prices are established by this order, the discounts they customarily granted in March 1942 on their sales of domestic cigars of the same price class to purchasers of the same class, unless a change therein results in a lower price. Packing differentials charged by the manufacturer or a wholesaler in March 1942 on sales of domestic cigars of the same price class to purchasers of the same class may be charged on corresponding sales of each brand and size or frontmark of cigars priced by this order and shall not be reduced. If a brand and size or frontmark of domestic cigars for which maximum prices are established by this order is of a price class not sold by the manufacturer or the particular wholesaler in March 1942, he shall, with respect to his sales thereof, grant the discounts and may charge and shall allow the packing differentials customarily granted, charged or allowed (as the case may be) in March 1942 by his most closely competitive seller of the same class on sales of domestic cigars of the same March 1942 price class to purchasers of the same class.

(c) On or before the first delivery to any purchaser of each brand and size or frontmark of domestic cigars for which maximum prices are established by this order, the manufacturer and every other seller (except a retailer) shall notify the purchaser of the maximum list price and the maximum retail price established by this order for such brand and size or frontmark of domestic cigars. The notice shall conform to and be given in the manner prescribed by § 1358.113 of Maximum Price Regulation No. 260.

(d) Unless the context otherwise requires, appropriate provisions of Maximum Price Regulation No. 260, shall apply to sales for which maximum prices are established by this order.

(e) This order may be revoked or amended by the Price Administrator at any time.

This order shall become effective August 1, 1945.

Issued this 31st day of July 1945.

Acting Administrator.

[MPR 571, Order 1]

RENTAL OF CERTAIN TYPES OF COMMERCIAL MOTOR VEHICLES

BARE TRUCK RENTALS ON CONSTRUCTION PROJECTS IN REGION 5

For the reasons set forth in the accompanying opinion and under the authority vested in the Office of Price Administration by section 5 (a) and 14 of Maximum Price Regulation 571, it is hereby ordered:

(a) *Applicability.* (1) The maximum rates which may be charged for "bare" rentals of automotive equipment of the described types on construction projects in Region 5 (Texas, Oklahoma, Kansas, Missouri, Arkansas, and Louisiana) are set forth in Appendix "A" hereto. On and after August 1, 1945, the rates herein specified shall govern on all such rentals regardless of any other provisions of Maximum Price Regulation 571. (2) Rentals on a partially maintained or fully maintained basis are not subject to this order, but remain subject to the general provisions of Maximum Price Regulation 571.

(b) *Modification of rates.* The Administrator may by order authorize rentals other than those provided in this order, either lower or higher, applicable to particular construction projects, where it is demonstrated that due to conditions peculiar to the project, the rates herein established are either higher or lower than would be generally fair and equitable, to either lessee or lessor.

(c) *Effective date of order.* As to any person who performed the same type of rental services on construction projects in March, 1942 and has a maximum rate under section 4 of the regulation properly reported under section 15 (b), or any person whose maximum rate was previously adjusted or established as provided in sections 5 or 8 of Maximum Price Regulation 571, this order applies to all rentals on and after the effective date of this order. As to any person who has not so established rental rates for the same or similar rental services, the rates prescribed herein constitute a price determination under section 5 (a) of the regulation and apply to all rentals made on and after February 3, 1945, the effective date of Maximum Price Regulation 571.

(d) *Effect on applications under section 5 (a).* Any person subject to this order is exempt from the requirement of section 5 (a) as to the filing of a price determining application.

This order may be revoked or amended at any time.

This order shall become effective August 1, 1945.

Issued this 1st day of August 1945.

Part III. Application of Rates

(a) The monthly rates established herein are based upon a usage of 240 hours per month. For actual use for more than 240 hours during one monthly period, the maximum additional rental price for each additional hour, or part of an hour, for such actual use shall be calculated upon the basis of $\frac{1}{240}$ of the applicable rate per month shown in the foregoing schedule.

(2) If used for a part of a monthly period, the maximum rental rate for such part of the monthly period shall be calculated upon the basis of the higher of: (1) $\frac{1}{30}$ of the applicable monthly rate for each daily period, or part thereof, of possession or (2) $\frac{1}{240}$ of the applicable monthly rate for each hour, or part thereof, of actual use.

(c) All fuel and lubricants used in the operation of motor vehicles shall be furnished (or paid for) by the Lessee.

(d) Drivers' wages are excluded from all rates indicated hereon.

Part IV. Definition and General Provisions

"Bare" basis refers to any lease, contract, or understanding, regardless of whether the same is denominated a rental agreement, or forms a part of another agreement, whereby one party undertakes to furnish another party with any of this equipment, without supplying any operating and maintenance services required therewith.

Rental rates set forth in this table are for "bare" motor vehicles or trailers, and do not include charges for drivers, mechanics, greases, gasoline, fuel oil, lubricants, repairs, or maintenance (except that due to normal wear and tear), or any other charge which is properly a part of operating and maintenance service. The rental rates set forth in this table include an allowance for the cost of all repairs and overhauling required as a result of normal wear and tear of vehicles. This means that:

(a) When vehicles are on bare rental and break down as a result of normal wear and tear, lessor cannot charge lessee with the cost of repairs, or any rental for the time lost while repairs are being made.

(b) Where vehicles on bare rental break down as a result of any cause other than normal wear and tear, lessor can charge lessee with the cost of repairs and with rental for possession of vehicles during the time while repairs are being made.

(c) However, where vehicles are on bare rental, the lessee may at his own expense always make minor repairs, regardless of the cause of breakdown, where such repairs are necessary to keep the job going, but he may not charge the cost of such repairs to the lessor or deduct the time lost for making repairs from the rental period, without the lessor's consent.

(d) In any instance where there is a breakdown of vehicles on bare rental, the cause of such breakdown is a question of fact that must be determined between the lessor and the lessee.

(e) A bare rental contract may provide for the assumption by the lessee of the duty to make all repairs and replacements at his own cost and expense, including those resulting from normal wear and tear and including tire repair or replacement, provided that in such event the rental shall not exceed 85% of the applicable maximum rental rate set forth in this table. By way of illustration but not limitation, such a lessee may be required to pay the entire cost of a repair or replacement necessitated by climatic conditions, fire, flood, tornado, etc., while the vehicle is or was in his possession, and the normal wear and tear resulting from his use and may be required to pay rental during the repair period. He may be required to pay a proportion of the cost of tires; for example, based upon his mileage use as compared with the normal mileage life of the tires. However, he shall not be required to pay for repair or replacement due to pre-existing or hidden defects, or to defective material, nor would he be required to pay rental during the repair period.

SECURITIES AND EXCHANGE COMMISSION.

[File No. 70-1035]

CENTRAL VERMONT PUBLIC SERVICE CORP. AND VERMONT UTILITIES, INC.

MEMORANDUM OPINION AND ORDER

At a regular session of the Securities and Exchange Commission held at its office in the City of Philadelphia, Pa., on the 31st day of July 1945.

We have before us applications and declarations filed by Central Vermont Public Service Corporation (Central Vermont) and Vermont Utilities, Inc. (Utilities) relating to the merger of the latter company into the former and transactions incidental thereto. Utilities is presently a subsidiary of Central Vermont. Both companies are subsidiaries of New England Public Service Company and Northern New England Company, both registered holding companies.

In our findings, opinion and order of April 2, 1945, entered in these proceedings, we granted exemption from the provisions of section 6 (a) of the Public Utility Holding Company Act of 1935, pursuant to the third sentence of section 6 (b), of the issue and sale by Central Vermont of 40,000 shares of its common stock, no par value, and the issue and sale of $6,967,000 principal amount of its First Mortgage Bonds, Series D, due 1975. The applications and declarations now under consideration were included in the same filing, but inasmuch as requisite stockholder approvals and State Commission authorizations with respect to the proposed merger and transactions incidental thereto had not been obtained, we reserved jurisdiction as to such matters.[1] Our findings and opinion of April 2, 1945 gave a description of the property being merged and of the effect of the merger, and reference to such opinion is hereby expressly made.

The transactions now under consideration include the following:

(1) Amendment of the Articles of Association of Central Vermont to add to the purposes stated therein the express purpose of the carrying on of the telephone business now conducted by Utilities.

(2) Acquisition by Central Vermont and disposition by Utilities, under and pursuant to the agreement of merger, of all of the assets of Utilities.

(3) Cancellation of the promissory note of Utilities in the principal amount of $50,000 now owned by Central Vermont.

(4) Cancellation of 14,000 shares of capital stock of Utilities now owned by Central Vermont.

(5) Assumption by Central Vermont of liability upon the $138,000 principal amount of First Mortgage Bonds, Series A, 4%, due January 1, 1967, of Utilities.

The filing also states that the $138,000 principal amount of First Mortgage Bonds, Series A, of Utilities are to be redeemed at the current call price of 106% of the principal amount, plus accrued interest.

[1] Central Vermont Public Service Corporation, et al., — S. E. C. — (1945), Holding Company Act Release No. 5700.

These transactions have now received requisite stockholder approvals and the authorizations of the Public Service Commission of the State of Vermont, the State Commission of the state in which the applicants and declarants are organized and doing business, and of the Public Service Commission of New Hampshire, the State Commission of the state in which Central Vermont also does business.

Insofar as the amendment to the Articles of Association of Central Vermont may be subject to sections 6 (a) (2) and 7 of the Act, we find that the requirements of these sections are satisfied.

The acquisition by Central Vermont of the electric utility assets, having been expressly authorized by the State Commissions having jurisdiction, is exempt from the requirements of sections 9 (a) and 10 by virtue of the exemptive provisions of section 9 (b) (1), and the Federal Power Commission has passed on this phase of the transaction. On the other hand, the disposition by Utilities of its electric utility assets is subject to the provisions of sections 12 (d) and 12 (f) and Rules U-43 and U-44. We observe no basis for making adverse findings under these sections and rules.

The cancellation of the promissory note of Utilities in the principal amount of $50,000 now owned by Central Vermont is subject to the requirements of section 12 (c) and Rule U-42, as is also the cancellation of 14,000 shares of capital stock of Utilities. We make no adverse finding with respect thereto. The assumption by Central Vermont of liability upon the $138,000 principal amount of First Mortgage Bonds, Series A, 4%, due January 1, 1967, of Utilities may be considered as exempt from the provisions of section 6 (a), having been approved by the two State Commissions. The acquisition of the telephone assets of Utilities is to be considered as the acquisition of an interest in the business and is therefore subject to the provisions of section 10. We observe no basis for making adverse findings under section 10 (b) and find that the requirements of section 10 (c) (1) are satisfied.[1]

It is therefore ordered, That the aforesaid applications and declarations filed by Central Vermont Public Service Corporation and Vermont Utilities, Inc. be, and hereby are, granted, and be, and hereby are, permitted to become effective, subject to the terms and provisions of Rule U-24 and to Conditions 3 and 4 of our order of April 2, 1945.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
Secretary.

[F. R. Doc. 45-14156; Filed, Aug. 1, 1945; 11:35 a. m.]

[1] This finding is made solely on the basis of Condition 3 of our order of December 29, 1944 in Central Vermont Public Service Corporation, — S. E. C. — (1944), Holding Company Act Release No. 5532, in which we required Central Vermont to dispose of its interest in the telephone assets within one year from the date of such order. This requirement, of course, remains in full force and effect.

PART 3175—REGULATIONS APPLICABLE TO THE CONTROLLED MATERIALS PLAN

[CMP Reg. 1, Direction 71, as Amended Aug. 2, 1945]

OPERATIONS OF STEEL PRODUCERS AFTER JULY 1, 1945

The following amended direction is issued pursuant to CMP Regulation 1:

(a) *General.* The amendment to CMP Regulation 1, dated May 10, 1945, defines unrated orders and authorizes their acceptance by producers for delivery of steel July 1 and later. Priorities Regulation No. 27, also dated May 10, 1945, tells how a small manufacturer may purchase steel by the use of the Z-3 allotment symbol. Orders placed with the Z-3 allotment symbol are authorized controlled material orders and are handled in accordance with Direction 54 to CMP Regulation 1. These changes in War Production Board regulations necessitate certain changes in the rules applicable to operations of producers, which are outlined below.

(b) *Steel for further conversion.* (1) Effective July 1, 1945, a producer may use the symbol FC-1 only to replace steel of the same product group listed in Schedule 1 that was used as conversion material to fill authorized controlled material orders, excluding orders bearing the Z-3 allotment symbol. A producer may use the allotment symbol FCZ to obtain conversion material of the same product group listed in Schedule 1 needed to fill orders bearing the Z-3 allotment symbol. Orders placed with the allotment symbol FCZ are deferrable authorized controlled material orders and must be handled in accordance with Direction 54 to CMP Regulation No. 1. A producer must use the allotment symbol FCN to order steel on an unrated basis as conversion material to fill unrated orders.

(2) *Cancellation of FC allotments.* The War Production Board will no longer issue FC allotments to steel producers not operating under production directives for steel for further conversion as the result of applications received on Form CMP-4B under CMP Regulation 8 and all such allotments for the third calendar quarter of 1945 and thereafter are hereby cancelled. Orders placed against such previously granted allotments and accepted for delivery in July, August and September, 1945, shall be considered as bearing the symbol FC-1. Orders placed against such previously granted allotments and accepted for delivery after September 30, 1945 (but not beyond December 1945) must be maintained in the producer's CMP order acceptance up to 45 days prior to the first of the month for which delivery is specified, at which time they shall be cancelled unless they have been revalidated with an FC-1 or FC-Z symbol in accordance with paragraph (b) (3) of this direction.

(3) *Producers not under production directives.* A producer not operating under production directives may use the FC-1 allotment symbol to replace conversion material used in filling authorized controlled material orders as follows:

For delivery during the month of July, 1945, a producer may use the FC-1 allotment symbol to place orders for carbon and alloy steel interchangeably for further conversion equal to the tonnage procured from other producers by extension of the FC symbol and used by him in filling authorized controlled material orders shipped by him in April. Similarly, August purchase authorizations may be equal to the tonnage used in filling authorized controlled material orders shipped in May. The same sequence shall be followed for future months; that is, conversion material used for filling authorized controlled material orders for the third Prior month constitute purchase authority to place "FC-1" orders in any one month. In determining the tonnage to be replaced by the use of the FC-1 allotment, orders bearing allotment symbol Z-3 shall not be considered as authorized controlled material orders. Conversion steel needed to fill orders bearing the allotment symbol Z-3 may be obtained through the use of the allotment symbol FCZ.

(4) *Producers under production directives.* The production directives under which certain producers operate will be adjusted to reflect only the order load of authorized controlled material orders. To the extent required to meet their order book pattern of

authorized controlled material orders (excluding orders bearing the Z-3 allotment symbol) producers will be given specific allocations of steel for further conversion on Series B allocations, Form GA-193, which authorizes the use of symbol FC-1. Since Z-3 allotments are deferrable, FC-1 allocations will not include tonnage to fill such orders. However, in the case of allocations of steel for conversion to carbon and electrical sheet and strip, FC-1 allocations may be made where necessary against total order book pattern of the producer. Producers will receive instructions how to show in report form WPB-2848 the extent to which Z-3 orders are included in their order acceptance records. (FC-1 allocations will accordingly be adjusted by that amount.) A producer may use the allotment symbol FCZ to obtain conversion material needed to fill an order bearing a Z-3 allotment symbol. All orders now placed against effective Series B allocations for delivery after June 30, 1945, bearing the symbol FC plus a Series B allocation number shall be considered as bearing the symbol FC-1. Orders placed hereafter against all Series B allocations must be identified with the symbol FC-1 and the allocation number.

When the supply-demand situation indicates production directives on a specific product may be eliminated, FC-1 Allocations for conversion material for that product will be cancelled and a producer now obtaining conversion steel through allocations will thereafter operate in the same manner as other producers under paragraph (b) (3) above. However, in the case of FC-1 allocations which are cancelled because the production directive for the product into which the allocated material would be converted has been cancelled, orders previously placed against such FC-1 allocations and accepted for delivery in the first and second months succeeding the cancellation of such production directive, shall be considered as bearing the symbol FC-1. Space reservations established by such FC-1 allocations for the third and later months (not beyond December 1945) succeeding the cancellation of the Production Direction, must be maintained in the producer's CMP orders acceptance up to 45 days prior to the first of the month for which delivery is specified, at which time the space reservations will be cancelled unless orders have been applied against them in accordance with paragraph (b) (3) above.

(5) An order with the FC-1 symbol is an authorized controlled material order and must be accepted as required by CMP Regulation 1. A producer receiving any "Further conversion" order must report it under the appropriate FC symbol on his WPB-2633 report of shipments. When resold by the purchasing producer, the material must be recorded on his WPB-2633 reports of shipments under the appropriate allotment symbol furnished by his customer. The material will be considered as part of the production of both producers. An order placed pursuant to an allocation on Form GA-193 must be endorsed in accordance with instructions on that form.

(c) *Warehouse load directives.* Most warehouses load directives will continue in effect at least until September 30, and producers may, pursuant to Direction 3 to Order M-21, accept unrated orders as well as authorized stock replacement orders within the load directive. However, the producer must remove unrated orders to make space available for authorized stock replacement orders as received. After the expiration date of the space reservation, unrated orders accepted from distributors within the load directive have the same status as unrated orders accepted from users of steel and must be set back when it is necessary to accept authorized controlled material orders either from warehouses or from users of steel.

(d) *Acceptance of orders.* (1) All steel producers may accept unrated orders without limit, but authorized controlled material orders, including Z-3 and FCZ orders, must be accepted in accordance with CMP Regulation 1. A producer will continue to accept orders by month of delivery and fill them in accordance with CMP Regulations.

(2) Production directives will be related to the available capacity in the case of tight items. Should a producer desire to accept additional authorized controlled material orders which can be filled in the month required, he may request the War Production Board to increase his production directive.

(3) It is not permissible for a producer to fill unrated orders at the expense of authorized controlled material orders. When the demand is heavy for a specific steel product a producer must fill authorized controlled material orders to the extent of his available capacity and in the case of a producer who has a production directive the excess demand must be handled on the basis of increases in production directives rather than by over-acceptance of orders.

(e) *Orders superseded.* This direction supersedes paragraph (a) (2) of Direction 6 to CMP Regulation 1.

Issued this 2d day of August 1945.

Recording Secretary.

(d) *Restrictions on lead content of certain products.* No person shall put into process in any calendar quarter in the manufacture of any of the products listed below for the uses appearing opposite those products, a greater quantity of lead than is indicated opposite those products. With respect to the remainder of the first quarter of 1945, each person shall take into account the quantity of lead already used during that quarter in determining whether he has already used his quota for the first quarter of 1945. If he has already used his quota, he shall not use any additional lead during the quarter for the manufacture of any of the products listed below for the uses indicated.

NOTE: Table amended in its entirety Aug. 2, 1945.

Commodity	Uses	Percentage of quantity of lead put into process for the manu. of same product for same use during first six months of 1944
Insecticides	All	45% or 1000 lbs. of lead per calendar quarter, whichever is greater.
Glass—all	Preferred	Unlimited.
Glass—optical, chemical, electrical (including radio, radar and X-ray), industrial equipment, scientific and signal.	Civilian	50% or 1000 lbs. of lead per calendar quarter, whichever is greater.
Glass—all other	Civilian	25% or 1000 pounds of lead per calendar quarter, whichever is the greater.
Vitrified china tableware designed for institutional or mass feeding	All	50% or 1000 lbs. of lead per calendar quarter, whichever is greater.
Ceramics—chemical, electrical and industrial.	All	50% or 1000 lbs. of lead per calendar quarter, whichever is greater
Ceramics—all other	All	25% or 1000 lbs. of lead per calendar quarter, whichever is greater.

(e) *Restrictions on use of red lead for paints, etc.* No person shall put into process in any calendar quarter in the production of paints, varnishes and lacquers (including paste red lead) for civilian uses, more than 40 percent of the quantity of red lead (not the lead content) which he put into process for those products for civilian uses in the first six months of 1944, or 1,000 pounds per quarter, whichever is the greater. This paragraph is not applicable to red lead consumed for preferred uses.

(f) *Restrictions on use of white lead for paints, etc.* No person shall put into process in any calendar quarter in the production of paints, varnishes and lacquers (including paste white lead) for civilian uses, more than 12½ percent of the quantity of white lead (not the lead content) which he put into process for those products for civilian uses in the first six months of 1944, or 1,000 pounds per quarter, whichever is greater. This paragraph is not applicable to white lead consumed for preferred uses.

(g) [Deleted Aug. 2, 1945]

(h) [Deleted Aug. 2, 1945]

(i) *No restrictions on lead content of lead chrome pigments.* There are no restrictions on the lead content of lead chrome pigments for the reason that the use of all chrome pigments (including lead chrome pigments) is controlled by Order M-370, and the distribution and use of bichromate for all chrome pigments is allocated under Order M-300, Schedule 62.

(j) *Toll arrangements.* For the purpose of this order a toll arrangement is an arrangement under which lead owned by one person (referred to as "the owner") is put into process by another person (referred to as the "processor"), for the production of certain products affected by this order, for the owner of the lead. Toll arrangements are subject to the following restrictions:

(1) Any quantity of lead put into process under toll arrangement in any calendar quarter for the production of any product for the particular use described in paragraphs (d), (e) and (f) shall be charged against the owner's lead quota instead of the processor's, if the owner manufactured the product himself for that use or had it manufactured for him for that use in the corresponding calendar quarter of 1944.

(2) Any quantity of lead put into process under toll arrangement during any calendar quarter for the production of any such product for any such use, must be charged against the lead quota of the processor, and not against the lead quota of the owner, if the owner did not manufacture that product for that use or have it manufactured for him for that use during the corresponding quarter of 1944.

(3) Any processor who is offered lead for processing on toll arrangement, shall assume that he is required to charge the lead against his own lead quota, unless he is advised in writing by the owner that the owner manufactured the same product or had it manufactured for him for the same use during the calendar quarter of 1944 corresponding to the calendar quarter in which the lead is to be put into process, and that the quantity offered can and will be charged against the owner's lead quota.

(4) Quantities charged against a lead quota pursuant to this paragraph (j) shall be considered as having been put into process by the holder of that quota.

(k) *Method of computing lead content of lead chemicals.* This order limits the amount of lead which a person may put into process in any calendar quarter for the production of certain products to a percentage of the lead which he put into process during the first six months of 1944. In order to determine this percentage in lead chemicals, the following table should be used:

Lead Chemicals:	*Pounds of lead per 100 pounds of lead chemicals*
Lead acetate (basic)	60
Lead acetate (normal)	55
Lead antimonate	63
Lead arsenate	60
Lead arsenite	50
Lead chloride	75
Lead dioxide	87
Lead nitrate	63
Lead silicate (mono)	80
Lead silicate (di)	61
Litharge	93
Red lead	91
Basic carbonate of white lead	80
Basic sulphate of white lead	75
Sodium plumbite	73

(l) *Inventory restrictions on white lead.* No person whose use of white lead is restricted by this order, shall accept any delivery of white lead which shall result in his having an inventory at the time of such delivery in excess of the amount of lead he is entitled to put into process under the provisions of this order in that calendar quarter, for the production of paint, varnish, lacquers (including paste white lead) and ceramics. For the purposes of this paragraph, the term "inventory" includes inventory at factory, as well as in transit to factory.

(m) *Special directives.* The War Production Board may from time to time issue special directives with respect to the use, production or processing of lead chemicals, notwithstanding the other provisions of this order.

(n) *Reports.* On or before the 20th day of each month following a calendar quarter, each person who put into process more than 1,000 pounds of lead for the production of any of the products or uses described in paragraphs (b) to (h), inclusive, of the order, during the preceding quarter shall file two copies (one certified) of Form WPB-4138, with the Chemicals Bureau, War Production Board, Washington 25, D. C.

(o) *Appeals.* Any appeal from this order must be filed by letter in duplicate addressed to the Chemicals Bureau, War Production Board, Washington 25, D. C., Ref: M-384, setting forth the reasons for the appeal and the necessary supporting information. Such information should include:

(1) The product for which the lead will be used. If the appeal is taken from the provisions of paragraphs (d), (e), (f), (i) or (j), indicate proposed use of the product, i. e., preferred, civilian, or both.

(2) Period of time, not exceeding one calendar quarter, for which relief is requested.

(3) Monthly schedule of amount of lead appellant would like to use for the particular product and the portion of this which is in excess of the quota permitted by the order.

(4) If the appeal is for an increase in quota to fill orders for preferred uses, state the name of the procuring agency, the end use description, prime contract numbers and dates when the orders were received.

(5) If the appeal is filed because the restrictions of the order will prevent the filling of civilian orders of extreme urgency, give exact information as to the use of the product in which the lead would be used, names of the customers and preference ratings, if any, covering the orders.

(6) Any other information pertinent to the appeal.

Ordinarily, consideration will be given only to those appeals showing that the quota limits on the consumption of lead will prevent the filling of orders for "preferred uses' or most essential "civilian uses". The War Production Board will not consider favorably appeals based on the fact that the appellant would be unable to fill orders for civilian uses in amounts as large as he had previously delivered, or that he will be unable to fill orders for civilian uses to the same extent as other persons. Attention is called to the provisions of Priorities Regulation 16 with respect to the statement of manpower requirements which must be submitted with the appeal.

(p) *Violations.* Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States, is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

(q) *Communications to War Production Board.* All communications concerning this order shall, unless otherwise directed, be addressed to the War Production Board, Chemicals Bureau, Washington 25, D. C., Ref: M-384.

Issued this 2d day of August 1945.

By J. JOSEPH WHELAN,
Recording Secretary.

SECTION 1. *Prohibition against dealing in used slack cooperage at prices above the maximum.* Regardless of any contract or other obligation, no person may sell or deliver and no person may buy or receive used slack cooperage at prices higher than those contained in this regulation. [1] Prices, f. o. b. conveyance.

[2] Prices include free delivery within a radius of 20 miles of the seller's place of business. For the purposes of this section loading on a freight car constitutes delivery. On deliveries to points in excess of 20 miles distant from the seller's place of business these prices are f. o. b. conveyance. Where such deliveries are made by common carrier, the actual charges paid or incurred by the seller in making delivery may be added to the f. o. b. conveyance price. However, if delivery is by truck owned or controlled by the seller, the addition may not exceed 80 percent of the common carrier truck charge for a similar delivery.

*Except that the following prices may be charged by dealers for recoopered and/or reconditioned barrels where the buyer receives physical delivery in seaport towns or cities in Maine, New Hampshire, Massachusetts, Rhode Island or Connecticut: Large barrels—single head, $1.10, double head, used head supplied $1.10; medium barrels, single head—90¢, small barrels, single head—75¢.

NOTE 1: Dumpers or emptiers may charge peddlers' prices on transactions of 350 or more barrels on which free delivery is made and barrels are unloaded by the seller at the dealer's plant. Delivery in full on such transactions shall be made within a period of 48 hours after the first delivery subject to that transaction. If delivery in full is not completed in 48 hours after the first delivery no more than the dumper's price may be charged.

NOTE 2: On sales by dealers to dealers out of the selling dealer's plant or warehouse prices not in excess of the indicated prices for recoopered and/or reconditioned barrels may be charged provided the price to the consumer does not exceed the maximum price established by this regulation.

On sales by a dealer to other dealers of as they run barrels on which delivery starts from a point other than his plant or warehouse, no more than the peddler's prices may be charged.

NOTE 3: For any barrel other than those meeting specifications listed in the above table the maximum price shall be the price for the barrel listed in the tables with the nearest gallonage content. The gallonage for large barrels is 31 or over, for medium barrels 31 and under 35, for small barrels, 12 and under 31 and for kegs under 12 gallons.

SEC. 4. *Definitions—*(a) *Dumper or emptier.* One who purchases commodities in barrels and empties the contents.

(b) "Peddler". One who obtains used barrels from emptiers for the purpose of resale and makes local delivery to purchasers or, in cases of shipment by rail, makes delivery to freight car, without storing, selecting or reconditioning them.

(c) "Dealer". One who buys and sells used slack barrels, maintains storage space and has facilities for repairing, recoopering, reconditioning and washing such barrels.

(d) "As they run". Used slack barrels which have not been selected and reconditioned in any way.

(e) "Recoopered and/or reconditioned". Barrels repaired to such condition that they can without further servicing be used for the packaging and shipment by rail or otherwise, of the purchaser's commodities; broken staves replaced or reinforced; cleaned or washed; protruding nails, except those necessary to hold head hoop in place, removed; with complete set of hoops, and with extra hoops or head liners supplied, if required by purchaser.

(f) "Single-head barrels". Barrels which have one sound head in place.

(g) "Double-head barrels". Barrels with two heads, one of which must be sound and the other either sound or reinforced. One head may be dropped.

(h) "Used head". A head which has been a part of a barrel which was used for storing, packaging or shipping of commodities.

(i) "New head". A head which has been purchased new and has never been used in a barrel.

SEC. 5. *What the invoice must contain.* All invoices must contain a sufficiently complete description of the items sold to show whether or not the price is proper. They must also show the name and address of the seller, the name and address of the purchaser, the origin and destination of the shipment, the quantity and price and any items, including delivery charges, affecting the price.

SEC. 6. *Prohibited practices.* Any practice which is a device to get the effect of a higher-than-ceiling price without actually raising the dollars-and-cents price is as much a violation of this regulation as an outright over-ceiling price. This applies to devices making use of commissions, services, transportation arrangements, premiums, special privileges, tying-agreements, trade understandings, and the like.

ARTICLE III—MISCELLANEOUS

SEC. 7. *Adjustable pricing.* Any person may agree to sell at a price which can be increased up to the maximum price in effect at the time of delivery; but no person may, unless authorized by the Office of Price Administration, deliver or agree to deliver at prices to be adjusted upward in accordance with action taken by the Office of Price Administration after delivery. Such authorization may be given when a request for a change in the applicable maximum price is pending, but only if the authorization is necessary to promote distribution or production and if it will not interfere with the purposes of the Emergency Price Control Act of 1942, as amended. The authorization may be given by the Administrator or by any official of the Office of Price Administration to whom the authority to grant such authorization has been delegated. The authorization will be given by order, except that it may be given by letter or telegram when the contemplated revision will be the granting of an individual application for adjustment.

SEC. 8. *Applications for adjustment and petitions for amendment—*(a) *Government contracts.* See Procedural Regulation No. 6[1] for adjustments on certain government contracts and subcontracts.

(b) *Petitions for amendment.* Any person seeking an amendment of any provision of this regulation may file a petition for amendment in accordance with the provisions of Revised Procedural Regulation No. 1,[2] issued by the Office of Price Administration.

SEC. 9. *Records.* Sellers must maintain records of all transactions in used slack cooperage showing the name and address of the seller, name and address of the purchaser, quantity sold, price, description of the barrels or kegs sold as to condition (as they run, recoopered and/or reconditioned), size, number of heads (new or used), origin and destination of shipment, manner of delivery and delivery charges.

Purchasers should maintain records showing name and address of seller, quantity, description of barrels or kegs and the price.

All records must be kept for a period of two years or for the duration of the Emergency Price Control Act of 1942, as amended, whichever period is shorter.

SEC. 10. *Registration.* On and after 30 days after the issuance of this regulation the dealers prices may be charged only by those dealers who have received from the appropriate regional office, or duly authorized district office, of the Office of Price Administration a certificate of registration as a dealer in used slack barrels.

All persons desiring to sell at dealers' prices must register their qualifications with the Regional Office, or duly authorized District Office, of the Office of Price Administration having jurisdiction over the area in which their places of business are located within 30 days after the issuance of this regulation, or upon entering business as a dealer, and receive a certificate of registration. Certificates of registration from the Regional Administrator or his designee will be granted by letter to persons who can show that they qualify as dealers under section 4 and whose applications contain (a) the number of reconditioned slack barrels sold during the first six months of 1945 and the dollar value of such sales, (b) the names of at least four of their customers for reconditioned slack barrels, and (c) a complete description of their facilities for repairing, recoopering, reconditioning, and washing used slack barrels.

Sellers entering business as used slack barrel dealers for the first time need only describe their facilities as outlined in (c) above.

The Regional Administrator or duly authorized District Director may deny applications of those who fail to qualify.

SEC. 11. *Labelling.* On and after 45 days after the issuance of this regulation, no used slack barrel may be sold at the dealer's price unless it has been marked with a gum label or rubber stamp, indicating that it is a recoopered and/or reconditional barrel, the dealer's name, address and Office of Price Administration registration number.

SEC. 12. *Licenses.* The provisions of Licensing Order No. 1,[3] licensing all persons who make sales under price control, are applicable to all sellers subject to this regulation. A seller's license may be suspended for violations of the license or of one or more maximum price regulations. A person whose license is suspended, may not, during the period of suspension, make any sale for which his license has been suspended.

SEC. 13. *Enforcement.* Persons violating any provisions of this regulation are subject to the criminal penalties, civil enforcement actions, and suits for treble damages provided by the Emergency Price Control Act of 1942, as amended.

SEC. 14. *Relation to other regulations—*(a) *General Maximum Price Regulation.*[4] Any sale or delivery covered by this Maximum Price Regulation 593 is not subject to the General Maximum Price Regulation.

(b) *Second Revised Maximum Export Price Regulation.*[5] The maximum prices for export sales of used slack cooperage are governed by the Second Revised Maximum Export Price Regulation.

The effective date of this regulation shall be August 7, 1945.

NOTE: All reporting and record keeping requirements of this regulation have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Issued this 2d day of August 1945.

Acting Administrator.

[RMPR 373,[1] Amdt. 13]

GROCERY ITEMS IN HAWAII

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.

Revised Maximum Price Regulation 373 is amended in the following respects:

1. Section 39 (c) (3) (iii) is amended to read as follows:

(iii) "Net cost" in Zones 2 and 3 on the Island of Maui shall be determined in the manner set forth in subparagraph (2) above, except that no transportation costs to Zones 2 and 3 from any point within the Island of Maui shall be included, whether incurred by you or by your supplier.

2. Section 39 (d) (2) is amended to read as follows:

(2) Prepare and keep a "Price Book" and enter therein, in the case of items for which you must compute your ceiling prices under Table B (not the items for which dollars-and-cents ceiling prices are specified), the following information with respect to each such item:

(i) The date of your supplier's invoice,

(ii) The name of your supplier,

(iii) Your "net cost".

(iv) The number of retail units in the customary wholesale unit (e. g., 48 cans to a case),

(v) The division factor used, and

(vi) The resulting ceiling price per case (or other wholesale unit) and the ceiling price per retail unit.

In addition, multiple outlet retail stores must enter in the "Price Book" the quantity purchased in case their ceiling price for a particular item is computed on weighted average net cost basis.

You may, with the prior approval of the Office of Price Administration, omit the entries in your "Price Book" required by items (i) and (ii) listed above. Such approval will be granted if you can demonstrate to the satisfaction of the Office of Price Administration that your invoice filing system is such that the invoice supporting any entry in your "Price Book" can be readily produced for examination by any Office of Price Administration representative.

You must show your records and your "Price Book" to any Office of Price Administration representative on request.

3. Table A of section 39 is amended to read as follows:

TABLE A—DOLLARS-AND-CENTS MAXIMUM PRICES FOR CERTAIN GROCERY ITEMS IN THE TERRITORY OF HAWAII

(a) This Table A applies to all retailers of grocery items covered by this section located in the Territory of Hawaii. If the item being priced is not listed in this Table A, then the retailer shall compute his maximum prices in accordance with the provisions set forth in Table B of this section.

(b) "Commodity Classification Number", as used in this table, means the number assigned to the particular subdivision contained in paragraph (f) of this section, in which the grocery items listed are classified and defined.

(c) The following maximum prices are established for sales by retailers in the Territory of Hawaii. To these prices may be added the transportation differentials of 2% in Zone 2 and 3% in Zone 3 set forth in paragraph (e) of this section.

4. Table B of section 39 is amended to read as follows:

TABLE B—CALCULATED MAXIMUM PRICES FOR CERTAIN GROCERY ITEMS IN THE TERRITORY OF HAWAII

(a) This Table B applies to all retailers of grocery items covered by this section located in the Territory of Hawaii. However, if a specific dollars-and-cents maximum price for any item is set forth in Table A of this section, the retailer may not compute his maximum price for that item under this Table B.

(b) "Commodity Classification Number", as used in this table, means the number assigned to the particular subdivision, contained in paragraph (f) of this section, in which the grocery items listed are classified and defined.

(c) You shall compute your maximum price, under this table, by dividing your "net cost", as defined by paragraph (c) of this section, by the appropriate division factor set forth in this table. You may add to the prices so computed the transportation differentials, of 2% in Zone 2 and 3% in Zone 3, set forth in paragraph (e) of this section.

(d) *Division factors.* (1) If you are a retailer whose store is located in the Island of Molokai, you shall use the division factors set forth in column numbered (2).

(2) If you are a retailer located elsewhere in the Territory of Hawaii, you shall use the division factors set forth in the column numbered (1).

PART 1420—BREWERY, DISTILLERY, AND WINERY PRODUCTS

[MPR 445,[1] Amdt. 28]

DISTILLED SPIRITS AND WINES

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.

Maximum Price Regulation 445 is amended in the following respects:

1. Section 2.4 (a) is amended by deleting the figure "$2.48" and substituting in place thereof the figure "$1.70".

2. Section 2.4 (b) (2) (i) is amended by deleting the figure "$2.48" and substituting in place thereof the figure "$1.70".

3. Paragraph (a) (2) of Appendix G to Article III is amended by deleting the figure "$1.92" and substituting in place thereof the figure "$1.14".

4. Table II of Appendix I to Article III is amended by deleting the following figures shown opposite Class 9—"$29.88, 29.88, 30.63, 23.73, 24.33, 0.3969, 0.3969, 0.3969, 0.3176 and 0.3176", respectively, and substituting in place thereof the following figures "$27.66, 28.26, 29.01, 22.43, 23.03, 0.3737, 0.3737, 0.3737, 0.2990, and 0.2990", respectively.

5. Subparagraph (vi) is added to section 4.2 (a) (3) to read as follows:

(vi) For sales of bulk or packaged American grape wines which are blends containing at least 25% Eastern regional grape wine.

6. The last sentence of section 4.2 (e) (1) is amended by inserting the word "discounts" between the words "that" and "allowances".

7. Paragraph (b) of Appendix AA to Article IV is redesignated (b) (1) and the headnote is amended to read as follows:

(1) *Procedure for establishing March 1942 maximum prices for packaged domestic wine other than California and American grape wine.*

8. Redesignated paragraph (b) (1) of Appendix AA is amended by inserting the phrase "except California and American grape wine" between the words "packaged domestic wine" and "to a customer of a particular class".

9. A new subparagraph (2) is added to paragraph (b) of Appendix AA to Article IV to read as follows:

(2) *Procedure for establishing adjusted March 1942 maximum prices for packaged California and American grape wine.* The processor's adjusted March 1942 maximum price per case for sales of an item of packaged California and American grape wine to a customer of a particular class is the highest price per case at which the processor sold or offered to sell the same item during March 1942 to a customer of the same class, in accordance with the processor's March 1942 customer classifications, adjusted in the following manner:

(i) Revise the price determined as above to include the applicable amount of Federal excise tax at rates in effect on November 2, 1942:

(ii) Deduct from the resulting figure at (i) the amount of any state or local excise tax included in the March 1942 price:

(iii) Multiply the resulting figure at (ii) by .75; and

(iv) Add to the resulting figure at (iii) the applicable amount of any state or local excise taxes effective prior to November 3, 1942;

(v) The resulting figure at (iv) is the processor's adjusted March 1942 maximum price per case for an item of packaged California or American grape wine; *Provided*, That the amount of any Federal, state or local excise taxes imposed is actually paid or has accrued and become payable by the processor to the proper taxing authorities or to any prior vendor.

NOTE: For addition of applicable Federal, state, or local excise taxes which became effective after November 2, 1942, see section 7.3 of Article VII.

10. The last sentence of paragraph (c) (2) of Appendix BB to Article IV is amended to read as follows: "Except as otherwise expressly provided in this regulation no amount shall be added for license fees, income taxes, franchise taxes, sales taxes, import taxes, export taxes, state processing taxes, and fees for affixing state stamps."

11. The last sentence of subparagraph (f) (5) (i) (b) of Appendix BB is amended to read as follows: "Transportation charges per case shall be determined by using an average weight of 37 pounds per case for cases containing 3 gallons or less and 48 pounds per case for cases containing over 3 gallons."

12. The explanation following the note at the end of subparagraph (f) (5) (i) (b) is amended to read as follows:

Explanation. Transportation charges under (b) above are calculated on the "base point system" and will result in any purchaser of a given class in a locality being able to buy any item of packaged California grape wine covered by this appendix at a generally uniform delivered price regardless of the location of his supplier. For example, the lowest regular published carload rate exclusive of Federal transportation tax from Bakersfield, California to Baltimore, Maryland, is 99¢ per cwt.. This is for a minimum weight load of 50,000 lbs.; other carload rates are published for lower minimum weight loads, but since these rates are higher than 99¢ per cwt., they may not be used in the calculation. $0.0099 per pound plus 3% Federal transportation tax equals $0.0102, which, at 37 lbs. per case for cases containing 3 gallons or less, equals $0.3774, or $0.38, per case. Thus, a purchaser in Baltimore is entitled to a delivered price in which transportation charges do not exceed $0.38 per case containing 3 gallons or less, regardless of whether his supplier is a New York bottler, a Baltimore bottler, or a California winery. If his supplier sells on an f. o. b. basis, the supplier must make such deductions from his prescribed uniform maximum price as will compensate the purchaser for actual transportation charges paid or payable by the purchaser (other than any amount paid for hauling, drayage, or handling within the metropolitan area of the purchaser's receiving point).

13. Tables I, II, III, IV, and V of Appendix BB to Article IV are redesignated tables II, III, IV, V, and VI, respectively, and a new Table I is added to read as follows:

TABLE I—CALIFORNIA AND AMERICAN GRAPE WINE

Case container	2 4 gallons		3 gallons			4 gallons	Other	
	12 4/5-quarts	24 4/5-pints	6 3/5-gallons	12-quarts	24 pints	4 1-gallon	12 30-ounce	12 24-ounce
KIND OF WINE								
Red table wine	$3.49	$4.09	$3.64	$3.69	$4.59	$4.32	$3.83	$3.37
White table wine	3.70	4.30	3.60	4.25	4.85	4.67	4.08	3.56
Light sweet wine	4.14	4.74	4.45	4.80	5.40	5.41	4.59	3.98
Dessert wine	4.86	5.46	5.35	5.70	6.30	6.61	5.44	4.65
Vermouth and other flavored dessert wines	6.68	7.28*	7.63	7.98	8.58	9.65	7.58	6.36

Domestic packaged grape wines to which this table is applicable are wines of the kind named which bear on their labels, in conjunction with the class or type designation, either no appellation of origin or else the appellations of origin "California", or subdivisions thereof, or the appellation of origin "American". Prices are f. o. b. processor's premises including Federal taxes at rates in effect on November 2, 1942. To determine delivered prices, apply Freight Method A for "California" wine, and Freight Method C for other wines. (See paragraph (f) (5) of this appendix.)

14. The heading of redesignated Table II is amended to read as follows:

TABLE II—WASHINGTON AND OREGON GRAPE WINE

15. The note following redesignated Table II is amended to read as follows:

NOTE: Domestic packaged grape wines to which this table is applicable are wines of the kind named which bear on their labels in conjunction with the class or type designation the appellation of origin "Washington," "Oregon," or sub-divisions thereof. Prices are f. o. b. processor's premises including Federal taxes at rates in effect on November 2, 1942. To determine delivered prices apply Freight Method B (see paragraph (f) (5) of this appendix).

16. Paragraph (a) of Appendix CC to Article IV is amended in the following respects:

(a) *Establishment of maximum prices under this appendix.* The provisions of this appendix are applicable to sales or deliveries of bulk domestic wine by any seller to retailers and consumers only. Sales or deliveries of bulk domestic wine by any seller to any class of customer except retailers and consumers are exempt from the provisions of this regulation and the General Maximum Price Regulation. Any seller of bulk domestic wine for his sales to retailers and consumers must establish a prescribed uniform maximum price under this appendix for his sales of any type of such wine for which a pricing table is contained in this appendix. A special maximum price may be established under Appendix DD for sales of bulk varietal or vintage wines to retailers and consumers and must be so established for sales of bulk varietal and vintage wines to retailers and consumers for which no pricing tables or pricing method is otherwise provided.

17. Paragraph (g) of Appendix CC to Article IV is revoked, and paragraphs (h) through (k) are redesignated (g) through (j), respectively.

18. Table I of Appendix CC to Article IV is amended to read as follows:

19. Redesignated subparagraph (i) of Appendix CC to Article IV is amended to read as follows:

(i) *Sales by wholesalers to retailers and consumers.* A wholesaler's maximum price per gallon for sales of bulk domestic wine to retailers and consumers shall be his net cost per gallon (instead of per case) for the wine, determined under section 5.3 of Article V (using as "supplier's price" the amount actually paid to the supplier but not in excess of the appropriate amount per gallon set forth in Table I) multiplied by 1.20 for sales to retailers or by 1.45 for sales to consumers.

20. The following sentence is added to paragraph (a) (1) (i) of Appendix EE to Article IV: "In making adjustments under this appendix for California or American grape wine the processor must first adjust his March 1942 maximum price in accordance with the provisions of paragraph (b) (2) of Appendix AA to Article IV."

21. Appendix FF to Article IV is revoked and sales or deliveries of Spanish type blending sherry, lees wine, and California grape concentrates by any seller to any class of customer are exempt from the provisions of this regulation and the General Maximum Price Regulation.

22. Section 5.4 (c) (2) is amended by adding at the end thereof the following:

Anything to the contrary herein contained notwithstanding, between December 31, 1945 and February 28, 1946, inclusive, a wholesaler shall not be required to refigure his maximum prices for items of California and American grape wine which he purchases during that period. However, on March 1, 1946 he shall refigure his maximum prices for each item of California and American grape wine, using as the basis for refiguring, his net cost for his most recent purchase of the item prior to March 1, 1946, and such refigured maximum prices shall become applicable in accordance with the provisions of section 5.4 (c) (4).

23. Section 5.5 (c) (2) is amended by adding at the end thereof the following:

Anything to the contrary herein contained notwithstanding, between January 31, 1946 and March 31, 1946, inclusive, a retailer shall not be required to refigure his maximum prices for items of California and American grape wine which he purchases during that period. However, on April 1, 1946 he shall refigure his maximum prices for each item of California and American grape wine, using as the basis for refiguring, his net cost for his most recent purchase of the item prior to April 1, 1946, and such refigured maximum prices shall become applicable in accordance with the provisions of section 5.5 (c) (4).

24. Section 5.6 (c) (2) is amended by adding at the end thereof the following: Anything to the contrary herein contained notwithstanding, between December 31, 1945 and March 31, 1946, inclusive, a monopoly state shall not be required to refigure its maximum prices for items of California and American grape wine which it purchases during that period. However, on April 1, 1946 it shall refigure its maximum prices for each item of California and American grape wine, using as the basis for refiguring, its net cost for its most recent purchase of the item prior to April 1, 1946, and such refigured maximum prices shall become applicable in accordance with the provisions of section 5.6 (c) (4).

25. Section 5.7 (c) (2) is amended by adding at the end thereof the following: Anything to the contrary herein contained notwithstanding, between December 31, 1945 and February 28, 1946, inclusive, a primary distributing agent shall not be required to refigure his maximum prices for items of California and American grape wine which he purchases during that period. However, on March 1, 1946 he shall refigure his maximum prices for each item of California and American grape wine, using as the basis for refiguring, his net cost for his most recent purchase of the item prior to March 1, 1946, and such refigured maximum prices shall become applicable in accordance with the provisions of section 5.7 (c) (4).

26. The last two sentences of section 7.8 (b) are revoked.

This amendment shall become effective on December 31, 1945, except that

NOTE: § 4001.2 amended by adding the proviso in paragraph (b) and the last two undesignated paragraphs.

§ 4001.2 *Authority of National War Labor Board.* The Board shall, subject to the provisions of sections 1, 2, 3, 4, and 8 of Title II of Executive Order No. 9250 of October 3, 1942, and except as otherwise provided in Executive Order No. 9299, of February 4, 1943, prescribing regulations and procedure with respect to wage and salary adjustments for employees subject to the Railway Labor Act, have authority to determine whether any:

(a) Wage payments, or

(b) Salary payments to any employees where the rate at which the salary, exclusive of bonuses and additional compensation and without regard to the contemplated adjustment, computed on an annual basis, is not in excess of $5,000 per annum and where such employee:

(1) In his relations with his employer is represented by a duly recognized or certified labor organization, or

(2) Is not employed in a bona fide executive, administrative, or professional capacity

are made in contravention of the act, or any rulings, orders or regulations, promulgated thereunder; *Provided*, That, on and after July 31, 1945, the National War Labor Board shall have exclusive authority, without regard to the limitations heretofore prescribed in paragraph (b) of this section, to make such determinations with respect to all wage or salary payments hereafter made to all personnel, both relief and regular crews, employed on all ships including dry cargo, tankers, barges and tow-boats engaged in off shore, coast-wire, harbor and inland waterways activities (outside of the Great Lakes area). Any such determination by the Board, made under rulings and orders issued by it, that a payment is in contravention of the Act, or any rulings, orders, or regulations promulgated thereunder, shall be conclusive upon all Executive Departments and agencies of the Government in determining the costs or expenses of any employer for the purpose of any law or regulation, either heretofore, or hereafter enacted or promulgated, including the Emergency Price Control Act of 1942 or any maximum price regulation thereof, or for the purpose of calculating deductions under the revenue laws of the United States or for the purpose of determining costs or expenses under any contract made by or on behalf of the United States. Any determination of the Board made pursuant to the authority conferred on it shall be final and shall not be subject to review by The Tax Court of the United States or by any court in any civil proceedings.

On and after July 31, 1945 no increase or decrease in any salary rate of employees employed on all ships in the shipping industry (excluding the Great Lakes area), as defined above, shall be made without the prior approval of the National War Labor Board.

PART 4003—SUBSIDIES; SUPPORT PRICES

ASSISTANCE TO PROCESSORS IN CONNECTION WITH 1945-CROP SUGARCANE IN LOUISIANA AND FLORIDA, 1946-CROP SUGARCANE IN PUERTO RICO, VIRGIN ISLANDS AND HAWAII, AND 1945 CROP SUGAR BEETS, AND SUGARS PRODUCED THEREFROM

The War Food Administrator, by letter and enclosures dated June 14, 1945, recommended that certain measures be authorized for the assistance of processors of 1945-crop sugarcane in Louisiana and Florida; of 1946-crop sugarcane in Puerto Rico, the Virgin Islands and the Territory of Hawaii; and of 1945-crop sugar beets. These measures would include, among other things: (a) the payment by Commodity Credit Corporation to processors of 1945-crop sugarcane in Louisiana and Florida and of 1946-crop sugarcane in Puerto Rico, the Virgin Islands and the Territory of Hawaii of a maximum amount of 15 cents per 100 pounds of raw sugar (96 degrees equivalent) derived from those crops; (b) the payment by Commodity Credit Corporation to processors of 1945-crop sugar beets of a maximum amount of 18 cents per 100 pounds of refined sugar derived from that crop, such payment to be in lieu of the previously-authorized payment of 12½ cents per 100 pounds of refined sugar, with respect to increased production costs, as authorized by Directive No. 36; and (c) the payment by Commodity Credit Corporation of certain excess freight costs for the movement of Louisiana and Florida raw sugar to other than the nearest refinery whenever such movement is considered necessary and directed by the Department of Agriculture.

I hereby find that the measures proposed to me by the War Food Administrator are necessary to effectuate the policy established by Executive Orders 9250 and 9328 and specifically to insure the maximum necessary production and distribution of raw and refined sugar to meet military, lend-lease and civilian requirements.

Accordingly, the Department of Agriculture is hereby authorized and directed to carry out, through the Commodity Credit Corporation, the measures described in the War Food Administrator's letter and the memorandum enclosed therewith.

Issued and effective this 31st day of July 1945.

Acting Director.

[Directive 71]

PART 4003—SUBSIDIES; SUPPORT PRICES

ASSISTANCE TO GROWERS IN CONNECTION WITH 1946-CROP SUGAR BEETS AND 1946-CROP CONTINENTAL AND DOMESTIC OFFSHORE SUGARCANE

The Secretary of Agriculture has, by letter dated July 25, 1945, recommended certain measures for the assistance of growers of sugar beets and growers of sugarcane in Louisiana, Florida, Puerto Rico, Virgin Islands and Hawaii. These measures include: (1) the assurance to growers of a national average return of not less than $13.50 per ton of sugar beets of the average quality of recent years, including payments under the Sugar Act of 1937 as amended. Assuming a continuation of present market conditions, this assurance will require a payment of approximately $4 per ton of beets of average quality; (2) the payment to the above-mentioned growers of sugarcane of $2.10 per ton of average sugarcane, equal in Louisiana to a payment in terms of "standard" sugarcane of $2.04 per ton. These programs, by providing growers a return substantially above that afforded by present sugar prices, are designed to increase domestic sugar production.

I hereby find that the measures proposed by the Secretary of Agriculture are necessary to effectuate the policy established by Executive Orders 9250 and 9328 and specifically to assure the maximum necessary production of sugar to meet military, civilian and lend-lease requirements.

Accordingly, the Department of Agriculture is hereby authorized and directed, subject to appropriate legislative authorization, to carry out, through the Commodity Credit Corporation, the measures described in the Secretary's letter and the memorandum enclosed therewith.

(E.O. 9250 and E.O. 9328, 3 CFR, Cum. Supp.)

Issued and effective this 30th day of July 1945.

Acting Director.

ORDER SETTING MATTER FOR HEARING

AUGUST 1, 1945.

It appears that:

(a) Puget Sound Power & Light Company (hereinafter referred to as the Applicant) having its principal business office in Seattle, Washington, on July 31, 1945, filed an application (Docket No. IT-5962), pursuant to section 203 of the Federal Power Act, for an order authorizing the Applicant to sell or otherwise dispose of all of its electric properties; an application (Docket No. IT-5963), pursuant to section 204 of the act, for an order authorizing the issuance of certain notes in the principal amount of $15,125,000, or in the alternative, to dismiss both applications for lack of jurisdiction inasmuch as Applicant is not a "public utility," as defined in section 201 of the act.

(b) There is now pending before the Commission a proceeding entitled In the Matter of Nelson J. Ambrose, et al., Docket No. ID-127, Puget Sound Power & Light Company, Intervenor, in which hearings have been held involving the issue of whether or not the Applicant is a "public utility" pursuant to section 201 of the act. This issue is also involved in the matter of Puget Sound Power & Light Company, Docket No. IT-5649, now pending before the Commission.

(c) Applicant requests that the Commission first determine whether or not it has jurisdiction over the Applicant as a "public utility" as defined in section 201 of the act before considering the merits of the applications referred to above, and further requests that the records in the proceedings mentioned in paragraph (b) above, and all sworn reports filed with the Commission by the Applicant and by The Washington Water Power Company be considered as a part of the record in this proceeding.

The Commission finds that: It is appropriate and in the public interest, in view of the circumstances related above, to consider first the public utility status of the Applicant pursuant to section 201 of the act before considering the merits of the applications described in paragraph (a), above.

The Commission orders that:

(a) A hearing be held commencing August 21, 1945, at 10:00 a. m. (e. w. t.) in the hearing room at the Federal Power Commission, Hurley Wright Building, 1800 Pennsylvania Avenue, N. (b) If the Applicant, or any person, desires to introduce evidence with respect to the question of whether the Applicant is or is not a "public utility," as defined in section 201, it shall on or before August 17, 1945, file with the Commission a notification of its desire to present such evidence. [Region II Order G-2 Under RMPR 251]

INSTALLED RE-SIDING AND RE-ROOFING AND RELATED AND INCIDENTAL CONSTRUCTION WORK IN SYRACUSE, N. Y. AREA

An opinion accompanying this order issued simultaneously herewith, has been filed with the Division of Federal Register.

In the judgment of the Regional Administrator of Region II of the Office of Price Administration, the maximum prices established and the Regulations prescribed by this order are generally fair and equitable, are necessary to effectuate the purposes of the Emergency Price Control Act of 1942, as amended, and Executive Orders Nos. 9250 and 9328, and do not exceed the general level of prices fixed by Revised Maximum Price Regulation No. 251.

Therefore, under the authority vested in the Regional Administrator of Region II of the Office of Price Administration by the Emergency Price Control Act of 1942, as amended, and by section 9 of Revised Maximum Price Regulation No. 251, this order is hereby issued.

SECTION 1. *Transactions covered by this order.* This order covers all sales of composition re-siding and re-roofing on an installed basis, together with accessories on residential structures in the area hereinafter described. It also includes related and incidental construction work when sold by installers of re-siding and re-roofing, whether such sale is made as a part of a general contract or not.

The term "composition re-siding" includes asphalt shingle re-siding, asbestos cement re-siding, insulated brick or stone re-siding and roll brick re-siding but shall not include wood shingles or wood re-siding.

The term "re-roofing" includes composition re-roofing such as asphalt shingles and mineral surface roll re-roofing and smooth surface roll re-roofing but does not include wood, metal or slate re-roofing.

The term "related" and "incidental" construction work means any installation of building materials or construction work other than installed re-roofing and re-siding, when sold by installers of re-roofing and re-siding.

SEC. 2. *Relationship of this order to Revised Maximum Price Regulation No. 251.*—(a) The provisions of this order supersede sections 6, 7 and 8 of Revised Maximum Price Regulation No. 251 with respect to sales of re-roofing and composition re-siding on an installed basis on residential structures and with respect to related and incidental construction work sold by installers of composition re-siding and re-roofing on an installed basis. All other provisions of Revised Maximum Price Regulation No. 251 are applicable to transactions subject to this order unless otherwise provided in this order.

(b) On and after the effective date of this order, regardless of any contract or other obligation, no person shall sell, offer to sell or deliver composition re-siding and re-roofing on residential structures on an installed basis or related and incidental construction work as herein defined at prices higher than the maximum prices established by this order; *Provided*, That deliveries made not more than thirty days after the effective date of this order on bona fide contracts executed prior to the effective date of this order shall not be considered to be violations of this order.

(c) An employer paying or about to pay labor rates higher than those in effect for him on the effective date of this order by reason of the predetermination of wage rates by the Secretary of Labor under the Davis-Bacon Act or any order or authorization of the Wage Adjustment Board, National War Labor Board or Economic Stabilization Director, may file an application for an amendment of this order to reflect such increased labor rates. Such a petition for amendment shall conform in all respects to the provisions of Revised Procedural Regulation No. 1, except that it shall be filed with the New York Regional Office of the Office of Price Administration.

SEC. 3. *Applicability.* This order shall apply in the Syracuse, N. Y. area which includes the counties of St. Lawrence, Jefferson, Oswego, Wayne, Seneca, Cayuga, Onondaga, Madison, Herkimer, Oneida, Ontario and Lewis, all in the States of New York.

WAR MANPOWER COMMISSION.

HAMILTON, OHIO, AREA

MINIMUM WARTIME WORKWEEK

Designation of the Hamilton, Ohio, Area as subject to Executive Order No. 9301.

By virtue of the authority vested in me as Regional Manpower Director of Region No. V by § 903.2 of War Manpower Commission Regulation No. 3, "Minimum Wartime Workweek of 48 Hours" (8 F.R. 7225), and having found that such action will aid in alleviating labor shortages which are impeding the war effort, I hereby designate the Hamilton, Ohio, Area as subject to the provisions of Executive Order No. 9301.

1. For the purposes of this designation, the Hamilton Area shall include:

All of Butler County (except Lemon and Madison Townships).

All of Warren County (except Franklin Township).

2. The effective date of this designation is August 1, 1945.

3. Not later than the effective date, each employer in the Hamilton Area shall, in accordance with War Manpower Commission Regulation No. 3:

(a) Extend to a minimum wartime workweek of 48 hours, the workweek of any of his workers whose workweek can be so extended without involving the release of any worker;

(b) If extension of the workweek of any of his workers to a minimum wartime workweek of 48 hours would involve the release of any workers, submit to the Area Manpower Director the number and occupational classification of the workers whose release would be involved, together with proposed schedules for their release, and thereafter extend such workweek when and as directed in schedules authorized by the War Manpower Commission;

(c) File an application for a minimum wartime workweek of less than 48 hours for those workers engaged in employment in which the employer claims that a workweek of 48 hours would be impracticable in view of the nature of the operations, would not contribute to the reduction of labor requirements, or would conflict with any Federal, State or local law or regulation limiting hours of work. Such applications must be filed before July 30, 1945.

Date of issuance: July 9, 1945.

E. L. KEENAN,
Regional Director.

(b) A "designated landing area" is an area designated by the Administrator as a regular base of operation for aircraft during the period of national emergency.

(c) A "local flying area" is an area in the vicinity of a designated landing area, including any channel leading thereto, recorded by the Administrator after coordination with all local interests, and with the defense commander if within a vital defense area, for nonexclusive use of local aircraft operations emanating from that designated area.

PART 803—GENERAL ORDERS

APPROVAL OF INCREASES IN WAGES AND SALARIES

The National War Labor Board has amended its General Order No. 7 to read as follows:

§ 803.7 *Approval of increases in compliance with Fair Labor Standards Act.* Since Title VI, section 1 of Executive Order No. 9250, dated October 3, 1942, states that "nothing in this order shall be construed as affecting the present operation of the Fair Labor Standards Act", and since statutes and orders of the duly constituted authorities of the several states fixing minimum rates for certain types of workers carry out the true purposes and intent of the Fair Labor Standards Act, and are designed and intended to eliminate substandards of living within the meaning of section 2 of Title II of Executive Order No. 9250, the National War Labor Board hereby approves increases in wage and salary rates made in compliance with such statutes and orders: *Provided however,* That if any changes in such statutes or orders are made or promulgated after April 8, 1943, increases directed thereby which would result in a wage or salary rate in excess of the rate which the War Labor Board establishes as a minimum wage rate by General Order No. 30, may not be made without the approval of the Board.

§ 903.50 *Supplementary Directive No. 1-X; delegation of authority to the Office of Price Administration with reference to the rationing of passenger automobiles*—(a) *Supplementary Directive 1-A revoked.* Supplementary Directive 1-A is hereby revoked.

(b) *Rationing authority over passenger automobiles transferred to Office of Price Administration.* In order to permit the efficient rationing of passenger automobiles, the authority delegated to the Office of Price Administration by Directive 1 (§ 903.1) is hereby extended to the exercise of control over the sale, transfer or other disposition of passenger automobiles by any person to any other person, and the use or alteration of passenger automobiles by any person, including without limitation (1) the Army and Navy of the United States, the United States Maritime Commission, the Panama Canal, the Coast and Geodetic Survey, the Coast Guard, the Civil Aeronautics Administration, the National Advisory Committee for Aeronautics, the Office of Scientific Research and Development and (2) Government agencies or other persons acquiring such products for export to or for use in any foreign country.

(c) *Limitations on the authority delegated.* The power, authority and discretion hereby delegated to the Office of Price Administration in respect to the rationing of passenger automobiles shall be subject to the terms and conditions specified in said Directive 1, insofar as they are not inconsistent with this Supplementary Directive 1-X, and shall be exercised under the following conditions:

(1) Quotas have been or may be established by the War Production Board from time to time, fixing the number of passenger automobiles to be made available from the existing stockpile of such vehicles and from new production to various Government agencies. The quota established for any agency may not be altered except by the War Production Board. Within the limits of its own quota each such agency shall determine the use to which its passenger automobiles are to be put and the Office of Price Administration shall not refuse to authorize the transfer of a passenger automobile to such agency on any ground other than that its particular quota has been exhausted.

(2) Quotas have been or may be established by the War Production Board from time to time, fixing the number of passenger automobiles to be made available from the existing stockpile of such vehicles and from new production to the Office of Defense Transportation for meeting essential civilian needs. Subject only to whatever quota may be established, the Office of Price Administration shall authorize the transfer, sale, delivery, use, alteration or other disposition of passenger automobiles pursuant to such orders and regulations and pursuant to such standards of eligibility and need as it may deem necessary in the public interest and to promote the national defense.

(3) The Office of Price Administration shall exercise no authority over the production of passenger automobiles produced after the effective date of this Directive 1-X or their distribution by manufacturers to distributors and dealers. Nor shall it require from manufacturers any reports concerning such production and distribution.

(4) The authority of the Office of Price Administration shall include the power to regulate or prohibit the sale, transfer, delivery or other disposition of passenger automobiles to, or the acquisition, use, alteration or other disposition of passenger automobiles by, any person who has acted in violation of any rationing regulation or Order prescribed by the Office of Price Administration.

(d) *Reports to War Production Board.* The Office of Price Administration shall furnish reports at monthly intervals to the War Production Board covering the number of passenger automobiles transferred from each of the established quotas, and shall furnish such other reports as may be required by the Board.

(e) *Definition.* "Passenger automobile" means any automobile, built upon a standard or lengthened passenger car chassis having a seating capacity of not more than ten (10) persons, including station wagons, taxicabs, and coupes with or without pickup boxes, but not including ambulances, hearses, or sedan deliveries.

(f) *Modification of this Directive 1-X.* The War Production Board may from time to time amend this Directive 1-X in such manner and to such extent as it may determine to be necessary. This directive modifies Directive 1 (§ 903.1) to the extent applicable and supersedes the delegation of authority to the Office of Price Administration made by Supplementary Directive No. 1A (§ 903.2), as amended: *Provided, however,* That all action heretofore taken (including without limitation, regulations or orders heretofore issued) by the Office of Price Administration pursuant to Supplementary Directive No. 1A as originally issued and amended, is hereby ratified, approved and confirmed, and the authority so delegated shall continue to remain in full force and effect with respect to all such action which is not inconsistent with the terms of this directive, for all purposes including the purpose of allowing or sustaining any suit, action, prosecution or administrative or other proceeding heretofore or hereafter commenced with respect to any violation heretofore committed or right or liability heretofore incurred under or pursuant to the terms thereof.

Issued this 3d day of August 1945.

The responsible officers of the corporation were familiar with the provisions of Conservation Order M-217 and their actions constituted a wilful violation thereof. The manufacture of such shoes has diverted scarce materials to uses not authorized by the War Production Board. In view of the foregoing, it is hereby ordered that:

§ 1010.855 *Suspension Order No. S-855.* (a) In the production period from March 1, 1945, to August 31, 1945, the quota of Kirkendall Boot Company for the manufacture of men's dress shoes in the $8.25 to $9.07 price range shall be 458 pairs less than it otherwise would be under the provisions of Conservation Order M-217.

(b) In the production period from March 1, 1945, to August 31, 1945, the quota of Kirkendall Boot Company for the manufacture of men's dress shoes in the $7.20 to $7.92 price range shall be 513 pairs less than it otherwise would be under the provisions of Conservation Order M-217.

GILBOARD REFRIGERATION CO.

Morris Gilboard, doing business as Gilboard Refrigeration Company, engaged in the manufacture, sale and repair of commercial refrigeration units in Lawrence, Massachusetts, was charged by the War Production Board with having, between January 1, 1944 and April 4, 1945, purchased new refrigeration equipment in the amount of $13,000 by means of the improper extension of ratings in violation of Priorities Regulation No. 3 and War Production Board Order P-126, thereby enabling him to assemble this equipment with other items and to sell the same in violation of War Production Board Limitation Order L-38; with having made misrepresentations to the War Production Board in connection with his operations; with having, on June 24, 1944, extended a preference rating in purchasing 13 blowers valued at $600 in violation of Priorities Regulation No. 3; and with having failed to keep accurate and complete records as required by Priorities Regulation No. 1. These violations were grossly negligent.

These violations have diverted critical materials to uses not authorized by the War Production Board. In view of the foregoing, it is hereby ordered, that:

§ 1010.859 *Suspension Order No. S-859.* (a) Morris Gilboard, doing business as Gilboard Refrigeration Company or otherwise, shall not for one year from effective date of this order, apply or extend any preference rating or use any CMP allotment symbols to obtain delivery of any refrigerating system, equipment or parts regardless of the delivery date named in any purchase order to which such ratings may be applied or extended or on which CMP allotment symbols are used unless otherwise authorized in writing by the War Production Board: *Provided, however,* That said Morris Gilboard, doing business as Gilboard Refrigeration Company, may apply or extend any preference rating for the purpose of obtaining necessary items for the maintenance and repair of compressors, fans or coils for refrigeration equipment actually in operation but not for the purpose of enlarging the size or capacity of such compressors, fans or coils.

(b) Nothing contained in this order shall be deemed to relieve Morris Gilboard from any restriction, prohibition, or provision contained in any other order or regulation of the War Production Board except insofar as the same may be inconsistent with the provisions hereof.

PART 1010—SUSPENSION ORDERS

[Suspension Order S-860]

CONNELL SALES CO.

Connell Sales Company is a partnership composed of Owen W. Connell and Miriam E. Connell engaged, since January 1943, as jobbers and manufacturers' agents in selling merchandise of various kinds to Ship's Service Stores, Army and Marine Post Exchanges. The principal place of business of the partnership is located at 420 Market Street, San Francisco, California. Between May 16, 1944 and June 19, 1944, the company improperly extended preference ratings on four of its purchase orders for the acquisition of approximately 616 leather utility kits, and between May 11, 1944 and July 13, 1944, the company improperly certified 25 of its purchase orders as "Navy Contract" for acquiring 3,683 leather utility kits in violation of Priorities Regulation No. 3 and Priorities Regulation No. 1, respectively. These violations were the result of gross negligence on the part of O. W. Connell, amounting to wilfulness, tending to cause and probably causing diversion of essential materials to uses unauthorized by the War Production Board and have interfered with the controls established by the War Production Board for the distribution of critical materials. In view of the foregoing, it is hereby ordered, that:

§ 1010.860 *Suspension Order No. S-860.* (a) Owen W. Connell and Miriam E. Connell shall not for sixty days from the effective date of this order apply or extend any preference ratings, regardless of the delivery date named in any purchase order to which such ratings may be applied or extended.

(b) Owen W. Connell and Miriam E. Connell shall cancel immediately all preference ratings which they have applied or extended to orders which have not yet been filled, except that if they have extended a customer's rating to get an item for delivery without change in form to that customer (as distinct from replacing it in inventory), they need not cancel the rating; *Provided,* The item, when received, is promptly delivered to the customer whose rating was extended.

(c) All preference ratings presently outstanding in connection with orders for delivery of materials to Owen W. Connell and Miriam E. Connell or placed prior to September 24, 1945 are void and shall not be given any effect by their suppliers or by any other person. This does not apply to material already delivered or in transit for delivery on the effective date of this order.

(d) The restrictions and prohibitions contained herein shall apply to Owen W. Connell and Miriam E. Connell whether doing business as Connell Sales Company or under any other name, their successors or assigns or persons acting in their behalf. Prohibitions against taking of any action include the taking indirectly as well as directly of any such action.

(e) Nothing contained in this order shall be deemed to relieve Connell Sales Company, its successors or assigns, from any restriction, prohibition or provision contained in any other order or regulation of the War Production Board except insofar as the same may be inconsistent with the provisions hereof.

ST. ANNE FREEZING AND PROCESSING CO.

Mary Lucido Harder is an individual doing business as St. Anne Freezing and Processing Company and in that capacity she owns a fish processing plant located at Pier #92 in the City and County of San Francisco, California. Mary Lucido Harder applied to the War Production Board for authorization to construct a wharf, decking and piling, a one-story frame building and an electric power line at a cost not to exceed $23,250 to be used for drying, salting, pickling, smoking and freezing of fish as well as for the reduction of fish. The application was approved and authorization granted for the project with the elimination of the fish reduction plant. Notwithstanding, the respondent proceeded on or about July 15, 1944 and thereafter to construct the project with the fish reduction plant. Certain of the materials used therein were obtained by extending priorities ratings in violation of Priorities Regulation No. 1, Section 944.11. Mary Lucido Harder was aware of War Production Board restrictions on construction, and the construction of the project and the installation of machinery for a fish reduction plant, and the unauthorized extension of priorities ratings, constituted wilful violation of L-41 and Priorities Regulation No. 1.

This violation has diverted critical material to uses not authorized by the War Production Board and has hampered and impeded the war effort of the United States. In view of the foregoing, it is hereby ordered, that:

§ 1010.863 *Suspension Order No. S-863.* (a) For a period of one year, Mary Lucido Harder, doing business as St. Anne Freezing and Processing Company, or otherwise, her heirs, assigns, agents and employees, shall not use the facilities located at Pier 92, San Francisco, California, that is, the construction and equipment built and installed by Respondent in that location as a fish reduction plant, or use said facilities to reduce offal or whole fish: *Provided, however,* That said facilities may be used to reduce offal produced from salting and fish freezing operations conducted on said premises;

(b) Nothing contained in this order shall be deemed to relieve Mary Lucido Harder from any restriction, prohibition or provision contained in any other order or regulation of the War Production Board, except insofar as the same may be inconsistent with the provision hereof;

(c) Prohibition against taking any action includes the taking indirectly as well as directly of any such actions;

The violations with respect to the photomounts were wilful and the violations with respect to the albums were grossly negligent.

This excessive use of paper has diverted scarce materials to uses not authorized by the War Production Board. In view of the foregoing, it is hereby ordered, that:

§ 1010.867 *Suspension Order No. S-867.* (a) The Housh Company, Inc., during each of the third and fourth quarters of 1945 and the first and second quarters of 1946, shall reduce its consumption of paper and paperboard to 20,000 pounds per quarter: *Provided,* That it may use any of said 20,000 pounds up to 17,442 pounds per quarter for conversion into albums and any part of said 20,000 pounds up to 18,021 pounds per quarter for conversion into photomounts: *And provided further,* That if by amendment to Conservation Order M-241-a or by any other order of the War Production Board, the Housh Company, Inc.'s quota for albums is reduced below 17,442 pounds per quarter or its quota for photomounts is reduced below 18,021 pounds per quarter such more restrictive quota shall prevail.

(b) Nothing contained in this order shall be deemed to relieve The Housh Company, Inc., its successors or assigns, or persons acting on its behalf, from any restriction, prohibition, or provision contained in any other order or regulation of the War Production Board except insofar as the same may be inconsistent with the provisions hereof.

The responsible officials of the Company were aware of the provisions of General Conservation Orders M-317 and M-317B and these diversions constituted wilful violations of these Orders.

During the first, second and third calendar quarters of 1944 and the first calendar quarter of 1945, her responsible agents used or caused to be used 865.62 tons of print paper in excess of the quota of print paper which The Washington Times-Herald was permitted to consume under Limitation Order L-240, in violation of that order.

These violations of Limitation Order L-240 diverted critical materials to uses not authorized by the War Production Board. In view of the foregoing, it is hereby ordered that:

§ 1010.874 *Suspension Order No. S-874.* (a) During the fourth calendar quarter of 1945 and the first three calendar quarters of 1946, unless otherwise specifically authorized in writing by the War Production Board, Eleanor Patterson shall reduce her consumption of print paper in the amount of 215 tons per quarter below her permissible consumption under Limitation Order L-240 as amended from time to time.

(b) The restrictions and prohibitions contained herein shall apply to Eleanor Patterson, doing business as The Washington Times-Herald or otherwise, her successors and assigns, and persons acting on her behalf. Prohibitions against the taking of any action include the taking indirectly as well as directly of any such action.

(c) Nothing contained in this order shall be deemed to relieve Eleanor Patterson from any restriction, prohibition or provision contained in any other order or regulation of the War Production Board, except insofar as the same may be inconsistent with the provisions hereof.

Issued this 3d day of August 1945.

PART 1010—SUSPENSION ORDERS

[Suspension Order S-875]

LEONARD TISSUE CO.

The Leonard Tissue Company, 535 Windsor Street, Cambridge, Massachusetts, is a partnership composed of Samuel, Manuel, and Joseph Sugarman. It is engaged in the business of manufacturing domestic and industrial paper towels, napkins, etc., from pulp, paper, and paperboard. During the calendar year 1944 it consumed in the manufacture of towels for home use 71.1 tons of paper in excess of the amount authorized by General Conservation Order M-241-a and in violation of that order. The responsible partners had knowledge of General Conservation Order M-241-a and this violation was at least grossly negligent.

This violation has diverted critical material into uses not authorized by the War Production Board, and in view of the foregoing, it is hereby ordered that:

§ 1010.875 *Suspension Order No. S-875.* (a) Samuel, Manuel, and Joseph Sugarman, doing business as Leonard Tissue Company, shall not for a period of one year from the effective date of this order, consume any pulp, paper or paperboard in the manufacture or assembly of towels for home use except that any paper actually on the premises at 535 Windsor Street, Cambridge, Massachusetts, on the effective date of this order may be consumed in the manufacture or assembly of towels for home use.

(b) The restrictions and prohibitions contained herein shall apply to Samuel, Manuel and Joseph Sugarman, doing business as Leonard Tissue Company or otherwise, their successors or assigns, or persons acting on their behalf. Prohibitions against the taking of any action include the taking indirectly as well as directly of any such action.

(c) Nothing contained in this order shall be deemed to relieve Samuel, Manuel, and Joseph Sugarman, doing business as Leonard Tissue Company, from any restriction, prohibition or provision contained in any other order or regulation of the War Production Board except insofar as the same may be inconsistent with the provisions hereof.

(d) This order shall take effect on August 3, 1945.

Issued this 27th day of July 1945.

Recording Secretary.

Scope

§ 3133.6 *Limitation Order L-240*—(a) *The purpose of this order.* This order does two things: First, it limits the tonnage of print paper which may be used by a publisher in printing a newspaper. This is called his "consumption quota". Second, it limits the tonnage of print paper which may be ordered or accepted by a newspaper publisher. This is called his "delivery quota". A publisher's consumption quota is on a quarterly basis and his delivery quota is on a monthly basis.

Definitions and Explanations

(b) *Newspaper.* "Newspaper" means any publication generally recognized as a newspaper in the newspaper industry, regardless of the frequency of issuance. The term includes all supplements, inserts and other printed matter physically incorporated into a newspaper or delivered together with it.

Where two or more newspapers are published by the same publisher, whether in the same city or in different cities, each newspaper shall operate under a separate consumption quota and a separate delivery quota. In computing his consumption quota a publisher must make separate calculations for morning, evening and Sunday editions, but these figures must be consolidated into a single consumption quota for each newspaper, in accordance with the instructions contained in paragraph (k).

However, morning, evening, Sunday and other editions of the same newspaper shall operate under a single consumption quota and a single delivery quota.

In determining whether a publisher issues separate newspapers or separate editions of the same newspaper, the number and form of the reports filed by the publisher with the Audit Bureau of Circulations in 1941 will be controlling, in the absence of special circumstances. Thus, if a publisher in 1941 filed consolidated statements with the Audit Bureau of Circulations covering morning, evening and Sunday issues, even if these issues had different names, different formats and different staffs, they will ordinarily be considered as a single newspaper for the purposes of this order. If a publisher in 1941 filed separate statements with the Audit Bureau of Circulations covering his morning, evening, Sunday and other publications, they will ordinarily be considered as separate newspapers for the purposes of this order.

If a publisher is uncertain as to whether or not his publication is a newspaper as defined in this order, he may ask the War Production Board for an official determination. The War Production Board may also make this determination upon its own motion. Such a determination, issued to the publisher in the name of the Recording Secretary of the War Production Board, shall be conclusive for the purposes of this order, unless revoked or modified by the same authority.

(c) *Camp papers and free distribution publications.* Army or Navy camp, post, station or unit "newspapers" or news sheets generally are not recognized as newspapers in the newspaper industry. They are covered by Order L-241 (commercial printing). Shopping guides, want ad periodicals and publications in newspaper format distributed free or at nominal cost also are not recognized as newspapers within the meaning of this order and are governed by Order L-241, Schedule II. If a publisher issued a free distribution newspaper in 1941, his consumption quota shall be determined in accordance with Schedule II to Order L-241 and that order shall govern even if the circulation of the publication has subsequently been changed in whole or in part to a net paid basis.

(d) *Publisher.* "Publisher" means a person who publishes a newspaper, including an individual, partnership, association, business trust, corporation, governmental corporation or agency, or any organized group of persons whether incorporated or not.

(e) *Print paper.* "Print paper" means any grade, quality, type or basis weight of paper used in publishing a newspaper. The term includes paper reclaimed wholly or partly from printed or unprinted waste, as well as paper made entirely from virgin fiber. It also includes roll wrappers, newsprint used as wrappers, identification sheets and labels for newspapers, and production waste, whether or not this waste is subsequently salvaged for other uses.

(f) *Use.* All production waste shall be included in the tonnage of print paper "used" in printing a newspaper. Transit damage shall not be included in a publisher's "use" of print paper. A publisher may determine the dates on which paper is "used" under this order either on the basis of the dates when the paper is actually printed or the dates appearing on the respective issues of the newspaper, provided he continues to use the same method which he used in computing his 1941 base tonnages.

(g) *Net paid circulation.* "Net paid circulation" means the number of copies of a newspaper which have been sold (exclusive of bulk sales), as audited by the Audit Bureau of Circulations or (in the case of newspapers which are not members of the Audit Bureau of Circulations) as verified in accordance with the standards of the Audit Bureau of Circulations of January 1, 1942.

(h) *Inventory.* "Inventory" means all the print paper which is owned by a publisher or is available for his use. It includes the print paper which he has on hand, in storage, and in transit and paper held for his use by a paper merchant, warehouseman or other person, regardless of its physical location. However, it does not include print paper shipped by water and held in warehouse by a paper manufacturer or merchant as part of the inventory of the manufacturer or merchant; such paper does not become part of a publisher's inventory until it is delivered to him.

(i) *Transfer of quotas*—(1) *Quotas established by different orders.* Quotas provided by one War Production Board order may not be used for the purposes set forth in any other order. Thus, for example, a publisher may not use for the printing of a newspaper any part of a consumption quota established under Orders L-241 (commercial printing), L-244 (magazines) or L-245 (books) and he may not permit any part of his consumption quota established under this order to be used for commercial printing, magazines or books. If a newspaper publisher also conducts a job printing business, he must keep these two operations separate for quota purposes. The amount of print paper which he is permitted to consume and the amount which he is permitted to order or accept for the publication of his newspaper is limited by this order. The amount of print paper which he is permitted to consume and the amount which he is permitted to accept for his commercial printing business is limited by Order L-241.

(2) *Transfer of quotas to different persons.* The rules governing the assignability of quotas are set forth in Priorities Regulation 7a.

Consumption Quota

(j) *Allowable consumption.* In the third quarter of 1945 and in each calendar quarter after that, no publisher may use or cause to be used, in the publication of a newspaper, print paper in excess of:

(1) His quarterly consumption quota, which shall be computed in accordance with the instructions set forth in paragraph (k) or (m) plus

(2) Any less-than-quota savings carried over from previous calendar quarters, as provided in paragraph (l), plus

(3) Ex-quota tonnage, if any, which may have been granted on appeal for consumption in that quarter.

(k) *Computation of consumption quota*—(1) *Base tonnages.* Ascertain, separately, the tonnage of print paper comprising the net paid circulation of morning, evening, Sunday or other issues of the newspaper in the corresponding quarter of 1941. Add 3 per cent to each figure. (This 3 per cent is an arbitrary allowance to compensate for production waste and should be added whether the actual production waste in 1941 was greater or less than 3 per cent). These are the "base tonnages" for morning, evening, Sunday or other issues of the newspaper, which shall be adjusted in accordance with instructions 2, 3, and 4.

(2) *Circulation increase.* Ascertain, separately, the percentage increase or decrease in average net paid circulation of morning, evening, Sunday or other issues of the newspaper in the calendar year 1942 as compared with the calendar year 1941. (The average net paid circulation for each year shall be determined by adding together the average net paid circulation for each of the four quarters of the year and dividing by four).

(3) *Tonnage equivalent of circulation increase.* Apply, separately, the respective percentages of circulation increase or decrease determined under instruction number 2 to the respective base tonnages determined under instruction number 1 for morning, evening, Sunday or other issues of the newspaper.

(4) *Adjustment of base tonnages.* Adjust the respective base tonnages determined under instruction number 1 by adding or subtracting the number of tons represented by the percentage circulation gain or loss determined under instruction number 3.

(5) *Total adjusted base tonnage.* Total the respective base tonnages for morning, evening, Sunday or other issues of the newspaper determined under instruction number 1. Total the respective adjusted base tonnages for morning, evening, Sunday, or other issues of the newspaper determined under instruction number 4. The larger of these two totals is the publisher's "total adjusted base tonnage" from which the required reductions shall be applied.

(6) *Sliding scale of reductions.* Reduce the total adjusted base tonnage by the following sliding scale of percentage cuts:

(i) Deduct 3% of the amount over 25 tons but not over 125 tons.
(ii) Deduct 6% of the amount over 125 tons but not over 250 tons.
(iii) Deduct 9% of the amount over 250 tons but not over 500 tons.
(iv) Deduct 15% of the amount over 500 tons but not over 1000 tons.
(v) Deduct 18% of the amount over 1000 tons.

(7) *Consumption quota.* The balance remaining after subtraction of the above reductions from the total adjusted base tonnage determined under instruction

number 5 is the publisher's consumption quota for the quarter.

(8) *Adjustment for print paper lighter than 32-pound basis weight.* If a publisher orders print paper lighter than 32-pound basis weight, his consumption quota for the current calendar quarter shall be reduced proportionately as follows: First, determine the percentage by which 32-pound paper exceeds such lighter paper in weight. Second, multiply the tonnage of lighter paper so ordered by this percentage. Third, subtract the result from the publisher's consumption quota. For example, if a publisher has a consumption quota of 200 tons and orders 100 tons of 30-pound basis weight paper, his consumption quota shall be reduced by 6⅔ tons, since 32-pound paper is 6⅔% heavier than 30-pound paper.

(9) *Fourteenth Sunday in third quarter of 1945.* Inasmuch as there are 14 Sundays and 78 weekdays in the third quarter of 1945, compared with 13 Sundays and 79 weekdays in the third quarter of 1941 and 1944, the publisher of a daily and Sunday newspaper may increase his consumption quota in the third quarter of 1945 by the excess of his average Sunday use of print paper in the third quarter of 1944 over his average weekday use of print paper in the third quarter of 1944. The publisher of a newspaper issued only on Sundays may increase his consumption quota in the third quarter of 1945 by one-thirteenth of his allowable use of print paper in the third quarter of 1944. No publisher may increase his delivery quota because of any additional tonnage he may use for the fourteenth Sunday in the third quarter of 1945.

(l) *Carry-over.* If a publisher uses less print paper than he is permitted to use in the fourth quarter of 1943, or in any calendar quarter after that, he may add this tonnage to his consumption quota but not to his delivery quota, in any succeeding quarter. This paragraph does not apply to the print paper which a publisher is permitted to use under paragraph (m) (2).

(m) *Consumption quotas for certain types of newspapers.* Excepted from the provisions of paragraph (k) are certain types of newspapers described in this paragraph (m), whose consumption quotas shall be computed as follows:

(1) *Special types of newspapers.* Any newspaper containing the equivalent of 8 standard-size pages or less which is authorized to be admitted to the mails as second-class matter under the provisions of section 521 of the Postal Laws and Regulations of 1940 (Title 39, U. S. C., sec. 229) pertaining to the publications of benevolent, fraternal, trades-union, professional, literary, historical, and scientific organizations and societies shall have a consumption quota of print paper in any calendar quarter equal to either:

(i) Its quarterly consumption of print paper in any one of the first three calendar quarters of 1944; or

(ii) Its consumption of print paper in the corresponding calendar quarter of 1943. If the publisher selects this latter method in any calendar quarter, he may increase his consumption quota in that quarter by that percentage by which the average number of copies per issue in the third quarter of 1944 exceeds the average number of copies per issue in the corresponding calendar quarter of 1943. For example, if a newspaper's consumption of print paper in the first quarter of 1943 was 5 tons with an average press-run in that quarter of 5,000 copies per issue, and its average press-run in the third quarter of 1944 was 6,250 copies per issue, his consumption quota for the first calendar quarter of 1945 is 6¼ tons.

(2) *Small newspapers.* During the third calendar quarter of 1945 and in each calendar quarter after that, any person may use or cause to be used 5 tons of print paper for a newspaper published weekly or less frequently, 6¼ tons of print paper for a newspaper published semi-weekly, 7½ tons of print paper for a newspaper published tri-weekly, 8¾ tons of print paper for a newspaper published four times a week, 10 tons of print paper for a newspaper published 5 times a week, 11¼ tons of print paper for a newspaper published 6 times a week, or 12½ tons of print paper for a newspaper published 7 times a week. It makes no difference whether he used that much print paper or any print paper in the publication of a newspaper during any previous period.

(3) *Other newspapers using less than 25 tons per quarter.* If, prior to October 1, 1944, a publisher used less than 25 tons of print paper per calendar quarter for civilian readers (whether or not he used additional paper for military readers), his total quarterly consumption quota for all types of readers shall be computed as follows:

(i) Ascertain the total number of copies of all issues printed in each of the seven calendar quarters between January 1, 1943 and September 30, 1944.

(ii) Ascertain the average number of pages per issue printed in each of the seven calendar quarters between January 1, 1943 and September 30, 1944.

(iii) Multiply the highest quarterly figure determined under subdivision (i) by the highest quarterly figure determined under subdivision (ii). The weight of paper required to produce this number of pages is the publisher's quarterly consumption quota; *Provided, however*, That if this figure is in excess of 25 tons, the publisher shall be limited to 25 tons per quarter plus the tonnage in excess of 25 tons which he used for military circulation in the third quarter of 1944.

(n) *Allotment to Army and Navy.* (1) The War Production Board may from time to time allot to the Army and the Navy a specified tonnage of paper to be consumed in printing (i) newspapers acquired in bulk for free distribution by the Army or the Navy which will be furnished to United States Armed Forces personnel in the continental United States and (ii) "servicemen's" "overseas", "pony", or other condensed editions of newspapers acquired in bulk by the Army or the Navy which will be furnished to United States Armed Forces personnel overseas.

(2) From this allotment the Army and the Navy, under a delegation of authority from the War Production Board, may grant to individual publishers the right to add to their consumption quotas the tonnage of paper consumed in printing such newspapers acquired by the Army and the Navy for distribution as described under paragraph (n) (1). This allotment does not cover purchases of newspapers by military exchanges or service departments as defined in Priorities Regulation 17 for distribution within the continental limits of the United States. All newspapers sold to the military shall be charged against the publisher's consumption quota unless the publisher has received a specific grant from the Army or the Navy pursuant to this paragraph.

Delivery Quota

(o) *Computation of delivery quota.* In July 1945, and in each calendar month after that, no publisher may order or accept delivery of print paper in excess of his monthly delivery quota, which shall be computed in accordance with the following instructions:

(1) *Monthly base.* Total the publisher's consumption quotas for the third and fourth quarters of 1945 and add the ex-quota tonnage, if any, which may have been granted for the third quarter of 1945. Divide by 6. (Do not add any carry-over from preceding quarters.)

(2) *Inventory ceiling.* The above amount shall be reduced accordingly if a publisher's inventory is, or by virtue of such order or acceptance will become, on December 31, 1945, greater than: (i) 30 days' supply for publishers in the states named in List A, (ii) 50 days' supply for publishers in the States named in List B, or (iii) 60 tons for publishers who would be limited to a smaller amount by subdivision (i) or (ii) above.

List A

Connecticut.	Nebraska.
District of Columbia.	New Hampshire
Delaware.	New Jersey
Illinois.	New York.
Indiana.	North Dakota
Iowa.	Ohio.
Kansas.	Pennsylvania.
Kentucky.	Rhode Island.
Maine.	South Dakota.
Maryland.	Vermont.
Massachusetts	Virginia.
Michigan.	West Virginia
Minnesota.	Wisconsin.
Missouri.	

List B

Alabama.	Nevada.
Arizona.	New Mexico.
Arkansas.	North Carolina
California	Oklahoma.
Colorado.	Oregon.
Florida.	South Carolina
Georgia.	Tennessee.
Idaho	Texas
Louisiana.	Utah.
Montana.	Washington
Mississippi.	Wyoming.

3. *Exclusions.* In computing his monthly base under paragraph (o) (1), and in computing the maximum tonnage which he may have in his inventory on December 31, 1945 in accordance with paragraph (o) (2), a publisher shall exclude any less-than-quota savings under his consumption quota carried over from previous quarters. He shall also exclude print paper which he has received by Great Lakes or coastal water-borne shipments; provided on May 1 of any calendar year he shall have on hand or available for use not more than (i) a 30 days' supply if he is located in one of the States named on List A above, or (ii) a 50 days' supply if he is located in one of the States named in List B above and provided further that no publisher may order or accept delivery of a total amount of print paper by water, rail or otherwise in any calendar year (including both the open and closed navigation seasons) in excess of his permitted consumption for that calendar year.

(4) *Computation of rate of consumption.* The number of days' supply shall be computed at the average daily rate of allowable consumption for the last six months of 1945.

(5) *Fractional carloads.* If a publisher's delivery quota for any month is less than one carload, he may nevertheless order and accept, in that month, up to one full carload. If a publisher's delivery quota for any month is a whole number of carloads plus a fraction of another carload, the fraction may be added to his delivery quota for any succeeding month.

(6) *Transit damage.* If print paper in inventory is destroyed or damaged to such an extent that it becomes unusable in publishing his newspaper, whether this occurs while the paper is in transit or after it has reached its destination, the publisher may increase his delivery quota (but not his consumption quota) in the same or any subsequent month by an amount sufficient to replace such paper. It is immaterial whether or not the publisher is reimbursed for the destroyed or damaged paper by the shipper, the carrier, or an insurance company. It is also immaterial whether or not the publisher salvages all or part of the damaged paper for use other than in publishing his newspaper.

(7) *Report on transit damage.* Any publisher who increases his delivery quota to replace destroyed or damaged print paper in accordance with subparagraph 6 above shall, within 15 days after placing the order for such replacement, file a letter with the War Production Board stating the number of tons comprising the publisher's delivery quota for that month, the number of tons destroyed or damaged, the manner in which such print paper was rendered unfit for use in publishing his newspaper, and the number of tons ordered in excess of his delivery quota. This reporting requirement has been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

(p) *Exceptions.* Permission to order or accept delivery of print paper in excess of the tonnage allowed under paragraph (o) may be granted by the War Production Board upon a written request for specific authorization stating the number of tons and the number of days' supply of print paper which the publisher has in inventory, the number of tons comprising his delivery quota, the number of additional tons he desires to order and accept, and the reasons why the denial of the request would create undue hardship.

(q) *Certification.* No mill or other supplier may sell or deliver to any person, and no person may accept, any print paper for use under Order L-240 except on a delivery order bearing or accompanied by a certification substantially in the form set forth below. This certification must be signed manually or as provided in Priorities Regulation No. 7 by the purchaser or by an official duly authorized for such purpose:

The undersigned certifies, subject to the penalties of section 35 (a) of the U. S. Criminal Code, to the seller and to the War Production Board: (a) that he is permitted to place this delivery order and to accept the print paper ordered; (b) that the print paper will be used or delivered, or that it is required to replace in-inventory print paper previously used or delivered, under War Production Board Order L-240.

The above certification must be placed on, or must accompany, each delivery order placed by any person for print paper to be used under Order L-240, and the certification provided for in Priorities Regulation No. 7 may not be used in its place.

(r) *Inventory reports and copies of orders.* On and after July 1, 1945, the publisher of every newspaper which consumes 25 tons of print paper or more in any calendar quarter shall file with the War Production Board:

(1) A monthly statement of his inventory of print paper on Form WPB 4292 within three days after the close of each month, beginning with June 1945.

(2) Copies of all orders for the delivery of print paper placed by him or for his account. Such copies of orders must be mailed within three days after the orders are placed.

These reporting requirements have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

(s) *Intra-company transfers.* The foregoing restrictions apply not only to deliveries from one person to another, including affiliates and subsidiaries, but also to deliveries from one branch, division, or section of a single enterprise to another branch, division, or section of the same or any other enterprise under common ownership or control.

Miscellaneous Provisions

(t) *Loans of print paper.* Any loan of print paper made by a publisher shall be reported to the War Production Board by letter within 15 days after the date of the loan. This reporting requirement has been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

(u) *Applicability of regulations.* This order and all transactions affected by it are subject to all present and future regulations of the War Production Board.

(v) *Appeals.* Any appeal from the provisions of this order shall be made in accordance with Supplement 1 to the order. Regardless of the provisions of Priorities Regulation 16 no statement with respect to manpower information on Form WPB-3820 (or letter explaining why that form is not filed) need accompany any appeal.

(w) *Communications to the War Production Board.* All reports required to be filed hereunder, requests for specific authorization, appeals and other communications concerning this order shall be addressed to: War Production Board, Printing and Publishing Division, Washington 25, D. C. Ref: L-240.

(x) *Violations.* Any person who willfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

Issued this 3d day of August 1945.

INTERPRETATION 4

TRANSIT DAMAGE

Paragraph (f) of Order L-240 states in part: "Transit damage shall not be included in a publisher's 'use' of print paper." This provision which was inserted in the order on December 24, 1943, merely explained, and did not change, the existing rule.

At all times since the issuance of Order L-240 on December 31, 1942, a publisher has been obliged to charge against his consumption quota only the print paper which was actually "used" in publishing his newspaper; print paper which was destroyed or damaged in transit need not be charged against the publisher's consumption quota to the extent that such print paper was rendered unusable in the publication of his newspaper. However, at all times since the issuance of Order L-240 on December 31, 1942, production waste has been included in the tonnage of print paper which is "used" in publishing a newspaper. (Issued Oct. 30, 1944.)

PART 3133—PRINTING AND PUBLISHING

[Limitation Order L-244, Supp. 1, as Amended Aug. 3, 1945]

MAGAZINES AND PERIODICALS

§ 3133.15a *General Limitation Order L-244, Supplement No. 1*—(a) *Purpose of appeal clause.* The serious shortage in the supply of print paper available for magazines makes it necessary for publishers to reduce their consumption substantially, as provided in Order L-244. Such reductions may create serious hardships—which, however, are unavoidable in time of war. Appeals are not granted to ameliorate, in individual cases, hardships applicable to an entire industry. They are granted only to provide relief, subject to the provisions of paragraphs (b) to (g), from certain undue and excessive hardships which would be created if the order were applied without modification to an exceptional set of circumstances. Appeals which do

not establish such hardships shall be denied.

(b) *No automatic adjustments.* Paragraph (f) of this supplement describes the types of hardship for which quota adjustments shall be made by the War Production Board on appeal. These adjustments, however, are not automatic. A publisher who believes that his case is covered by one of the subparagraphs of paragraph (f) may not make his own adjustment of his consumption quota. No publisher may use any paper in excess of his consumption quota, computed in accordance with paragraphs (j) and (k) of Order L–244, unless he files an appeal for such relief and a grant is made in writing, signed by the Recording Secretary of the War Production Board.

(c) *Adjustment of base tonnages.* Wherever appropriate, grants on appeal shall be made in the form of adjustments of a publisher's base tonnage which shall continue to be effective in future quarters, subject to re-examination and modification at any time by the War Production Board.

(d) *Effective date of base tonnage adjustments.* Adjustments of base tonnages are not retroactive. A publisher whose base tonnage is adjusted on appeal does not receive, by virtue of such adjustment, a "carry-over of unused tonnage" from any quarter before the issuance of the appeal grant.

(e) *Application of curtailments.* Constructive base tonnages granted on appeal are subject to the curtailments required by paragraph (j) of Order L–244 as amended from time to time.

(f) *Types of hardship for which relief shall be granted.* In passing upon appeals under Order L–244 the following standards shall govern:

(1) *New magazines issued by new publishers in 1942.* If a new publisher first caused paper to be used in printing a new magazine in 1942 (and did not publish any other magazine throughout that entire year) he shall be granted a constructive base tonnage: *Provided*, The magazine was published continuously until the issuance of Order L–244 on December 31, 1942. This shall be determined by averaging the tonnage of paper consumed in each issue printed in 1942 and multiplying this average tonnage by a factor representing the magazine's established frequency of issuance.

(2) *Publishers who used 25 tons or less in the first quarter of 1943.* If a publisher used 25 tons of paper or less in the first quarter of 1943 under that provision of Order L–244 (eliminated as of April 1, 1943) which exempted users of 25 tons per quarter or less, he shall be granted a constructive base tonnage, not to exceed 25 tons per quarter. This shall be determined by averaging the tonnage of paper used in the issues of each magazine printed during the first quarter of 1943 and multiplying this average tonnage by a factor representing the magazine's established frequency of issuance in that period.

(3) *Reduction in basis weight and trim size.* Publishers who reduced the basis weight or trim size of their magazines in 1942 shall be granted compensatory increases in their base tonnages.

(4) *Heavy weight paper, wide rolls and large sheets held in inventory because of reduction in basis weights and trim size.* (i) A publisher who, prior to October 1, 1944, reduced the basis weight of the paper regularly used in his magazine, and who, since the time of such reduction, has held in "frozen inventory" a quantity of the heavier paper regularly used prior to such reduction, shall, on appeal, be granted permission to consume that quantity of heavier paper and charge it against his quota as if it were paper of the basis weight he was using on October 1, 1944 for the same kind of printing. Such permission shall be granted only subject to the following conditions:

That the heavier weight paper shall be consumed before September 30, 1945, and

That the tonnage of paper which he is permitted to accept during the third quarter of 1945 shall be reduced by the net tonnage to be charged against his consumption quota pursuant to the appeal granted under this paragraph.

(ii) A publisher who reduced the trim size of his magazine prior to October 1, 1944, and who, since the time of such reduction, has held in "frozen inventory" a quantity of wider rolls or larger sheets of paper which were required to print his magazine prior to such reduction in trim size, shall, on appeal, be granted permission to consume that quantity of over-size rolls or sheets as if it were paper of the size he was using on October 1, 1944 for the same kind of printing without charging against his consumption quota the trim waste caused by such reduction in roll size or sheet size. Such permission shall be granted only subject to the following conditions:

That such over-size rolls or sheets shall be consumed before September 30, 1945, and

That the tonnage of paper which he is permitted to accept during the third quarter of 1945 shall be reduced by the net tonnage to be charged against his consumption quota pursuant to the appeal granted under this paragraph.

(5) *Unusual seasonal variations.* Publishers whose schedules have unusual seasonal variations shall be granted permission to redistribute their quarterly consumption quotas within a calendar year.

(6) *Inter-company transfers.* Transfers of quotas under Order L–244 shall be permitted between corporations which have occupied the relationship of parent and wholly-owned subsidiary, or affiliates wholly owned by the same person prior to December 31, 1942, and continuously thereafter.

(7) *Temporary suspension.* Publishers who suspended publication temporarily before the issuance of Order L–244 on December 31, 1942 because of strikes, fires, entrance into the armed forces, or similar conditions shall be granted compensatory increases in their base tonnage to the extent that it was impracticable to continue operations.

(8) *Extraordinary hardships.* Appeal tonnage shall not be recommended by either the administrator or the Division Appeals Committee or granted by the Appeals Board for causes other than those enumerated in subparagraphs (1) to (7) of this paragraph (f) except where unforeseen, unusual, extraordinary or emergency conditions constituting undue and excessive hardship are proved. Certain factors which shall not be recognized as grounds for the granting of appeal tonnage are described in paragraph (g).

(g) *Factors which shall not be considered as grounds for granting of tonnage on appeals.* The following is a list of some of the factors which shall not be considered as grounds for the granting of appeals. This list is not exclusive.

(1) The nature of a magazine's contents.

(2) Diminished base period consumption because of financial conditions.

(3) Suspension of publication before the issuance of Order L–244 on December 31, 1942, except as provided in paragraph (f) (7).

(4) Consumption of more paper in any quarter of 1942 than in other quarters.

(5) Consumption of less paper in 1942 than in other years except as provided in paragraph (f) (3).

(6) Decrease in circulation, number of advertising pages, or number of editorial pages in 1942.

(7) Increase in trim size, basis weights, circulation, cover or subscription price, number of advertising pages, number of editorial pages, frequency of issuance, or other expansion measures in 1942 or thereafter.

(8) Publication of a new magazine in 1942 by a publisher who was in the magazine publishing business throughout that year.

(9) Special events such as war bond drives, recruiting drives, war news, political news, etc.

(10) Inability to maintain or increase advertising pages, editorial pages, or circulation under existing quotas.

(11) Increased demand for a magazine, even though it is published by a membership organization whose constitution requires that a copy be sent to every member.

(12) Request to use in a new magazine publishing business more than the tonnage provided in paragraph (j) (5) of Order L–244.

(13) The fact that additional tonnage was granted on appeal to a competitor.

(14) Consumption of paper in violation of Order L–244, whether or not such violation was wilful.

Procedure

(h) *How appeals are submitted.* Appeals from Order L–244 may be filed by addressing a letter to the War Production Board, Printing and Publishing Division, Washington 25, D. C. Ref: L–244.

(i) *Form of appeals.* The letter of appeal need not follow any particular form. It should state informally, but completely, the particular provision appealed from, the precise relief desired, the subparagraph of paragraph (f) upon which the appellant relies, and the reasons why denial of the appeal would result in undue and excessive hardship.

(j) *Denial by administrator.* Appeals may be denied in the first instance by the administrator of the order.

(k) *Re-appeal from denial by administrator.* When an appeal has been denied by the administrator of the order, the appellant may re-appeal, within 15 days after the letter of denial is mailed, by addressing a letter to the War Production Board, Printing and Publishing Division, Washington 25, D. C. Ref: L–244. This letter may contain simply a request that the case be forwarded to the Appeals Board of the War Production Board. Any additional information which the appellant cares to submit at this time will also be forwarded to the Appeals Board.

(l) *Grant of appeals.* Although the administrator of the order may deny an appeal in the first instance, only the Appeals Board has the power to grant relief in individual cases from the provisions of the order.

(m) *Recommendation of grant by the administrator.* The administrator of the order may recommend that an appeal be granted in whole or in part. In that event the case shall be forwarded to the Appeals Board with the written recommendation of the administrator and the written concurrence or non-concurrence of each member of the Division Appeals Committee, consisting of himself, the administrators of Orders L–240, L–241 and L–245, the Assistant Director of the Printing and Publishing Division for Labor, and representatives of the Office of Civilian Requirements and the Conservation Division.

(n) *Optional reference to Appeals Board by administrator.* The administrator of the order may, if he desires, refer a case to the Appeals Board with a recommendation of denial or with no recommendation at all.

(o) *Hearings by Appeals Board.* If the Appeals Board desires to obtain additional facts not contained in the file, it may, in its discretion, hold a public hearing on any appeal. To the extent consistent with the necessity for emergency relief, a schedule of hearings shall be made up in advance. Information concerning the time and place of any scheduled hearing shall be available at the office of the Appeals Board at any time during business hours.

(p) *Conduct of hearing.* Hearings by the Appeals Board are open to the public. All interested parties may attend and, in the discretion of the Board, may be heard. The hearings are informal and the Board is not bound by legal rules of evidence. It is not necessary for an appellant to be represented by counsel, although he may do so if he wishes.

(q) *Decision by Appeals Board.* The Appeals Board may grant or deny an appeal in whole or in part. It may also attach conditions to a grant.

(r) *Finality of decision.* The decisions of the Appeals Board shall be final, unless that Board elects to reopen the case.

(s) *Publication of grants.* Grants on appeal shall be announced publicly at least every two weeks.

(t) *Announcement of grounds of decision.* Whenever a grant is made for "unforeseen, unusual, extraordinary or emergency conditions" under paragraph (f) (8), a brief memorandum of the basis of the decision shall be made public by the Appeals Board within two weeks, and the decision shall be treated as a precedent in future situations of an identical character.

(u) *Amendment of supplement.* Whenever a new standard is developed, the supplement shall be amended to set forth that standard.

(v) *Public files.* Public files shall be set up in all cases, including those filed before as well as after October 7, 1943 whether or not they resulted in a grant. They shall be available for public inspection at any time during the business hours of the War Production Board. The public files shall include:

(1) All papers filed by the appellant in support of the appeal except those portions which contain confidential data.

(2) All memoranda by War Production Board officials containing recommendations for or against the allowance of the appeal.

(3) Copies of all letters of grant or denial.

(4) A transcript of the record of any public hearing (or if the stenographic notes of the hearing have not been transcribed, a memorandum referring to the notes and stating how a transcript may be obtained).

(w) *False representations.* All grants on appeal are conditional upon the validity of the statements submitted in support thereof. Any person who wilfully conceals a material fact or furnishes false information in connection with an appeal, whether orally or in writing, is guilty of a crime and upon conviction may be punished by fine or imprisonment or both, as provided in section 35A of the United States Criminal Code.

4. Section 1394.5652 (a) is amended by adding, immediately before the parenthetical sentence, the following sentence: "However, this paragraph (a) shall not apply to a transfer of fuel oil between primary supplier establishments or to a transfer of fuel oil for which the consumer is required, pursuant to § 1394.5669, to surrender ration evidences to the Office of Price Administration."

5. The text of § 1394.5653 is amended to read as follows: "Fuel oil transfers (other than those which must be reported pursuant to § 1394.5669) may be made to, and accepted by, a consumer in exchange for currently valid coupons attached to coupon sheets upon complying with the following conditions:"

6. The text of § 1394.5653 (b) is amended by adding before the parenthetical sentence at the end of the paragraph the following sentence: "No dealer or primary supplier shall detach a coupon from a consumer's coupon sheet before the date on which the coupon becomes valid for a transfer of fuel oil."

7. The text of § 1394.5654 (a) is amended by adding at the end of the paragraph the following sentence: "No dealer or primary supplier shall detach a coupon from a consumer's coupon sheet before the date on which the coupon becomes valid for a transfer of fuel oil."

8. Section 1394.5669 is added as follows:

§ 1394.5669 *Consumers receiving fuel oil directly from without the limitation area must report.* (a) Beginning August 7, 1945 a consumer (other than an agency specified in § 1394.5696 (a)) who (1) within the limitation area, receives fuel oil on direct shipment from without the limitation area by pipe line, barge, tank ship or railroad tank car, whether or not the carrier is selected by him, or by any other common or contract carrier selected by him or (2) brings fuel oil from without the limitation area to a place within the limitation area by his own transportation facility, must comply with paragraph (b) of this section unless he is currently registered as a primary supplier as to the establishment at or for the account of which the fuel oil was received. (However, if the person from whom the consumer purchased the fuel oil maintains within the limitation area a regular place of business at which the order for the fuel oil was placed, he must, instead of complying with paragraph (b), surrender evidences to his seller in the manner specified in this Order.)

(b) (1) The consumer must within fifteen (15) days after each such receipt of fuel oil, if he is a depositor, submit to the Control and Audit Section, Fuel Oil Rationing Branch, Office of Price Administration, Washington 25, D. C., his ration check, payable to the Office of Price Administration, in an amount equal to the gallonage value of the fuel oil so received; if he is not a depositor, he must submit his coupon sheet to the Board which will detach therefrom valid coupons for the gallonage value of the fuel oil reported by him to have been so received. After detaching such coupons the Board will return the coupon sheet to the consumer.

(2) He must submit with his check or coupon sheet, as the case may be, a statement on OPA Form R–1119C giving the required information, or in place of the form a written report certified by him to be true and complete containing all of the following information:

(i) His name and address and the location of his storage facilities within the limitation area where the fuel oil was received;

(ii) The transferor's name and address without the limitation area where the consumer placed the order for the fuel oil;

(iii) The total amount of the fuel oil so received and the date received.

(c) The consumer may include in the report all fuel oil so received by him during the fifteen (15) day period preceding the date of the report.

(d) Section 1394.5714 explains when such a consumer may be required to register as a primary supplier. However, he shall comply with the requirements of this section as to all fuel oil which, prior to the date of his application for registration as a primary supplier, he received in, or brought into, the limitation area in the manner specified.

(e) *Records.* If the consumer is a depositor, he must keep until further notice by amendment of this Order all records on the basis of which the report required by paragraph (b) (2) is prepared.

9. Section 1394.5700 is added following the undesignated center headnote as follows:

§ 1394.5700 *Who must register as a primary supplier.* (a) A person who has a place or conducts an operation as to which he is not currently registered as a primary supplier must apply for such registration with respect to the place or operation if:

(1) The place is one within the limitation area at which he refines fuel oil; or

(2) The place is an oil well within the limitation area from which he obtains petroleum which is fuel oil as defined in § 1394.5001 (a) (15); or

(3) The place is one which he maintains as a regular place of business (without registered fuel oil storage capacity) within the limitation area at which he receives an order for the purchase from him of fuel oil which he in turn orders at a place of business without the limitation area and the fuel oil so ordered is delivered to a person (other than himself) within the limitation area directly from without the limitation area; or

(4) The operation is one in which he, for his own account, delivers or causes to be delivered fuel oil directly from without the limitation area to a consumer within the limitation area, in a manner other than by pipeline, barge, tank ship or railroad tank car and he does not within the limitation area maintain a regular place of business at which the order for the fuel oil was placed (he is deemed not to have made the delivery if the fuel oil is carried in the consumer's transportation facility or by a common or contract carrier selected by the consumer); or

(5) He is notified by the Fuel Oil Rationing Branch, Washington Office, to register as a primary supplier pursuant to § 1394.5714.

(b) (1) If he meets the conditions in paragraph (a) (1) or (a) (2), he must apply for registration as a primary supplier, in the manner set forth in § 1394.5701 (a), with respect to the place specified, within fifteen (15) days after he begins to refine fuel oil or obtain such petroleum at that place, as the case may be.

(2) If he meets the conditions in paragraph (a) (3), he must apply for registration as a primary supplier, in the manner set forth in §1394.5701 (a), with respect to the place within the limitation area at which he received the order, within fifteen (15) days after the fuel oil ordered at that place is delivered.

(3) If he meets the conditions in paragraph (a) (4), he must apply for registration as a primary supplier, in the manner set forth in § 1394.5701 (a), within fifteen (15) days after such delivery is made.

(4) If he is notified to register as a primary supplier by the Fuel Oil Rationing Branch, Washington Office, he must apply for such registration, in the manner set forth in § 1394.5701 (a) within the time stated in the notice.

(c) A person required to register as a primary supplier with respect to a place of business with respect to which he is not currently registered as a dealer may not acquire or transfer fuel oil at or from (or for the account of) that place of business until he is currently registered as a primary supplier as to that place of business. However, he may acquire fuel oil at that place of business as a consumer (in exchange for valid ration evidences).

10. Section 1394.5701 (a) is amended to read as follows:

(a) *Primary suppliers.* Beginning August 7, 1945 application for registration as a primary supplier must be made on OPA Form R–1116 (Revised) to any Board within the limitation area.

(1) The applicant (other than one applying for registration pursuant to § 1394.5700 (a) (4)) must submit to the Board, in addition to the information required by the form and the copy of the notice specified in paragraph (a) (6) of this section, if applicable, a statement containing the following:

(i) His name, firm name and business address; if he has no business address, the address of his residence;

(ii) The address or location of each place required to be registered according to § 1394.5700 or § 1394.5714, whichever is applicable;

(iii) The address or location of each of his establishments within the limitation area which he chooses to include in his primary supplier registration;

(iv) The location and the fuel oil storage capacity of all stationary storage facilities within the limitation area included in the application;

(v) The fuel oil he has on hand, at the time of the application, at or for the account of each of the places within the limitation area to be included in the registration;

(vi) If he does not maintain stationary storage facilities within the limitation area, the number of tank trucks or other mobile delivery units to be used by him for fuel oil deliveries within the limitation area, and the fuel oil storage capacity and vehicle license number of each of such trucks and delivery units;

(vii) A description of the facts which require him to register as a primary supplier; and

(viii) A certification that he has included in the statement all places which he is required to include in his registration as a primary supplier and that the information set forth in the statement is true and complete.

(2) A person applying for registration pursuant to § 1394.5700 (a) (4) must submit a statement showing the number of tank trucks or other mobile delivery units to be used by him for fuel oil deliveries within the limitation area and the fuel oil storage capacity and vehicle license number of each of such trucks and delivery units, together with the information specified in paragraph (a) (1) (i), (vii) and (viii) of this section.

(3) The applicant (other than one required to register as a primary supplier pursuant to § 1394.5700 (a) (4)) must include in the application for registration all the places of business within the limitation area at or from which he conducts operations which require him to register as a primary supplier. If he is applying for registration as a primary supplier pursuant to notice from the Washington Office, he must include the establishments and facilities referred to in § 1394.5714. If he has other places within the limitation area where he engages in the fuel oil business or consumes fuel oil, he may include some or all of them if he chooses to do so. However, he shall apply for registration as a dealer, in the manner provided in this order, as to each of his places (with respect to which he is not currently registered as a dealer) within the limitation area at which he engages in the business of buying and selling fuel oil and which he does not include in his application for registration as a primary supplier. Similarly, a person applying for registration as a primary supplier pursuant to § 1394.5700 (a) (4) must apply for registration as a dealer as to each of his places (with respect to which he is not currently registered as a dealer or primary supplier) within the limitation area at which he engages in the business of buying and selling fuel oil.

(4) Separate application for registration as a primary supplier must be made with respect to the operations specified in § 1394.5700 (a) (4).

(5) If he is registered as a dealer with respect to the place of business or operation as to which he is applying for registration as a primary supplier, he must comply with § 1394.5742.

(6) An applicant (other than one required to register as a primary supplier pursuant to § 1394.5700 (a) (4)) may include in his application the fuel oil storage facilities of any person who receives fuel oil on consignment from him, title to the fuel oil remaining in the consignor until the time of transfer by the consignee. The applicant must, in advance of his application, notify the consignee, in writing, of his intention to include such facilities in his application. A copy of such notice must be attached to the application. If such facilities are included in the application, the consignee shall for all purposes of this order be deemed to be an agent of the consignor with respect to all fuel oil acquired at or transferred from such facilities and with respect to all ration evidences received or transferred for such fuel oil by the consignee. If the consignee's facilities are not included in the application, the consignee shall apply for registration with respect to such facilities, and, notwithstanding the retention of title by the consignor to the fuel oil consigned, the receipt of such fuel oil by the consignee shall be deemed a transfer of the fuel oil to him and he shall include the fuel oil in his inventory.

11. Section 1394.5707 (a) is amended by inserting between the phrase "shall transfer fuel oil" and the phrase "to a dealer within the limitation area" the following parenthetical phrase: "(unless the transfer is one for which the transferee is required by § 1394.5713 to surrender ration evidences to the Office of Price Administration)".

12. Section 1394.5713 is added to read as follows:

§ 1394.5713. *Dealers acquiring fuel oil directly from without the limitation area must report*—(a) *Dealers who receive the fuel oil directly.* (1) Beginning August 7, 1945, a person who, within the limitation area, maintains a place with respect to which he is currently registered as a dealer (with) or without registered fuel oil storage capacity) at or for the account of which he receives delivery of fuel oil directly from without the limitation area in any manner (irrespective of the kind of transportation facility used for the purpose or who selected it) must comply with paragraph (a) (2) of this section. (However, if the person from whom he purchased the fuel oil maintains within the limitation area a regular place of business at which the order for the fuel oil was placed, he must, instead of complying with paragraph (a) (2), surrender evidences to his seller in the manner specified in this Order.)

(2) He must within fifteen (15) days after each such receipt of fuel oil forward to the Control and Audit Section, Fuel Oil Rationing Branch, Office of Price Administration, Washington 25, D. C.

(i) A statement on OPA Form R–1119C giving the required information; and

(ii) If he is a depositor, his ration check, payable to the Office of Price Administration, equal in gallonage value to the amount of fuel oil so received from without the limitation area. If he is not a depositor, he must obtain from his Board a ration check in exchange for coupons equal in gallonage value to the amount of fuel oil so received and must endorse and forward that check with his statement.

(3) The dealer may include in the statement all fuel oil so received by him during the fifteen (15) day period preceding the date of the statement.

(4) No dealer may accept a delivery of fuel oil directly from without the limitation area unless at the time of delivery he has on hand ration evidences or ration credits (as explained in § 1394.5707 (a) (6)) equal in gallonage value to the fuel oil to be so delivered.

(b) *Dealers who cause the fuel oil to be delivered to another person.* (1) Beginning August 7, 1945, a person (here referred to as the seller) who, within the limitation area, maintains a place as to which he is currently registered as a dealer (with registered fuel oil storage capacity) at which he receives an order for the purchase from him of fuel oil, which he in turn orders at a place of business without the limitation area, and which fuel oil so ordered is delivered to another person (here referred to as the buyer) within the limitation area directly from without the limitation area, must comply with paragraph (b) (2) of this section.

(2) He must within fifteen (15) days after the fuel oil so ordered is delivered forward to the Control and Audit Section, Fuel Oil Rationing Branch, Office of Price Administration, Washington 25, D. C.:

(i) A statement on OPA Form R–1119C, giving the required information; and

(ii) If he is a depositor, his ration check, payable to the Office of Price Administration, equal in gallonage value to the amount of fuel oil so delivered from without the limitation area whether or not evidences were surrendered to him by the buyer. If he is not a depositor, he must obtain from his Board a ration check in exchange for coupons equal in gallonage value to the amount of fuel oil so delivered and must endorse and forward that check with his statement.

(3) The seller may include in the statement all fuel oil delivered in the manner specified in paragraph (b) (1) of this section during the fifteen (15) day period preceding the date of the statement.

(c) All records on the basis of which the statement required by paragraph (a) (2) (i) or (b) (2) (i) of this section is prepared shall be retained at the office of the dealer reporting until further notice by amendment of this order.

13. Section 1394.5714 is added as follows:

§ 1394.5714 *When the Washington Office may require a person to register as a primary supplier.* (a) A consumer specified in § 1394.5669, or a dealer specified in Section 1394.5713, may be required by written notice from the Fuel Oil Rationing Branch, Washington Office, to register as a primary supplier if, based upon the frequency and quantity of his acquisitions of the fuel oil which he must report pursuant to either of these sections, it deems such registration necessary for more effective rationing control of the fuel oil so acquired.

(b) A person who is directed to apply for registration pursuant to paragraph (a) of this section must, within the time stated in the notice, apply for registration in the manner specified in § 1394.-

5701 (a) and must include in his application the location of all facilities where he receives fuel oil as to which he is required to report pursuant to § 1394.5669 or § 1394.5713.

14. Section 1394.5715 is added as follows:

§ 1394.5715 *Cancellation of registration as a primary supplier by the Washington Office.* (a) If the infrequency and quantity of the fuel oil acquisitions directly from without the limitation area of any person currently registered as a primary supplier (other than a person specified in § 1394.5700 (a) (1), (2), (3) or (4)) are such that the Fuel Oil Rationing Branch, Washington Office, deems a continuation of such registration unnecessary for effective rationing control of the fuel oil so acquired, it may notify him that effective on a date specified in that notice his registration as a primary supplier will be cancelled.

(b) A person whose registration has been cancelled pursuant to the provisions of paragraph (a) of this section must apply for registration as a dealer pursuant to § 1394.5701 (b) as to each of the establishments included in the cancelled registration at or from which he engages in the business of buying and selling fuel oil before making or accepting a transfer of fuel oil at or from such establishments on or after the date specified in the notice.

15. Section 1394.5716 is added to read as follows:

§ 1394.5716 *Certain persons who received fuel oil directly from without the limitation area before August 7, 1945 may be required to report.* (a) The Control and Audit Section, Fuel Oil Rationing Branch, Washington Office, may, by written notice, direct any person (other than one referred to in paragraph (b)) who, within the limitation area, received one or more deliveries of fuel oil directly from without the limitation area during the period October 1, 1942 (in Area A, February 1, 1943; in Area B, March 14, 1943) through August 7, 1945, to submit, and each person so notified must submit, to the Control and Audit Section, Fuel Oil Rationing Branch, Office of Price Administration, Washington 25, D. C., by the date specified in the notice, the following:

(1) A statement on OPA Form R–1119C, giving the required information.

(2) His ration check, for each of his places included in the statement on OPA Form R–1119C, in an amount equal to the total gallonage of all the fuel oil delivered to such place, or for its account, directly from without the limitation area from October 1, 1942 (in Area A, from February 1, 1943; in Area B, from March 14, 1943) until (but not including) August 7, 1945. If he is not a depositor, he must obtain from his Board a ration check for the required amount, in exchange for valid coupons or other valid ration evidences equal in gallonage value to the amount of the check, and must endorse and submit the check with his statement.

(i) If he is a registered dealer, and claims that as to any place he is unable to submit a certified ration check for the required amount because prior to August 7, 1945 he surrendered to the District Office with his semi-annual reports on OPA Form R–1198, as excess evidence, valid ration evidences for the fuel oil received by him directly from without the limitation area, he must submit with the statement specified in paragraph (a) (1) of this section a copy of each of his OPA Form R–1198 reports showing, for that establishment, excess evidences which he attributed to the receipt of fuel oil directly from without the limitation area and of the explanations accompanying the reports. To the extent that any of the excess evidences surrendered with those reports were stated in the explanations to be (and were) attributable to the acquisition or transfer of the fuel oil received by him directly from without the limitation area, he shall be entitled for that place to a deduction from the amount of the ration check required to be surrendered with his statement pursuant to paragraph (a) (2) of this section.

(ii) If he is unable to submit a check for the required amount because of any reason, other than that specified in paragraph (a) (2) of this section, he must submit with the statement specified in paragraph (a) (1) a written explanation giving such reason. To the extent that the explanation is not accepted, he must submit a ration check within the time specified by the Control and Audit Section.

(b) The provisions of paragraph (a) do not apply to a person who has included all his receipts of fuel oil directly from without the limitation area, during the period specified in that paragraph, in one or more reports submitted by him pursuant to § 1394.5731.

(c) The Control and Audit Section may deem the requirements of § 1394.5731 to have been met by any person referred to in paragraph (a) for the period specified in that paragraph if he complies with the requirements of this section.

(d) All records on the basis of which the statement specified in paragraph (a) (1) is prepared shall be retained by the person submitting the statement until further notice by amendment of this order.

(e) Nothing contained in this section and no act performed in accordance therewith shall constitute a waiver of any of the other provisions or requirements of this order.

16. The undesignated center headnote preceding § 1394.5731 is relocated to precede § 1394.5730 and is amended to read as follows: "Same; Accountability; Records, Audits and Inspections."

17. Section 1394.5730 is added as follows:

§ 1394.5730 *Accountability of primary suppliers.* A primary supplier shall be accountable as a primary supplier for all fuel oil and ration evidences acquired at or transferred from all establishments within the limitation area included in his primary supplier registration and shall explain such acquisitions and transfers upon request of a duly authorized employee, agent or representative of a district or regional office or the Washington Office of the Office of Price Administration. However, a primary supplier whose primary supplier registration includes no regular place of business maintained by him within the limitation area shall, with respect to that registration, be accountable as a primary supplier for all fuel oil transferred to consumers within the limitation area, for all fuel oil acquired by him within the limitation area, and for all ration evidences received or transferred by him for such fuel oil and shall explain such acquisitions, receipts and transfers upon request of a duly authorized employee, agent or representative of a district or regional office or the Washington Office of the Office of Price Administration.

18. Section 1394.5732 (e) is amended to read as follows:

(e) *Other records.* Further record keeping requirements to be observed by dealers, primary suppliers and other persons required to report pursuant to §§ 1394.5669 and 1394.5736 are set forth in §§ 1394.5654 (a) (1) (notice to consumers of value of unexpired coupons), 1394.5654 (d) (6) (i) (receipts for deposited coupon sheets), 1394.5669 (e) (consumers receiving fuel oil from without the limitation area), 1394.5687 (d) (entries on check stub), 1394.5701 (d) (5) (additional records to be kept by dealers who commingle fuel oil), 1394.5704 (c) (certificate of registration), 1394.5713 (c) (dealers acquiring fuel oil, or causing fuel oil to be delivered, from without the limitation area), 1394.5716 (d) (reports required of certain persons who received fuel oil from without the limitation area), 1394.5721 (use of gummed sheet), 1394.5722 (summary of coupons), 1394.5736 (records to be kept by persons shipping fuel oil into the limitation area), 1394.5742 (b) (3) (records to be kept by dealers applying for registration as primary suppliers) and section 6.4 of Revised Gen. Ration Order 3A (retention of checks, stubs, deposit slips and statements of account-ration banking).

19. Section 1394.5737 (a) is amended by adding before the last sentence of the paragraph the following parenthetical sentences: "(If pursuant to § 1394.5713, he is required to forward evidences to the Control and Audit Section, Fuel Oil Rationing Branch, Washington Office, he shall not include those evidences in his statement on OPA Form R–1198 (Revised). However, he must forward those evidences within the time and in the manner specified in § 1394.5713.)"

20. Section 1394.5742 is amended to read as follows:

§ 1394.5742 *Additional requirements where dealer applies for primary supplier registration.* (a) A dealer who pursuant to § 1394.5701 (a) applies for registration as a primary supplier must, with his application, submit to the Board his certificate of registration for each dealer establishment included in his application for registration as a primary supplier. Within fifteen (15) days after making such application he shall forward to the Control and Audit Section, Fuel Oil Rationing Branch, Office of Price Administration, Washington 25, D. C. a statement on OPA Form R–1198 (Revised) giving all the information (except Item 6) required by the form as of the date of the application. If more than one place of business with respect to which he is separately registered as a dealer is included in the application, he must submit a separate statement for each such place of business. If, pursuant to Section 1394.5713 he is required to forward evidences to the Control and Audit Section, he shall not include those evidences in his statement, on OPA Form R–1198 (Revised). However, even though he has registered as a primary supplier he must comply with Section 1394.5713 with respect to all deliveries of fuel oil made to him or for his account, in the manner specified in that section, prior to the date he registered as a primary supplier.

(b) (1) On his first monthly primary supplier report (on OPA Form R–1119 (Revised)) required by § 1394.5731, he must show on Line 1 the inventory on hand as reported on Line 2 of his OPA Form R–1198 (Revised) submitted pursuant to paragraph (a) of this section. If more than one place of business was included in the application, the gallonage to be entered on Line 1 will be the aggregate of the amount shown on Line 2 of the OPA Form R–1198 (Revised) submitted for each establishment.

(2) He must, in addition, enter on that first monthly report as Line 14A (immediately above Line 15 in Section II) the following: "14A Unfilled storage capacity plus excess evidences from R–1198" and the gallonage as follows:

(i) If not more than one place of business was included in the application, the amount of the unfilled storage capacity shown on the OPA Form R–1198 (Revised) submitted with the application, plus the full amount of excess evidences (if any) shown on Line 5 of that statement;

(ii) If more than one place of business was included in the application, the aggregate of the amount of the unfilled storage capacity as shown on each OPA Form R–1198 (Revised) submitted with the application, plus the total amount of the excess evidences, if any, (without deducting from such total any shortage) shown on Line 5 of each such statement.

(3) The applicant must retain at the place of business until further notice by amendment of this order the work sheets used in the preparation of the statement on OPA Form R–1198 (Revised) submitted pursuant to paragraph (a) of this section.

This amendment shall become effective on August 7, 1945.

Section 16.2 (c) is amended to read as follows:

(c) A registering unit may exchange such statement for a check at its board. It must attach to the statement a signed receipt, invoice, bill of lading, or such other evidence as substantiates the delivery of the sugar. If the board is satisfied that the sugar was delivered for ships' or planes' stores it shall issue a check to the registering unit equal in weight value to the amount so delivered. However, if the sugar was delivered to a ship operating under the control, direction, or designation of the War Shipping Administration, the registering unit may not exchange such statement for a check at the board; but may instead, exchange such statement for a check at an appropriate office of the War Shipping Administration.

This amendment shall become effective August 3, 1945.

Issued this 3d day of August 1945.

Chapter XVIII—Office of Economic Stabilization

[Directive 72]

PART 4003—SUPPORT PRICES, SUBSIDIES

CALIFORNIA RAISIN AND GRAPE PROGRAM 1945-46 MARKETING SEASON

The War Food Administrator in a letter dated May 12, 1945, and the Price Administrator in a letter dated May 18, 1945, submitted certain information and their recommendations to me relative to a California raisin and grape program for the 1945-46 marketing season. In approving a program along the general lines recommended, I find it necessary to issue this directive to effectuate the purposes of the Emergency Price Control Act of 1942, as amended, the Stabilization Act of 1942, as amended, and Executive Orders Nos. 9250 and 9328.

A. I hereby find that:

(1) The following producer prices for natural condition raisins are above the legal minimum amounts required to be reflected in maximum prices for processed commodities by section 3 of the Stabilization Act of 1942, as amended, and are necessary to insure the maximum necessary production of raisins in 1945 to meet essential requirements:

Types	Producer prices for 1945
Sultana, Natural	$130.00
Thompson Seedless:	
Natural	190.00
Golden Bleached:	
Choice	230.00
Extra Choice	240.00
Fancy	250.00
Soda Bleached (choice)	210.00
Sulphur Bleached (fancy)	240.00
Natural	205.00
Valencia	257.00
Cluster	220.00
Zante Currants	250.00

(2) Maximum prices on sales of natural condition raisins by producers to processors are not now necessary to promote the national defense.

(3) Maximum prices on sales of California grapes for table use and for home crushing at levels based upon $57.10 per ton packing house door basis with a cushion not exceeding $18.00 per ton are necessary to promote the national defense.

(4) Maximum prices on sales of wine, brandy, and other alcoholic products produced from California grapes should be revised to the extent necessary to reflect a return to producers of the 1945 crop of such grapes, in line, as nearly as practicable, with the return to be realized by raisin producers under the prices specified in paragraph A (1) hereof but in no event in excess of $60.00 per ton, and that such revision will promote the national defense.

(5) The maintenance of approximately the present average level of maximum prices on sales of processed raisins to purchasers other than government procurement agencies, and other than for export, through the use of funds of Commodity Credit Corporation will effectuate the purposes of the hold-the-line policy; and

(6) Maximum prices on sales of processed raisins by processors for shipment to destinations or ports within Territories and Possessions of the United States at the same level as that applicable to sales by processors to purchasers other than government procurement agencies and other than for export to destinations and ports outside Territories and Possessions of the United States, through the use of funds of Commodity Credit Corporation will promote the national defense.

B. The Office of Price Administration is authorized and directed to:

(1) Revoke present maximum prices governing sales of natural condition raisins by producers to processors.

(2) Establish maximum prices governing sales of California grapes for table use and for home crushing at levels based upon $57.10 per ton packing house door basis with a cushion not exceeding $18.00 per ton.

(3) Revise present maximum prices on sales of wine, brandy, and other alcoholic products produced from California grapes to the extent necessary to reflect a return to producers of the 1945 crop of such grapes, in line, as nearly as practicable, with the return to be realized by raisin producers under the prices specified in paragraph A (1) hereof, but in no event to exceed $60.00 per ton.

(4) Revise present maximum prices governing processors' sales of processed raisins to:

(a) Government procurement agencies, and to purchasers for export to destinations or ports outside Territories and Possessions of the United States, on the basis of the cost and profit study relative to processors' margins now being made by Office of Price Administration so as to reflect the producer prices specified in paragraph A (1) hereof; and

(b) Purchasers other than government procurement agencies, and other than for export to destinations or ports outside Territories and Possessions of the United States, on the basis of appropriate compensation for any increase in the legal minimum producer prices for 1945 above the respective legal minimum prices for 1944 and subject to such adjustments which the cost and profit study relative to processors' margins, now being made by the Office of Price Administration, may indicate.

(5) Furnish to the Secretary of Agriculture the revised maximum price, specified in paragraph B (4) hereof, for use by the Secretary of Agriculture in determining the appropriate rate of subsidy payment.

C. The Department of Agriculture is authorized and directed to subsidize processors' sales of processed raisins (other than Cluster Muscats and Zante Currants) to purchasers other than government procurement agencies and other than for export to destinations or ports outside Territories and Possessions of the United States, through use of funds of Commodity Credit Corporation, so as to enable such processors to pay the producer prices specified in paragraph A (1) hereof and to sell such processed raisins at applicable maximum prices to be established by the Office of Price Administration pursuant to paragraph B (4) hereof. The appropriate rate of subsidy shall be determined by the Department of Agriculture after completion of the cost and profit study relative to processors' margins which is now being made by the Office of Price Administration and the maximum prices based upon such study have been issued by the Office of Price Administration.

(E.O. 9250 and E.O. 9328, 3 CFR Cum. Supp. pp. 1213, 1267)

Issued and effective this first day of August, 1945.

Acting Economic Stabilization Director.

Chapter XX—Office of Contract Settlement

[Reg. 14, Amdt. 2]

PART 8004—TERMINATION COST MEMORANDUMS

FIXED-PRICE SUPPLY CONTRACTS

Part 8014 (10 F.R. 2312 and 3925) is redesignated as Part 8004 and §§ 8014.1 through 8014.9 are redesignated as §§ 8004.1 through 8004.9.

Pursuant to section 2 of Regulation No. 14 of this Office, Regulation No. 14 is hereby amended to incorporate Termination Cost Memorandums Nos. 10 through 15 which are hereby issued as a part of such regulation.

§ 8004.10 *Engineering and development, special tooling, and preparatory expenses*—(a) *Reference to Statement of Cost Principles.* (1) The statement provides for the inclusion of the costs of engineering and development and of special tooling as follows (subpar. 1 (e)):

Engineering and development and special tooling. Costs of engineering and development and of special tooling; *Provided*, That the contractor protects any interests of the Government by transfer of title or by other means deemed appropriate by the Government.

(2) Engineering and development and special tooling are included among the costs subject to limitation under subparagraph 1 (i) of the Statement of Cost Principles (see § 8004.5).

(3) Although the statement does not refer in specific terms to preparatory expenses, their recognition is inherent in the general statement of costs included therein.

(b) *Definitions.* (1) The term "engineering and development", as used herein, refers to the design of the product, the detailed engineering specifications, the design of special tooling, the planning of production processes and layout, and related functions performed specially for the contract, or the contract and other war production contracts.

(2) The term "special tooling" includes jigs, dies, fixtures, moulds, gauges, and other similar equipment acquired or produced by the war contractor specially for the war contract or for the contract and other war production contracts. The term does not relate to buildings, building, equipment, and machine tools; nor to tools such as cutting tools and hand tools which usually lose their utility through wear and tear rather than through obsolescence.

(3) The term "preparatory expenses" refers to expenses incurred in preparing to operate specially under the contract, or the contract and other war production contracts. It includes the reasonable costs of plant rearrangement and alterations, organization, planning, and similar activities carried on specially for the contract, or the contract and other war production contracts. It does not include special facilities or initial costs, which are the subjects of other cost memorandums (see §§ 8004.7 and 8004.9).

(4) The phrase "other war production contracts", as used in subparagraphs (1), (2), and (3) of this paragraph, refers only to such war production contracts as were in existence at the time the special tooling was acquired or the costs of engineering and development or preparatory work were incurred; or such contracts as were at that time so certain to be entered into that the costs of this character could reasonably have been incurred for them, as well as for the terminated contract. For purposes of this section, time of acquisition means the date an order was placed or the date of authorization of work or construction by the contractor.

(c) *Interpretations.* (1) The basis for the inclusion of costs of engineering and development, special tooling, and preparatory work is the amount of such costs which, if the contract had not been terminated, would have been properly chargeable to the terminated portion of the contract (see subparagraph (3) of this paragraph. In this respect the accounting treatment used by the contractor in his books and records is not necessarily controlling. However, when costs of the nature discussed in this section are included, additional depreciation or amortization of the same items will be excluded.

(2) Special tooling and similar items covered by this section will ordinarily become obsolete at the termination of the contract and, consequently, their only residual value will usually be as scrap. If the tooling or other items are retained by the contractor or sold to a third party, their retention value or the proceeds of any sale should be treated as a disposal credit in the contractor's settlement proposal and not as a reduction of the cost of the special items subject to amortization. Where the rate of amortization takes into account the continuing war production contracts for which the costs were incurred, the disposal credit should not include the value of the tooling or other items to the contractor for use on such other work but only their ultimate disposal value. However, where the disposal value consists only of scrap and it has been the contractor's consistent practice to credit all tool scrap to overhead, such practice will be acceptable without applying the scrap value as a disposal credit.

(3) Ordinarily, the unit quantities of deliveries will be an acceptable basis for the allocation of the costs of engineering and development, special tooling, and preparatory work (i) to the terminated contract where more than one contract is involved and (ii) between the completed and terminated portions of the contract. However, if the contract or contracts include products of a diverse nature, some other equitable basis may be used, such as machine or labor hours.

(4) Particular care should be taken to determine that tooling and other costs are special as defined herein. The bid proposal or other records relating to the negotiation or performance of the contract, which may indicate whether the

costs were contempleted by the parties, are important, but not necessarily controlling, evidence that the tooling or other property was acquired or the work done specially for the contract or for the contract and other war production contracts. In the absence of such specific evidence, other satisfactory evidence will be required. In no case will the contractor's unsupported assertion on this point be considered sufficient, and a representation by the contractor at the time the contract was negotiated that it did not need special tooling or other items for its performance will indicate that such acquisition or cost was not contemplated.

(5) In most cases it will not be desirable for the Government to take title to special tooling and similar items covered by this memorandum. Generally, the contractor should be permitted to retain the items, and the contracting agency should protect the Government's interests:

(i) By taking into consideration, in determining the rate of amortization, the use of the special tooling or other items on other war production contracts of the contractor; and

(ii) By obtaining a proper disposal credit in the settlement agreement, as provided by paragraph (c) (2) above; and

(iii) Where there is a possibility that the tooling or other items may be needed for Government purposes within a reasonable period, by appropriate arrangements for the use of such items.

§ 8004.11 *Settlement expenses and costs of protection and disposition of property*—(a) *Reference to Statement of Cost Principles.* The statement provides for the inclusion of settlement expenses and costs of protection and disposition of property as follows (subpars. 1 (k) and (l)):

Settlement expenses. Reasonable accounting, legal, clerical, and other expenses necessary in connection with the termination and settlement of the contract and subcontracts and purchase orders thereunder, including expenses incurred for the purpose of obtaining payment from the Government only to the extent reasonably necessary for the preparation and presentation of settlement proposals and cost evidence in connection therewith.

Protection and disposition of property. Storage, transportation and other costs incurred for the protection of property acquired or produced for the contract or in connection with the disposition of such property.

(b) *Definitions.* (1) The costs and expenses covered by subparagraphs 1 (k) and (l) of the Statement of Cost Principles include such items as are incident to effecting terminations, termination settlements, and the protection and disposition of property acquired or produced for the contract and on hand at the date of termination. They do not include: (i) the costs of idle equipment, facilities, and personnel and (ii) accounting, legal, clerical, and other costs and expenses incurred in any appeal, either within a contracting agency or to the Appeal Board of the Office of Contract Settlement, or in any arbitration, mediation or suit in court, where such proceeding is instituted for the purpose of obtaining payment in excess of the amount the Government has determined to be due. Nothing herein shall be deemed to preclude recovery of the reasonable costs and expenses of settling termination claims of subcontractors related to the terminated portion of any war contract.

(2) The costs of preservation and protection of termination inventory include the necessary greasing, packing, and any other special treatment accorded termination inventory to insure the maintenance of its condition as well as the cost of special precautions necessary to insure its safety. Such costs should be distinguished from storage of termination inventory, the cost of which may include (i) amounts actually paid or payable to outside parties and (ii) a reasonable allocation of the contractor's own costs.

(c) *Interpretations.* (1) To the extent practicable, the costs and expenses covered by this section should be segregated and charged directly to particular terminated contracts. However, where direct charging is not practicable, any method of allocating these expenses may be used which produces results consistent with the principles set forth in subparagraph (3) of this paragraph. The method used may be based on estimates in the light of past experience and reasonably anticipated future terminations. In the absence of a more appropriate basis of allocation, expenses not charged directly may be allocated to particular terminated contracts by the application of a properly computed rate to the amount of the contractor's own costs included in the settlement proposals.

(2) Settlement expenses and costs of protection and disposition of property may include a properly allocable portion of the costs, including overhead, of special termination units or departments and regularly established organizational units. In such cases, it is not necessary that the expenses of such units or departments be identified with specific contracts, but the services performed must be directly related to termination activities. Factory and administrative overhead may be included as a settlement expense only to the extent that the elements of such overhead are properly allocable to such termination units or departments.

(3) Whatever method is used to allocate settlement and property expenses, the cumulative amount included for these expenses in all termination settlements to date should not exceed the cumulative total of such expenses actually incurred, and the total amount included in any single termination settlement proposal should not exceed an amount reasonably necessary to settle the contract in question.

(4) The cost of microfilming or preserving records of a war contractor will ordinarily be classified as general and administrative expense and should not be included as a direct settlement expense in a termination settlement.

(5) Regulation No. 10 of this Office relates to the clearance of termination inventory from plants of war contractors. Section 4 of that regulation provides for reimbursement of the costs thereof as follows:

Contractor's right to store at his own risk. A war contractor may at any time remove from his plant and store on his own premises or elsewhere any of the above materials at his own risk. The war contractor will use reasonable care in the transportation and preservation of material so removed and stored, and will comply with any directions or specifications covering removal, preservation, transportation and storage which may be issued by the contracting agency. The war contractor is entitled to be reimbursed for the reasonable cost of (i) necessary or appropriate transportation, preservation, protection and storage, and (ii) compliance with any directions or specifications in connection therewith issued by the contracting agency. Ordinarily, charges for storage of termination inventory prior to the expiration of the plant clearance period will not be deemed a reasonable settlement expense.

(6) Section 5 of Regulation 10 provides for the removal and storage of termination inventory after the 60-day plant clearance period as follows:

Contractor's right to remove or store at Government expense and risk. If the contracting agency fails to arrange for storage by the war contractor or to remove any termination inventory within 60 days after its receipt of a satisfactory inventory schedule (or within such longer period as the contractor may agree), the contractor may remove and store at the Government's expense and risk, any or all those materials remaining, using reasonable care in the transportation and preservation of materials so removed and stored. The words "at the Government's expense and risk" mean, among other things, that the contractor is not required to insure such materials.

(7) In accordance with the foregoing references, the contractor may include in its settlement proposal the reasonable and necessary costs of transportation, preservation, and protection of termination inventory, regardless of whether such costs are incurred prior or subsequent to the expiration of the 60-day plant clearance period.

(8) Charges for storage of termination inventory may ordinarily be included only for the time following the 60-day plant clearance period. However, if the 60-day period is unreasonable in a particular case, the cost of storage of termination inventory prior to the expiration of such period may be included.

§ 8004.12 *Depreciation*—(a) *Reference to Statement of Cost Principles.* The statement provides for the inclusion of depreciation as follows (subpar. 1 (c)):

Depreciation. An allowance for depreciation at appropriate rates on buildings, machinery, and equipment, and other facilities including such amounts for obsolescence due to progress in the arts and other factors as are ordinarily given consideration in determining depreciation rates. Depreciation as defined herein shall not include loss of useful value of the type covered by subparagraph (f).

(b) *Definition.* The term "depreciation" is used herein in the usual commercial accounting sense to denote that part of the cost of a fixed asset which is charged to a particular period on the basis of distributing its cost over its estimated useful life. It should be distinguished from amortization of special tooling and loss of useful value of special facilities, which are separately provided for in subparagraphs 1 (e) and (f) of the Statement of Cost Principles (see §§ 8004.9 and 8004.10), as well as from amortization of emergency facilities under section 124 of the Internal Revenue Code.

(c) *Interpretations.* (1) To be includible as a cost of a terminated contract, depreciation must have accrued during the performance of the contract and be chargeable to the work done thereunder in accordance with accepted methods of accounting allocation. Any recognized method of computing depreciation may be used and where the contractor has consistently employed a recognized method, it will be expected to continue to use such method. Depreciation shall be includible only in respect of facilities owned by the contractor.

(2) Depreciation should ordinarily be computed at the rates customarily used by the contractor, which may reflect accelerated depreciation if the contractor can demonstrate the reasonableness of such accelerated rates in the light of unusually intensive or abnormal use of the related assets. The depreciation rates used by the contractor for Federal income tax purposes will ordinarily be acceptable, although they are not controlling.

(3) The fact that a facility is amortized at a rate of 20 percent per annum pursuant to section 124 of the Internal Revenue Code is not significant in determining the rate of depreciation to be used for purposes of contract termination. However, buildings, facilities, and tooling not qualifying for the special treatment accorded under subparagraphs 1 (e) and (f) of the Statement of Cost Principles may in some cases be amortized at higher rates than ordinary depreciation where such assets have a high rate of obsolescence due to their special nature or utility primarily for war production.

(4) Consistency from year to year in the method and rates of depreciation used is a significant factor in determining the appropriateness of the charge for depreciation in a particular accounting period. Therefore, any deviation from book depreciation, such as to reflect current depreciation on assets fully depreciated on the books, will raise a question as to the propriety of the depreciation charges as a whole.

§ 8004.13 *Advertising expense*—(a) *Reference to Statement of Cost Principles.* (1) The statement provides for the inclusion of advertising expense as follows (subpar. 1 (h)):

Advertising. Advertising expense to the extent consistent with a prewar program or to the extent reasonable under the circumstances.

(2) Advertising expense is included among the costs subject to limitation under subparagraph 1 (i) of the Statement of Cost Principles (see § 8004.5).

(b) *Definition.* The term "advertising expense," as used herein, includes the expense of operating an advertising department within the contractor's organization as well as expense incurred in the use of advertising media.

(c) *Interpretations.* (1) Where advertising expense represents a nominal amount in relation to the operations and other expenses of the contractor, the entire amount may be classified with general, administrative, and distribution expenses and allocated to the terminated contract in accordance with § 8004.2. Otherwise, it should be treated in accordance with the principles set forth below.

(2) The amount of advertising expense properly allocable to Government sales should be measured by its consistency with the contractor's prewar program unless such program does not provide an adequate basis for comparison, as in the case of newly organized companies. Where the consistency basis is not applicable, the reasonableness of the amount of advertising expense to be included in the settlement proposal will be determined in the light of the circumstances of each case.

(3) Where the allowable advertising expense is determined by reference to a prewar program, consideration may be given to the following factors:

(i) The period used to measure the prewar program may represent the four calendar years 1936 to 1939, inclusive, or the most nearly equivalent fiscal years. If the contractor was not in business during this entire period any representative period during which it was in business during such years may be used.

(ii) Advertising chargeable to the period of operation under the contract in excess of the average dollar amount for the prewar period should not be included in the amount to be allocated between Government contracts and other business.

(iii) The contractor's non-war business for the period of the contract should first be charged with advertising up to the prewar percentage of sales. In other words, to the extent that the contractor's prewar business has been maintained, no advertising should be charged to Government contracts.

(iv) Advertising should not be charged to Government contracts at a rate higher than the prewar percentage of sales.

(v) The amount of advertising expense allocated to Government sales in accordance with the principles set forth herein may be allocated to the terminated contract on the basis of sales (the amount of the termination settlement to be treated as a sale), cost of sales, or on any other reasonable basis.

§ 8004.14 *General experimental and research expense*—(a) *Reference to Statement of Cost Principles.* (1) The statement provides for the inclusion of general experimental and research expense as follows (subpar. 1 (d)):

Experimental and research expense. General experimental and research expense to the extent consistent with an established prewar program, or to the extent related to war purposes.

(2) Experimental and research expense is included among the costs subject to limitation under subparagraph 1 (i) of the Statement of Cost Principles (see § 8004.5).

(b) *Definition.* The term "general experimental and research expense", as used herein, refers to expenses incurred on projects of a basic and general nature and in the development of new products and processes, as distinguished from process engineering, tool development and similar activities related to particular contracts. The term does not refer to routine shop experiments in production methods and similar activities which are usually classified with factory overhead.

(c) *Interpretations.* (1) If income from royalties or from the sale of patents or rights is derived from general experimental and research programs carried on currently or in the past, such income should be deducted from the amount of general experimental and research expense to be allocated to the terminated contract.

(2) Where general experimental and research expense represents a nominal amount in relation to the operations and other expenses of the contractor, the entire amount may be classified with general, administrative and distribution expenses and allocated to the terminated contract in accordance with § 8004.2. Otherwise, it should be treated in accordance with the principles set forth below.

(3) The amount of general experimental and research expense properly allocable to Government sales should be measured by its consistency with the contractor's prewar program unless such program does not provide an adequate basis for comparison, as in the case of newly organized companies. Where the consistency basis is not applicable, the amount of general experimental and research expense to be considered for apportionment between Government sales and other work will be limited to such expense as is related to war purposes.

(4) Where the allowable general experimental and research expense is determined by reference to a prewar program, consideration may be given to the following factors:

(i) The period used to measure the prewar program may represent the four calendar years 1936 to 1939, inclusive, or the most nearly equivalent fiscal years. If the contractor was not in business during this entire period, any representative period during which it was in business during such years may be used.

(ii) General experimental and reserch expense chargeable to the period of operation under the contract in excess of the average dollar amount for the prewar period should not be included in the amount to be allocated between Government contracts and other business.

(iii) The contractor's non-war business for the period of the contract should first be charged with the amount of general experimental and research expense up to the prewar percentage of sales. In other words, to the extent that the contractor's prewar business has been maintained, no amount of this expense should be charged to Government contracts.

(iv) General experimental and research expense should not be charged to Government contracts at a rate higher than the prewar percentage of sales.

(v) The amount of the expense allocated to Government sales in accordance with the principles set forth herein may be allocated to the terminated contract

on the basis of sales (the amount of the termination settlement to be treated as a sale), cost of sales, or on any other reasonable basis.

§ 8004.15 *Cash discounts on purchases*—(a) *Reference to Statement of Cost Principles.* The statement does not refer in specific terms to cash discounts on purchases.

(b) *Definition.* The term "cash discount on purchases", as used herein, refers to a reduction in the amount paid to a vendor for the purchase of any items included in a termination settlement, solely by reason of the payment therefor within a specified period. It should be differentiated from trade discounts, rebates, and other allowances, which are usually treated as a direct deduction from the purchase price of the items to which they relate.

(c) *Interpretations.* (1) Cash discounts on purchases realized by the contractor in respect of items included in the termination settlement should be reflected as deductions from the contractor's costs included therein. Where it is not the contractor's usual accounting practice to deduct cash discounts from the individual purchases to which they apply, such as where the discounts are credited to income, the amount of cash discounts (estimated, if necessary) may be deducted in a single amount from the entire inventory or other cost.

(2) Where it is the contractor's usual practice to credit cash discounts to factory overhead or to general and administrative expenses, such treatment will ordinarily be acceptable.

Acting Director.

1. By striking out paragraph (e) from § 305.2 *Submission of Risks.*

2. By striking out the following words from § 305.16 *Form of Cargo War Risk Binder:*

Standard Optional Endorsement No. I (amended) is desired;
Insert ("yes" or "no") in space ☐

3. By amending Clauses 1, 3 (c), 4, 5, and 8 of § 305.22 *Form of Facultative Policy* to read respectively as follows:

1. (a) This insurance is only against the risks of capture, seizure, destruction or damage by men of war, piracy, takings at sea, arrests, restraints and detainments and other warlike operations and acts of kings, princes and peoples in prosecution of hostilities or in the application of sanctions under international agreements, whether before or after declaration of war and whether by a belligerent or otherwise, including factions engaged in civil war, revolution, rebellion or insurrection, or civil strife arising therefrom, and including the risks of aerial bombardment, floating or stationary mines and stray or derelict torpedoes; but excluding claims for delay, deterioration and/or loss of market, and warranted not to abandon (on any ground other than physical damage to ship or cargo) until after condemnation of the property insured. Also warranted not to abandon in case of blockade, and free from any claims for loss or expense in consequence of blockade or of any attempt to evade blockade; but in the event of blockade, to be at liberty to proceed to an open port and there end the voyage.

(b) No claim shall be payable hereunder which arises from collision, contact with any fixed or floating object (other than a mine or torpedo), stranding, heavy weather or fire unless caused directly (and independently of the nature of the voyage or service which the vessel concerned or, in the case of a collision, any other vessel involved therein, is performing) by a hostile act by or against a belligerent power; and for the purpose of this paragraph "power" includes any authority maintaining naval, military or air forces in association with a power.

3. (c) Capture, seizure, arrest, restraint, detainment or condemnation by the Government of the United States or by any of its Allies.

4. This insurance attaches only as the goods are first loaded on lighter, craft or vessel after leaving the warehouse at point of shipment in transit for the destination named in the Policy, and ceases to attach as the goods are finally landed from the vessel, craft or lighter at the final port or place of discharge.

This insurance includes transshipment and intermediate overland transit, if any. If the voyage is terminated and the interest insured is discharged at a port or place other than the intended port of discharge, through circumstances beyond the control of the Assured, this insurance shall continue until the interest insured is sold and delivered at such port or place; or if the interest be not sold but forwarded by water to the port of destination or to a substituted destination, this insurance shall continue until the interest is landed at the original or substituted destination.

It is a condition of this insurance that the Assured shall act with reasonable dispatch in all circumstances within their control.

5. Subject to any conditions or warranties which may be endorsed hereon, it is agreed that this insurance shall not be vitiated by deviation, over-carriage, change of voyage, or by any error or unintentional omission in the description of interest, vessel or voyage, provided the same be communicated to the War Shipping Administration as soon as known to the Assured and an additional premium paid if required.

8. Notwithstanding anything to the contrary contained in this Policy, it is understood and agreed that no claim for freight, storage, or other expense due to the requisition or commandeering of the title or use of any vessel by or with the consent of the country whose flag she flies shall be payable under this insurance, provided that if as a result of such requisition or commandeering the insured cargo is discharged at a port or place other than the port or place of destination, the port or place of discharged shall be deemed a "port or place other than the intended port of discharge" within the meaning of Clause 4 of this Policy.

4. Section 305.24 *Standard Optional Endorsement No. XVI* is hereby revoked.

[SFAW Suspension Order 4, Revocation]

PHILIPS-THOMPSON CO.

SUSPENSION OF OPERATIONS WITH RESPECT TO ANTHRACITE

On June 9, 1945, SFAW Suspension Order 4 was issued to prohibit Clayton M. Liddell, a retail dealer in Wilmington, Delaware, doing business as The Philips-Thompson Co., from distributing the regulated sizes of anthracite. Subsequently, Mr. Liddell requested and was given permission to demonstrate that, although he had violated SFAW Regulation No. 17, as amended, by delivering regulated sizes of anthracite to consumers during the 1944-45 coal year without first obtaining Consumer Declarations from them, he had not delivered anthracite during the year in amounts in excess of those permitted to be delivered by Regulation No. 17. On July 31, 1945, Liddell submitted information indicating that during the 1944-1945 coal year he had distributed anthracite equitably among his customers in accordance with those provisions of SFWA Regulation No. 17, as amended, which prescribed the maximum amounts of anthracite to be delivered. Liddell has stated in an affidavit that he will comply during the balance of this coal year with the provisions of SFAW Regulation No. 26, as amended.

In light of the foregoing, *It is ordered*, That SFAW Suspension Order 4 be, and it hereby is, revoked.

This order shall become effective immediately.

Issued this 2d day of August 1945.

An opinion accompanying this order has been issued herewith.

Pursuant to the authority vested in the Price Administrator by the Emergency Price Control Act of 1942, as amended, and Executive Orders Nos. 9250 and 9328, It is hereby ordered:

1. *Authority to fix dollars-and-cents ceiling prices for the Chicago Area.* (a) The Regional Administrator of the Office of Price Administration for Region VI may, by order, fix area dollars-and-cents ceiling prices for sales and deliveries of lumber out of the stock of any lumber distribution yard located in the Chicago area for which maximum prices are presently established under 2d Revised Maximum Price Regulation 215. No person may sell or deliver and no person may buy or receive lumber out of the stock of any lumber distribution yard located in that area at prices higher than the dollars-and-cents ceiling prices fixed by any order issued pursuant to the authority contained in this section.

Any order issued or action taken by the Regional Administrator in accordance with this order shall have the same force and effect as if issued or taken by the Administrator.

(b) The dollars-and-cents prices established by the Regional Administrator's order shall be generally in line with the levels of prices in effect under 2d Revised Maximum Price Regulation 215.

(c) The Regional Administrator may include in any order issued hereunder provisions for posting price lists, for keeping of records and for making reports.

(d) The Regional Administrator of the Office of Price Administration for Region VI is authorized to modify or revoke at any time any order issued pursuant to this section. Within thirty days from the date of the issuance of any regulation, order, or amendment of a regulation, which results in a significant change in the prices established under 2d Revised Maximum Price Regulation 215 the Regional Administrator shall amend or modify any order issued pursuant to this section to the extent necessary to provide that the prices established by such order shall continue to conform to the provisions of paragraph (b) of this section.

2. *Provisions of 2d Revised Maximum Price Regulation 215 apply to all sales except where dollars-and-cents ceilings are established.* (a) The maximum prices for any sale of lumber as presently established under 2d Revised Maximum Price Regulation 215 shall continue in full force and effect except on sales of lumber for which dollars-and-cents maximum prices may be established by the Regional Administrator's order.

(b) Except as expressly modified by any order of the Regional Administrator all provisions of 2d Revised Maximum Price Regulation 215 shall continue to apply to all sales covered by such order.

3. *Sales covered by this order.* The dollars-and-cents prices established by the Regional Administrator's order shall govern the maximum prices which may be charged by any distribution yard for sales or deliveries of lumber out of distribution yard stock located in the Chicago area for delivery anywhere.

4. *Enforcement.* On and after the effective date of this Order and of any order issued hereunder, any person who sells or offers to sell lumber out of distribution yard stock at a price higher than the ceiling price fixed by such orders, or who otherwise violates any provisions of such orders shall be subject to the criminal penalties, suits for treble damages, license suspension proceedings and any other civil enforcement actions provided for by the Emergency Price Control Act of 1942, as amended. Any person who, in the course of trade or business, buys at a price higher than the ceiling prices fixed by such orders is also subject to the criminal penalties and civil enforcement actions provided for by that Act.

This order shall become effective August 4, 1945.

Statement to Wholesalers of Adjusted Ceiling Prices

The OPA has adjusted our ceiling prices on certain knitted underwear garments pursuant to the provisions of Order No. 10, issued under Revised Supplementary Order 99. In Column A below you will find our adjusted ceiling prices for these garments.

Under this order the OPA has established the method by which you, as a wholesaler, are to determine your ceiling prices for these garments.

You are required by the OPA to determine your ceiling prices for the specified styles by the following method: You first find the "cost base" for the garment being priced from Column B of the following table. You then apply to this "cost base" your "initial percentage markup" (determined in accordance with the appropriate rule set forth in subparagraph (3) of § 1372.102 (b) of Maximum Price Regulation 210). You then find your new ceiling price by adding to the amount thus determined the amount specified in Column C below for the particular style of garment being priced.

Style No.	Column A: Chalmers' adjusted ceiling price	Column B: "Cost base" to which wholesaler applies "initial percentage markup"	Column C: Amount of adjustment which wholesaler may add
2371 (shirt)	$8.30	$7.50	$0.60
2371 (drawer)	8.58	7.50	.81
6261	11.66	10.00	1.25
6262	10.88	10.00	.66

9362	8.76	7.75	.76
9364	8.22	7.75	.35

Please note that, as a wholesaler, you are required by the OPA to transmit to each retailer to whom you deliver any of the garments listed above on or after August 2, 1945, a "Wholesaler's Statement to Retailers of OPA Adjustment Charge" in the following form, properly filled in by you with the information applicable to the particular garments being delivered by you to the retailer. You are required to complete this statement as follows: In Column A you shall list the ceiling prices of the particular styles being shipped which were in effect for you under Maximum Price Regulation 210 prior to the date of this order. In Column B you shall list the new ceiling prices which you determine in accordance with the method indicated in this statement to you. In Column C you shall list the difference between the amounts in Column A and Column B below for the respective styles. This notice, when properly completed by you, is to be transmitted with, or annexed to, the invoice, billing or other statement of price accompanying every shipment made by you to your retailer customers of the styles shipped to you by us.

The Office of Price Administration, pursuant to Order No. 10, issued under Revised Supplementary Order 99, has permitted us to adjust our ceiling prices on the following garments, sold and delivered by us to you on or after August 2, 1945.

Please note that the OPA has ruled that you must price these garments in accordance with Maximum Price Regulation 580 or Maximum Price Regulation 210 (whichever regulation governs your sales of the garments listed above). In determining your ceiling prices for these garments the OPA has ruled that you must use as your "net cost" under MPR 580 or your "cost base" under MPR 210 the amount set forth in Column A above. You may not, in any case, include the amount of the OPA adjustment charge set forth in Column C above in determining your ceiling price for these garments under either of these regulations.

(2) The statement required to be sent by Chalmers Knitting Company to its wholesalers, as provided in this paragraph (c), and containing the information applicable to the styles of garments included in the particular shipment shall be transmitted with or be annexed to the invoice, billing or other statement of price, accompanying every shipment made by Chalmers Knitting Company of the garments listed in paragraph (a) of this order. In Column B he shall list his new ceiling prices for garments, determined in accordance with paragraph (c) of this order. In Column C he shall list the difference between the amounts in Column A and Column B for the respective styles.

(e) *Garments to which the provisions of this order shall apply.* This order shall apply only to those garments of the styles enumerated in paragraph (a) which are shipped by Chalmers Knitting Company on or after August 2, 1945, and before November 1, 1945.

LIMED, PICKLED AND BLUE CHROME SPLITS

MAXIMUM PRICES FOR SALES

For the reasons set forth in an opinion issued simultaneously herewith and filed with the Division of the Federal Register and pursuant to section 11 of Maximum Price Regulation 61, *It is ordered:*

Order No. 4 is revised and amended to read as follows:

(a) On and after August 1, 1945, the maximum price which may be charged by any producer thereof for a sale or delivery of limed, pickled or blue splits (other than gelatine or glue stock) shall be the highest price charged by him during March 1942 for splits of the same type, weight, potential cutting value and quality and grade. In the event that such seller did not deliver or offer to deliver, during March 1942, splits of the same type, weight, potential cutting value and quality and grade, the maximum price which he may charge shall be a price in line with the highest price charged by him during March 1942 for splits of the nearest related type, weight, potential cutting value and quality and grade. The term "in line with" as used in this paragraph (a) means having a justifiable relation to the highest price charged by the seller during March 1942 with commensurate increases or decreases to give effect to actual differences in type, weight, potential cutting value and quality and grade of the leathers involved and to take into account differences, if any, in the classes of purchasers.

When used in this order the term "the highest price charged by the seller during March 1942" shall have the definition given to it by § 1499.2 of the General Maximum Price Regulation.

(b) Every person selling under the provisions of paragraph (a) of this order shall file a report of his March 1942 high-

est price, or in-line price where an in-line price is used, with the Office of Price Administration in conformity with section 14 of Maximum Price Regulation 61, not later than one week after the date of the first sale made after the effective date of this order.

(c) The maximum price which may be charged by any producer thereof for a sale or delivery of limed, pickled or blue splits which cannot be priced under paragraph (a) above, shall be a price determined by the Office of Price Administration to be in line with the general level of prices during March 1942 for splits of the same and related types, weights, potential cutting values and qualities and grades sold to a purchaser of the same class. No such seller may sell or deliver splits under the provisions of this paragraph unless he has filed an application, in conformity with section 14 of Maximum Price Regulation 61, for establishment of his maximum price and has obtained from the Office of Price Administration an order establishing his maximum price for such splits.

(d) For the purposes of this order the term "base period" as used in section 14 of Maximum Price Regulation 61 shall mean the month of March 1942.

(e) *Sales by a person other than the producer thereof.* On and after August 1, 1945, the maximum price which may be charged for limed, pickled or blue splits by any person other than the producer thereof shall be as follows:

(1) In the case of limed splits and all head and shoulder splits whether limed, pickled or blue the maximum price shall be the producer's maximum price therefor plus a markup of ¼ cent per pound.

(2) In the case of pickled or blue splits other than head and shoulder splits the maximum price shall be the producer's maximum price therefor plus a markup of ½ cent per pound for sales of untrimmed splits and ½ cent per foot for sales of trimmed splits.

(3) Terms of sale shall be net cash for payment within 30 days from the date of invoice, f. o. b. the shipping point of the producer thereof. Transportation charges actually paid or incurred in transporting the splits from the producer's shipping point may be added. However, in the event that the splits are transported in the seller's own conveyance the amount added may not exceed the lowest available common carrier rate for an identical shipment from the same shipping point to the same receiving point.

(f) As used in this order the term:

(1) "Split" means one of the layers, other than the grain or hair portion, into which a horse hide, cattle hide, kip or calfskin has been separated and which is suitable for further tanning purposes.

(2) "Limed splits" means splits which are chemically treated through the dehairing process. They shall be free of excess sulphide, lime or water.

(3) "Pickled splits" means splits which are chemically treated through the pickling process. They shall be drained at least 48 hours before determination of their invoiced weight.

(4) "Blue splits" means splits which are chemically treated through the chrome tanning process.

(5) A "producer" of splits is one who separates splits from horse hides, cattle hides, kips or calfskins and partially tans, processes or trims such splits, or who buys such splits and resells them other than exactly as purchased at the producer's net invoiced weight.

(6) A "person other than a producer" of splits is one who buys and resells splits exactly as purchased at the producer's net invoiced weight.

(g) The maximum prices established by this amendment shall supersede and replace any and all maximum prices previously established for sales of such splits.

This amendment shall become effective August 1, 1945.

Issued this 2d day of August 1945.

NEW YORK WATER SERVICE CORP. ET AL.

NOTICE OF FILING OF AMENDED PLAN, ORDER RECONVENING HEARING AND NOTICE OF RECONVENED HEARING

At a regular session of the Securities and Exchange Commission, held at its office in the City of Philadelphia, Pennsylvania, on the 1st day of August, A. D. 1945.

In the matters of New York Water Service Corporation, Federal Water and Gas Corporation, File No. 59-35; Federal Water and Gas Corporation and Subsidiary Companies, (Respondents), File No. 59-61; Federal Water and Gas Corporation and Subsidiary Companies, File No. 54-66.

I. Notice is hereby given that New York Water Service Corporation, ("New York"), a subsidiary of Federal Water and Gas Corporation ("Federal"), a registered holding company, has filed an amended plan pursuant to section 11 (e) of the Public Utility Holding Company Act of 1935 for the purpose of enabling New York to comply with the provisions of section 11 (b) of the act.

All interested persons are referred to said amended plan, which is on file in the office of this Commission, for a statement of the transactions therein proposed, which may be summarized as follows:

1. New York has presently outstanding $13,606,000 principal amount of long term debt, 46,532 shares of $100 par value 6% Cumulative Preferred Stock, and 26,015 shares of $100 par value Common Stock. 2. Under the amended plan, each share of New York's 6% Cumulative Preferred Stock would be changed into and reclassified as one share of no par value common stock, with a temporary stated value of $10 per share, pending final adjudication of the original cost of New York's properties. All rights of holders of the preferred stock to accumulated and unpaid dividends would be cancelled. The presently outstanding Common Stock of New York would be surrendered to New York and accorded no recognition in the recapitalization.

3. This Commission is requested to approve the amended plan, to order Federal to surrender to New York the certificates for all New York's presently outstanding Common Stock, and to apply to a District Court of the United States to enforce and carry out the terms and provisions of the amended plan.

4. The amended plan states that the order of the District Court enforcing and carrying out the provisions of the amended plan may provide, if this Commission shall so require and the Court approve, for the transfer of all the issued and outstanding preferred stock of the corporation by the transfer agent, without the written or other consent of the holders thereof, to an officer of the Court to be designated in such order to act as trustee or nominee for the holders of said preferred stock and to be authorized and directed, among other things, to vote said stock in favor of the amended plan and the amendment of the Certificate of Incorporation as provided therein.

5. The amended plan provides for an application by New York to the Public Service Commission of the State of New York for an order approving the issuance of the proposed common stock, and further provides that the proposed amendment to the Certificate of Incorporation of New York will be presented to the Public Service Commission of the State of New York for endorsement of consent to the reduction in capital effected thereby and thereafter to the Secretary of State of New York for filing.

6. Expenses of carrying out the amended plan are estimated at $19,772.

II. Proceedings instituted by the Commission pursuant to sections 11 (b), 15 (f), and 20 (a) of the act directed to Federal and New York (File Nos. 59-61 and 59-35) and proceedings in respect of a plan under section 11 (e) of the act filed by Federal and its subsidiaries (File No. 54-66) have heretofore been consolidated.

By order dated February 10, 1943, the Commission, in said consolidated proceedings under section 11 of the act, among other things, (1) ordered that New York shall take such steps as may be necessary to recapitalize so as to fairly and equitably distribute voting power among its security holders; *Provided*, That the common stock of New York owned by Federal shall be accorded no recognition in such recapitalization; (2) ordered that Federal shall take such action as may be necessary to divest itself of all interests held by it, directly or indirectly, in the business conducted and properties owned by New York; *Provided*, That such divestment shall not be effected through the sales of securities of New York owned by Federal prior to the recapitalization of New York in such manner as to provide for a fair and equitable distribution of voting power among security holders thereof; and (3) approved a plan filed by Federal and subsidiaries under section 11 (e) of the act, in which plan Federal consented to the provisions of the order described above relating to New York and to Federal's interest in New York.

New York has heretofore filed a plan of recapitalization pursuant to section 11 (e) of the act (File No. 54-66); a hearing was held in these consolidated proceedings in respect of said plan and was continued indefinitely.

III. It appearing to the Commission that notice should be given and that the hearing herein previously continued should be reconvened for the purpose of taking testimony in respect of said amended plan;

It is ordered, That the hearing herein be reconvened under the applicable provisions of the act and the rules of the Commission thereunder on August 24, 1945, at 10:00 a. m., e. w. t., at the office of the Securities and Exchange Commission, 18th and Locust Streets, Philadelphia 3, Pennsylvania. On that date, the hearing room clerk in Room 318 will advise as to the room in which the hearing will be held.

[Special Order 15]

DESTRUCTION OF BITUMINOUS EMULSION CAMOUFLAGE PAINT

The War Department has declared surplus to the Reconstruction Finance Corporation as a disposal agency approximately one million gallons of bituminous emulsion camouflage paint, and the War Department has further quantities of this paint which it will or may

declare surplus in the future. The Reconstruction Finance Corporation, after endeavoring to find a commercial use for this paint and after exhaustive study, has submitted its findings to the Surplus Property Board.

The Reconstruction Finance Corporation has found "that such paint has no commercial value and that the cost of care and handling will in all cases far exceed any proceeds which might be realized from its disposition, for the following reasons: (1) This type of paint has no commercial value in its present form; (2) its conversion into a commercially usable product would necessitate a material increase in gallonage and be too expensive to be practical; (3) the paint's pronounced tendency to 'bleed through' any oil-base paint applied subsequently to its application renders it hazardous and useless as a commercial paint; and (4) the estimated cost of removing such paint from the drums would far exceed the sales price of the drums."

The Reconstruction Finance Corporation has further reported that "the immediate destruction of bituminous emulsion camouflage paint determined to be surplus will in all cases be necessary and desirable because of the nature of the property and the expense and difficulty of its care and handling. It requires large and valuable storage space and entails various charges for its care and handling, and it is subject to evaporation, freezing and thawing, and consequent leakage of the drums."

Because of the fact that this paint has no civilian utility it is not deemed feasible to donate surplus supplies of it to any institution or agency supported by the Federal Government or any State or local government or to any nonprofit educational or charitable organization.

In reliance upon the findings of the Reconstruction Finance Corporation recited above, and pursuant to section 13 (b) of the Surplus Property Act of 1944 (58 Stat. 765; 50 U.S.C. App. Sup. 1611); *It is hereby ordered*, That:

1. The Reconstruction Finance Corporation and all owning agencies are hereby authorized to destroy any and all surplus bituminous emulsion camouflage paint now or hereafter in their possession.

2. In view of the fact that the nature of this property and the expense and difficulty of its care and handling are such as to render its immediate destruction necessary and desirable, neither the Reconstruction Finance Corporation nor any owning agency shall be required to give public notice of any proposed destruction of such property or to attempt to dispose of such property otherwise than by destruction.

3. The Reconstruction Finance Corporation and any owning agency shall, within twenty (20) days after any destruction carried out under the authority of this order, report in writing to the Surplus Property Board the amount of property destroyed.

This order shall become effective August 1, 1945.

NOTE: The reporting requirements of this order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Administrator.

PART 3290—TEXTILES, CLOTHING AND LEATHER

[Conservation Order M-328, Direction 20]

PRIORITIES ASSISTANCE FOR CARDED COTTON AND RAYON YARN FOR SHOE LACE MANUFACTURERS

The following direction is issued pursuant to Conservation Order M-328:

(a) *Who may obtain priorities assistance.* Manufacturers of shoe laces who need cotton or rayon yarn before October 1, 1945 for the production of shoe laces and who are unable to obtain it without a preference rating may apply for priorities assistance with which to obtain carded cotton yarn or spun rayon yarn or bright continuous filament acetate yarn for such purposes. If, before the issuance of this direction, a manufacturer has already applied for priorities assistance to fill his yarn needs for the period covered by this direction, he does not need to apply again.

(b) *Applications for carded cotton yarn.* If a manufacturer wants priorities assistance to get carded cotton yarn for the purpose of making shoe laces, he must apply on Form WPB-2842 to the War Production Board, Textile, Clothing and Leather Bureau, Washington 25, D. C., Ref: Direction 20 to M-328 not later than August 11, 1945.

(c) *Applications for rayon yarns.* If a manufacturer wants priorities assistance to get rayon yarn for the purpose of making shoe laces he must write a letter to the War Production Board, Textile, Clothing and Leather Bureau, Washington 25, D. C., Ref: Direction 20 to M-328 not later than August 11, 1945, stating:

(1) The quantity of spun rayon yarn and the quantity of bright continuous filament acetate rayon yarn for which a preference rating is desired.

(2) How much cotton yarn, how much spun rayon yarn and how much continuous filament rayon yarn he consumed in the manufacture of shoe laces during the second quarter of 1945.

(3) That all the rayon yarn purchased by using a preference rating obtained under this direction will be used by him to make shoe laces.

(d) *Allocations of materials.* The War Production Board, in proper cases, and in accordance with the policy stated below, will, on Form WPB-2842 assign a preference rating and specify the amount and type of carded cotton yarn authorized, and, in a letter to the applicant, assign a preference rating and specify the amount and type of rayon yarn authorized. The total amount of carded cotton yarn and rayon yarn for which priorities assistance will be granted under this direction is limited. Within the available supply, applications will generally be granted pro rata, based on the amount of yarn used by the applicant in the manufacture of shoe laces in the second quarter of 1945. Persons who did not use yarn in the manufacture of shoe laces in the second calendar quarter of 1945 and persons whose use of yarn for such purposes during that period was below their usual quarterly consumption may, nevertheless, apply for their needs and their applications will be processed on an equitable basis.

(e) *Applications and extensions of preference ratings.* Orders for carded cotton and rayon yarn may be placed and preference ratings assigned under this direction must be applied and extended in the manner provided in Priorities Regulations 1 and 3. In the case of rated orders for carded cotton yarn, the purchaser must add the following certification properly filled in to the certification described in Priorities Regulation 3 or 7:

This rating has been assigned on Form WPB-2842. WPB Case Number ------

No person may apply a preference rating assigned under this direction to an order calling for delivery of carded cotton or rayon yarn after September 20, 1945.

(f) *Bureau of the Budget approval.* The provisions of paragraph (b) and (c) have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

§ 3290.196 *Conservation Order M-310*—(a) *General definitions.* (1) "Tanner" means a person in the business of tanning, dressing, or similarly processing hides or skins, who in any calendar month after April 1, 1940, processed or processes more than 100 hides or skins.

(2) "Contractor" or "converter" means a person in the business of causing hides or skins to be tanned or dressed for his account in any tannery not owned or controlled by him.

(3) "Collector" means a person, including a dealer or importer, engaged in the business of acquiring from others untanned hides or skins for resale, or removing hides or skins from animals not slaughtered by him.

(4) "Producer" means a person in the business of slaughtering animals.

(5) "Military order" means an order for hides, skins or leather for delivery against a specific contract placed by any of the following, or for incorporation in any product to be delivered against such a contract:

The Army or Navy of the United States, the United States Maritime Commission, the War Shipping Administration, or any foreign government pursuant to the Act of March 11, 1941, entitled "An Act to Promote the Defense of the United States" (Lend-Lease Act) or any extension or renewal thereof. Regardless of the provisions of Priorities Regulation 17, no orders for military exchanges and service departments shall be regarded as military orders except rated orders of United States Navy Ship's Service Departments and War Shipping Administration Training Organization Ship's Service activities for cut sole leather for repair purposes which are endorsed as follows:

The within order has been approved in accordance with instructions of the Army and Navy Munitions Board.

By----------
Authorized Official.

(6) "Military specifications" or "military quality" means, except as herein otherwise specifically provided, the specifications applicable to military orders or the quality of material meeting such specifications.

(7) "Sole leather" means vegetable tanned sole leather unless otherwise specified.

(8) "Scrap leather" means small leather pieces which are unavoidably produced from processing or cutting operations, but in no case shall include bellies or shoulders.

(9) "Rawhide" means a hide or skin which after the hair has been removed is used in that state or fabricated without further tanning.

(10) All trade terms shall have their usual trade significance unless otherwise specified.

(b) *Provisions applying to all hides, skins and leather.* (1) No person shall process any hides, skins or leather contrary to any specific direction issued from time to time by the War Production Board relating to the processing or production of specific types of leather to meet military or designated civilian requirements.

(2) No producer, collector, tanner, contractor, converter or cutter shall sell, deliver, accept delivery of, cut, use or incorporate in any product any hides skins or leather contrary to any specific direction issued from time to time by the War Production Board deemed necessary in order to fill military or designated civilian requirements.

(3) No person shall commercially incorporate any leather or rawhide into any product except as permitted by

Schedule A at the end of this order, and no person shall sell any leather or rawhide unless the same is to be incorporated into a product permitted by Schedule A. This restriction shall not, however, apply to:

(i) The filling of military orders;

(ii) The delivery or use of vegetable tanned cattlehide leather available after accepting and filling all military orders and all orders for items permitted under Schedule A, and after complying with all specific directions. However, the restrictions of paragraph (b) (3) do apply to calfskins and kipskins and to sole leather, innersole leather, side upper leather, lining leather, belting leather, mechanical leather and welting leather.

(iii) The delivery or use of scrap leather, *Provided*, That any tanner selling any such scrap leather shall report his sales on his monthly form prescribed in paragraph (k).

(iv) [Deleted Aug. 25, 1944.]

(v) [Deleted Aug. 25, 1944.]

(4) The War Production Board may authorize the reprocessing, sale and use of rejected leather, or leather which can be made available consistently with program requirements, for purposes not otherwise permitted by this order or § 944.11 of Priorities Regulation 1. Any person may request such authorization by letter on his own behalf to use leather he owns or his supplier may request authorization to sell, and on behalf of his customer to use, stating the proposed uses of the leather and the quantity, quality, weight and type involved, and in the case of rejected leather, facts substantiating its qualification as such.

"Rejected leather" as used in this paragraph means any leather made to fill a military order or for production of items listed on Schedule A which (i) is so defective that it will be refused if tendered, (ii) the purchaser has refused, or (iii) the purchaser has notified the seller will be refused because of defects.

No person shall process or order any leather which he knows will be rejected. This paragraph does not prohibit the production of rejects to the extent that they are unavoidable in the manufacturers' or tanners' operations.

(5) The War Production Board may authorize the reprocessing or use of leather not used for the purposes for which it was purchased because of termination of procurement by the United States Government or any of its agencies for which the production was ordered. Any person may request such authorization on his own behalf, or on behalf of his customer, stating the proposed use of the leather, the quantity, quality, weight, type involved, the number of the cancelled contract, branch of service, date of purchase, intended end use and why it cannot be used for the purpose for which it was intended.

Any leather held by a person who does not in the regular course of his business sell leather in that form may only be sold in accordance with Priorities Regulation 13.

(6) Notwithstanding the provisions of any priorities or other regulations of the War Production Board, no preference ratings shall be applied or extended for the delivery of hides, skins or leather, except:

(i) Leather for military orders (excluding sole leather whole stock as defined in paragraph (e) (1) (vii) and cattlehide splits in the blue, pickled, or lime state); or

(ii) When specifically authorized in writing by the War Production Board pursuant to this subparagraph (b) (6) (ii).

(7) In making sales or deliveries of hides, skins or leather (including sole leather cut stock) not required to fill military orders, no person shall make discriminatory cuts in quality or quantity between customers who meet such person's established prices, terms and credit requirements, or between customers and his own consumption of said materials.

(8) No tanner, contractor, converter, finisher, jobber or cutter shall deliver any leather (except shearlings) for footwear purposes, unless he has received the footwear manufacturers' quota number of the purchaser. This paragraph shall not prevent deliveries to persons regularly in business as leather contractors, leather converters, leather finishers, leather jobbers, leather cutters, finders or shoe repairers or to persons outside the continental United States.

(c) *Untanned cattlehides, calfskins and kips*—(1) *Definition.* "Cattlehide", "calfskin" and "kip" mean the hide or skin of a bull, steer, cow or buffalo, foreign or domestic (excluding slunks).

(2) No tanner shall put into process, and no contractor shall cause to be put into process, any cattlehide, calfskin or kip in excess of such amounts for specified periods as may be fixed by the War Production Board from time to time.

(3) No person shall sell, deliver, purchase or accept delivery of any untanned cattlehide, calfskin or kip, or portion thereof, other than splits and glue stock, except to the extent that the purchaser is specifically authorized by the War Production Board on Form WPB–1323 or Form WPB–3507. Applications may be made on Form WPB–1325 (formerly PD–569) for the purchase of domestic cattlehides, and on Form WPB–1322 (formerly PD–569–a) for the purchase of domestic calfskins and kips: *Provided*, That the following may be made without such authorization:

(i) Transactions between collectors and between producers and collectors for purposes of resale or delivery within the continental United States.

(ii) The sale and delivery to and the purchase and acceptance of delivery by any person other than a tanner of less than 100 hides or skins in any calendar month.

(4) In acting under paragraph (c) (3), it will be the policy of the War Production Board, so far as is practicable, to grant authorizations so that:

(i) The contractor or tanner may obtain cattlehides, calfskins, or kips in the proportions that the wettings in 1942 of the contractor or tanner, respectively, of cattlehides, calfskins, or kips, computed separately, bore to all wettings thereof in that year by all contractors and tanners producing the same type of leather, except that authorizations to tanners or contractors having more than a practicable minimum working inventory may be reduced or omitted; and

(ii) [Deleted Aug. 25, 1944.]

(5) No producer or collector shall cut off bellies or shoulders of untanned cattlehides, except for a purchaser specifically authorized in writing by the War Production Board to purchase hides with portions cut off.

(4) Unless otherwise specifically ordered in writing by the War Production Board, no person shall curry or finish the following leathers and no manufacturer shall use the same, either before or after such currying or finishing, except in accordance with the following requirements:

(i) Rough sole leather shall be finished as sole leather (which thereupon becomes subject to paragraph (e) hereof) except that rough sole leather 12 iron and up may be curried and used for round belting or V belting;

(ii) Rough belting butts or butt bends shall be curried and thereafter used only for transmission belts, hydraulic, packing, mechanical and textile leathers, or fillet leather: *Provided*, That this restriction shall not apply to straightenings cut from the portion of the belting butt or butt bend beginning at the edge from which the belly was removed, if the straightening is less than two inches in width at the widest point;

(iii) Rough shoulders cut from sole leather hides if not finished for sole leather, and rough shoulders cut from any belting butts, shall be curried and used only for welting, hydraulic, packing, mechanical and textile leathers, except that double rough shoulders 11 iron and up may be curried and used for round belting.

The War Production Board may on written application authorize the substitution of any of the types of leather mentioned in subparagraphs (i), (ii), and (iii) of this paragraph (d) (4) for any of the end uses therein specified, and when consistent with meeting requirements for approved programs, the War Production Board may authorize the finishing and use of any of these types of leather for any products listed on Schedule A.

(5) Vegetable tanned sole leather shall be processed so as to meet the requirements of Federal Specification KK-L-261B, including any emergency alternate specifications or amendments thereto.

(6) Bellies cut from cattlehides processed for sole leather (excluding stags and bulls) shall be cut in accordance with standard practice, but bellies weighing 3 pounds or more when finished shall not be cut to measure less than 6 inches across the navel when finished.

(7) Shoulders cut from cattlehides processed for sole leather (excluding stags and bulls) shall be cut in a line running perpendicular to line of backbone at a point within the limits of the break in the foreflank.

(8) No tanner, currier, finisher, jobber or dealer shall accept any order for cattlehide leather in the form of harness, skirting, collar, latigo, lace, rigging, rawhide, bag, case, strap or upholstery leather, rated or otherwise, or transfer any such leather to his own fabricating plant, unless such order or the request for such transfer states the specific end use of such leather.

(9) No tanner shall process any cattlehide to make grain garment leather.

(10) [Deleted Jan. 24, 1944.]

Such bends are hereinafter referred to as "manufacturers' bends-for-repair," and the weight and the quality of the bends set aside shall be equal, as nearly as possible, to those of the manufacturers' bends not so set aside, unless other directions in writing are issued by the War Production Board. No manufacturers' bends-for-repair shall be sold to any finder or shoe repairer as a whole bend.

(3) No person shall cut military quality outersoles, midsoles or innersoles, except on patterns to fit the United States Munson last in sizes and widths to fit the sizes of shoes specified in military orders, or on other patterns approved or in sizes prescribed by the War Production Board from time to time.

Upon written application, however, the War Production Board may authorize the cutting and use of sole leather and sole leather cut stock to meet military orders or orders for products on Schedule A, but not mentioned in Schedule B, when sole leather can be diverted to these uses consistent with meeting programmed military and civilian footwear requirements.

INTERPRETATION 1

EFFECT OF RATINGS ON EQUITABLE DISTRIBUTION

Paragraph (b) (7) of this order, the so-called equitable distribution clause, does not excuse filling of rated orders. This clause prohibits discrimination between customers who meet established prices, terms and credit requirements but it does not override Priorities Regulation No. 1, which requires, subject to the conditions set forth, that all rated orders be accepted and that preference be given to orders carrying higher ratings over those with lower ratings.

The particular types of leather specified by preference rated orders must be delivered unless the leather cannot be produced from the hides or skins available to the tanner or the tanner is excused or prevented from filling the order by a regulation, order or direction of the War Production Board. If a rated order is placed for military quality leather, this order may not be filled with civilian quality leather. (Issued Apr. 11, 1944.)

INTERPRETATION 2

OFFA AND UNRRA ORDERS NOT WITHIN DEFINITION OF "MILITARY ORDER"

"Military order" as defined in paragraph (a) (5) does not include orders for delivery against contracts placed by the Office of Foreign Relief Administration or the United Nations Rehabilitation and Relief Administration, or orders for hides, skins or leather for incorporation in products to be delivered against such contracts. (Issued April 15, 1944.)

ZANES FREIGHT AGENCY

FINDINGS AS TO CONTRACTS IN PROSECUTION OF WAR

In the matter of Zanes Freight Agency, Dallas, Texas; Case No. S–2437.

Having been advised of the existence of a labor dispute involving Zanes Freight Agency, Dallas, Texas.

I find that the local pick-up and delivery activities of Zanes Freight Agency, Dallas, Texas, pursuant to contract, oral or written, for the transportation of goods, articles and commodities for railroad and long distance trucking companies, are contracted for in the prosecution of the war within the meaning of section 2 (b) (3) of the War Labor Disputes Act.

WILD RICE IN MINNESOTA

APPLICATION FOR EXEMPTION FROM MAXIMUM HOUR REGULATIONS

In the matter of the application for exemption of the processing of wild rice in the State of Minnesota from the maximum hours provisions of the Fair Labor Standards Act of 1938 pursuant to section 7 (b) (3) of the act and Part 526 of the regulations, as amended, issued thereunder.

Whereas, an application has been filed by the Wild Rice Producers' Association of Minnesota for a determination that the processing of wild rice constitutes an industry of a seasonal nature within the meaning of section 7 (b) (3) of the Fair Labor Standards Act of 1938 and Part 526, as amended, of the regulations issued thereunder; and

Whereas, it appears from the application that:

(1) Wild rice matures and is harvested in Minnesota during a regularly recurring season each year beginning about the middle of August and ending about the middle of October;

(2) Wild rice is perishable and must be processed as quickly as possible after harvesting to prevent deterioration and spoilage;

(3) Practically all of the establishments processing wild rice commercially are located in Minnesota. Wild rice is processed in these establishments during a regularly recurring season each year which begins at the same time as the harvesting season and lasts for about 90 days, after which the processing plants cease production for the remainder of the year except for such work as maintenance, repair, clerical and sales work, because wild rice is no longer available for processing as a result of natural conditions.

Now, Therefore, upon consideration of the facts stated in the application, the Administrator hereby determines pursuant to § 526.5 (b) (ii) of the regulations that a prima facie case has been shown for the granting of an exemption for the processing of wild rice in Minnesota as an industry of a seasonal nature pursuant to section 7 (b) (3) of the Fair Labor Standards Act of 1938 and Part 526, as amended, of the regulations issued thereunder.

As used in this determination, the term "processing of wild rice" means the curing, drying, parching, hulling and cleaning of wild rice; and the following operations when performed by employees of wild rice processors on or near the premises of wild rice processing plants during the wild rice processing season: the packaging and bagging of wild rice; the storing of wild rice and the removal of the wild rice from storage and placing it in transportation facilities; and any operations or services necessary or incident to the foregoing.

If no objection or request for hearing is received within 15 days following the publication of this determination, the Administrator, pursuant to § 526.5 (b) (ii) of the regulations, will make a finding upon the prima facie case. Objections and requests for hearing from any interested person should be submitted in writing to the National Office of the Wage and Hour Division, 165 West 46th Street, New York 19, New York. The application for exemption may be examined at this office.

Signed at New York, New York this 1st day of August 1945.

L. METCALFE WALLING,
Administrator.

ELECTRIC BOND AND SHARE CO.

NOTICE AND ORDER FOR HEARING ON ISSUE OF APPROPRIATENESS OF MODIFYING OR RESCINDING AUTHORIZATION TO PURCHASE PREFERRED STOCK AND ORDER SUSPENDING AUTHORIZATION PENDING SUCH HEARING

At a regular session of the Securities and Exchange Commission held at its office in the City of Philadelphia, Pa., on the 2d day of August, A. D. 1945.

The Commission having on September 7, 1944, approved, subject to terms and conditions, a declaration of Electric Bond and Share Company ("Bond and Share") respecting the use of $44,000,000 received from United Gas Corporation in settlement of its obligation to Bond and Share in the acquisition of a portion of its outstanding $5 and $6 preferred stocks; and

The Commission having reserved jurisdiction to rescind or modify its order, in its discretion, as to the use of any portion of such funds which have not, at the time of such rescission or modification, been employed for such purpose; and

Bond and Share having reserved the right to file substitute or additional programs with respect to the use of all or any portion of the funds which are the subject of the declaration and the Commission having reserved jurisdiction to require the making of such filings or to take such other action as may be necessary or appropriate under the provisions of the act; and

Bond and Share having expended a total of only approximately $1,000,000 of the said $44,000,000 authorized for acquisitions of its preferred stock up to June 30, 1945 and no purchases of such preferred stock having been effected thereafter; and

Bond and Share having filed certain plans under section 11 (e) of the act which propose, among other things, that, as an initial step in the retirement of all of its $5 and $6 preferred stock, approximately $31,000,000 of cash be used to make a payment of $30 per share as a capital distribution on its preferred stocks, such capital distribution to be accompanied by a modification of the rights of the preferred stockholders, including a reduction, subject to any adjustment found to be subsequently necessary by the Commission or an appropriate Federal Court, of 30% in the annual dividend rates; and

The Commission deeming it appropriate, in the light of the filing of such plans, that consideration be given to the issue of whether the Commission's approval of the use, by Bond and Share in the acquisition of its $5 and $6 preferred stocks, of any portion of the $44,000,000 not previously employed for such purpose, should be rescinded or modified.

It is ordered, That a hearing be held with respect to this matter at 10:30 a. m., e. w. t., on the 20th day of August 1945, at the offices of the Securities and Exchange Commission, 18th and Locust Streets, Philadelphia, Pennsylvania, in such room as may be designated at that time by the Hearing Room Clerk in Room 318. All persons desiring to be heard or otherwise wishing to participate in the proceedings shall notify the Commission in the manner provided by its rules of practice, Rule XVII, on or before August 18, 1945.

It is further ordered, That William W. Swift or any other officer or officers of the Commission designated by it for that purpose shall preside at the hearings in such matter. The officer so designated to preside at any such hearing is hereby authorized to exercise all powers granted to the Commission under section 18 (c) of said act and to a trial examiner under the Commission's rules of practice.

It is further ordered, That at such hearing consideration be given to the issue of whether the Commission's approval of the use, by Bond and Share in the acquisition of its $5 and $6 preferred stocks, of any portion of the $44,000,000 not previously employed for such purpose, should be rescinded or modified.

It is further ordered, That, pending determination of the issue hereinabove stated, the approval of the Commission with respect to the use by Bond and Share in the acquisition of the Company's $5 and $6 preferred stocks, of any portion of said $44,000,000 not heretofore employed for such purpose, be, and hereby is, suspended.

By the Commission.

ELECTRIC BOND AND SHARE CO. ET AL.

NOTICE OF FILING OF PLANS AND ORDER FOR HEARING

At a regular session of the Securities and Exchange Commission held at its office in the City of Philadelphia, Pennsylvania, on the 3d day of August A. D. 1945.

In the matters of Electric Bond and Share Company, File No. 54-127; Electric Bond and Share Company, and its subsidiary companies, respondents, File No. 59-3; Electric Bond and Share Company, American Power & Light Company, National Power & Light Company, Electric Power & Light Corporation, et al., respondents, File No. 59-12.

The Commission having previously instituted proceedings pursuant to section 11 (b) (1) of the Public Utility Holding Company Act of 1935 (File No. 59-3) and proceedings pursuant to section 11 (b) (2) (File No. 59-12) with respect to Electric Bond and Share Company ("Bond and Share"), a registered holding company, and certain of its subsidiaries, such proceedings being directed, among other things, to a determination of whether it is necessary to discontinue the existence of, or to modify the corporate structure of, or to redistribute the voting power among security holders of Bond and Share and certain of its subsidiaries, particularly National Power & Light Company ("National"), American Power & Light Company ("American"), and Electric Power & Light Company ("Electric"), all registered holding companies, and to a determination of what action, if any, is necessary and shall be required to be taken

by Bond and Share and certain of its subsidiaries, or any of them, to limit the operations of Bond and Share and any of its subsidiaries which are registered holding companies to single integrated public-utility systems, and to such other businesses as are reasonably incidental, or economically necessary or appropriate to the operations of such integrated public-utility systems, and the extent to which Bond and Share or any of its subsidiaries which are registered holding companies shall be permitted to retain any interest in any business other than that of a public utility; and

The Commission having entered orders, pursuant to section 11 (b) (2) of the act, requiring that the existence of National, American, and Electric, be terminated, that said companies be dissolved, and that Bond and Share and said companies proceed with due deligence to submit to the Commission plans for their prompt dissolution:

Notice is hereby given that Bond and Share has filed an application for approval of certain plans under section 11 (e) of the act designated as Plans I, II, and III and described as being for the purpose of enabling Bond and Share to comply with the provisions of section 11 (b) of the act. Among other things, the plans propose the retirement of all of the outstanding $5 and $6 preferred stock of Bond and Share, Plan I proposing, as an initial step in such retirement, a pro rata payment of $30 per share as a capital distribution and a 30% reduction in the respective dividend rates, and Plan II proposing the satisfaction of the balance of the claims of said preferred stocks through the distribution of certain securities and/or cash. The plans also have for their purpose the settlement of all claims against Bond and Share and its wholly-owned subsidiaries by and on behalf of National, American, and Electric, their subsidiaries, certain former subsidiaries, and their respective security holders. As part of the plans Bond and Share proposes to dispose of all securities of domestic public utility operating companies and of public utility holding companies whose subsidiaries operate in the United States, and proposes to retain only securities of American & Foreign Power Company ("Foreign Power"), whose subsidiaries operate outside the United States, and securities of Ebasco Services Incorporated ("Ebasco"), a subsidiary company rendering services to public utility and industrial clients.

All interested persons are referred to said plans, which are on file in the office of the Commission, for a full statement of the transactions therein proposed which may be summarized as follows:

Plan I: As the initial step in the retirement of all of the outstanding shares of $5 and $6 Preferred Stocks of Bond and Share it is proposed that an immediate cash payment (through a designated agent) of $30 per share be made on such preferred stocks, as a capital distribution, accompanied by a modification of the rights of the preferred stockholders. The more important rights of the holders of the preferred stock which are proposed to be modified are: (1) A reduction of $30 per share in the amounts which such holders shall be entitled to receive, either in the event of liquidation or redemption of all or any portion of such preferred stocks, or in the event of a capital distribution thereon; and (2) a reduction of 30% in the annual dividend rates of $5 and $6 respectively, subject to any adjustment which, subsequent to orders of the Commission and any Court approving Plan I, may be found by the Commission to be fair and equitable and approved by such Court. The voting rights of the preferred stock will not be altered by the said $30 payment.

Bond and Share requests that the Commission, in the event Plan I is approved, apply to an appropriate Federal Court for approval and enforcement of such plan. It is proposed that the effective date of Plan I shall be determined by the said Court and that such effective date shall be not less than fifteen days after the mailing of notice to the holders of record of the preferred stocks. Upon the expiration of six years subsequent to the effective date of Plan II (subject to certain exceptions necessitated by the war) it is proposed that any cash in the hands of the designated agent not then claimed by holders of preferred stock will be returned to the company free and clear of claims of such holders.

Plan II: It is proposed to complete the retirement of the $5 and $6 preferred stocks through the distribution of certain securities and/or cash. Such securities will consist of the major portion of Bond and Share's holdings of the common stock of American Gas and Electric Company ("American Gas"), a registered holding company and a subsidiary of Bond and Share, and the major portion of the common stocks of the three principal subsidiaries of National which Bond and Share expects to receive in connection with the dissolution of National. In such dissolution Bond and Share, which owns 46.56% of National's common stock, will receive a portion of the common stock of Birmingham Electric Company, Carolina Power & Light Company and Pennsylvania Power & Light Company ("Pennsylvania"). In addition it will acquire by subscription in connection with a plan of recapitalization for Pennsylvania an as yet unspecified number of shares of the common stock of Pennsylvania, the number of such shares to be distributed pursuant to this Plan II to be definitely specified by amendment. Bond and Share states that National, in plans to be filed, proposes the settlement of all claims against Bond and Share and its wholly-owned subsidiaries by or on behalf of National, its subsidiaries, certain of its former subsidiaries, and their respective security holders. The distribution of assets proposed in Plan II is as follows:

For each share of $6 preferred stock—
- 4/5 of a share of American Gas and Electric Company Common Stock;
- 1/4 of a share of Birmingham Electric Company Common Stock;
- 2/5 of a share of Carolina Power & Light Company Common Stock;
- a number of shares of Pennsylvania Power & Light Company Common Stock and/or other securities and/or cash which will be specified by amendment.

For each share of $5 preferred stock
- 4/5 of a share of American Gas and Electric Company Common Stock;
- 1/3 of a share of Birmingham Electric Company Common Stock;
- 1/3 of a share of Carolina Power & Light Company Common Stock;
- a number of shares of Pennsylvania Power & Light Company Common stock and or other securities and/or cash which will be specified by amendment.

Bond and Share will distribute, through a designated agent, the foregoing common stocks and or such amount of other securities and/or cash as will result in the receipt by the holders of its preferred stocks of the equitable equivalent of their rights including any adjustment which may be found by the Commission and the enforcing Court to be necessary to render the reduction of 30% in the dividend rate fair and equitable. The applicants request that the Commission, in the event Plan II is approved, apply to an appropriate Federal Court for approval and enforcement of such plan.

It is likewise proposed with respect to Plan II that the effectuation date be fixed by the enforcing Court which date shall be not less than fifteen days after the mailing of a notice to the holders of record of the preferred stocks. The holders will be advised in such notice that upon such effective date all rights and claims represented by such stock will cease except that upon surrender of shares of $5 and $6 preferred stock the holder shall be entitled to receive, within a period of one year, the securities and/or cash provided for in the plan. After the expiration of one year the securities so held will be sold and the proceeds held for the holders of such $5 and $6 preferred stock. Upon the expiration of six years subsequent to the effective date of the plan (subject to certain exceptions necessitated by the war) it is proposed that any proceeds of such sales then unclaimed will be returned by the designated paying agent to the company, such funds to be free and clear of any claims by the preferred stockholders.

Plan III: Bond and Share proposes to settle all claims against Bond and Share and its wholly-owned subsidiaries by and on behalf of the subholding company subsidiaries, American and Electric, their subsidiaries, and certain of their former subsidiaries, such settlements to be actually effectuated as part of this Plan III, however, only to the extent that such settlements are not effectuated in plans filed or to be filed with the Commission by American and Electric and joined in by Bond and Share. The plan as filed specifies neither the amounts involved nor the methods to be used in affectuating such settlements. It is then proposed to sell or otherwise dispose of all securities which Bond and Share may then own of public-utility holding companies whose subsidiaries operate in the United States, including any securities it may have or hereafter acquire of American and Electric, and of all securities which it may then own of public-utility companies operating in the United States. The plan as filed contains no description of the specific methods to be used in effectuating the disposition of such securities. The applicants request that the Commission, in the event Plan III is approved, apply to an appropriate Federal Court for approval and enforcement of such plan.

Upon consummation of the three plans, Bond and Share proposes to retain as its remaining assets: (1) the securities which it may then own of Foreign Power, a holding company, the public-utility subsidiaries of which operate wholly in foreign countries; (2) the stock and debt of Ebasco Services Incorporated, a company furnishing advisory, consulting, and other services to public-utility and industrial companies; (3) cash and miscellaneous current assets. Upon consummation of the three plans Bond and Share proposes to apply to the Commission, pursuant to the appropriate sections of the act, to exempt it and its subsidiary companies from the act and each and every provision thereof.

It appearing to the Commission that the proceedings with respect to the said plans are related to and involve common questions of law and fact with the issues in the proceedings instituted by the Commission pursuant to section 11 (b) of the act (File Nos. 59-3 and 59-12) and should be consolidated therewith for consideration by the Commission:

It is ordered, That the proceedings instituted by the Commission pursuant to section 11 (b) of the act (File Nos. 59-3 and 59-12) and the proceedings with respect to the said plans filed pursuant to section 11 (e) of the act (File No. 54-127) be, and hereby are, consolidated and that any relevant evidence adduced in the said proceedings instituted by the Commission pursuant to section 11 (b) of the act shall be incorporated in and be deemed to be a part of the record in the proceedings on the said plans filed pursuant to section 11 (e) of the act, without prejudice, however, to the Commission's right, upon its own motion or the motion of any interested party, to strike such portions of the record in the proceedings pursuant to section 11 (b) as may be deemed irrelevant to the issues raised with respect to the proposed plans.

It is further ordered, That a hearing be held at 10:00 a. m., e. w. t., on the 27th day of August 1945, at the offices of the Securities and Exchange Commission, 18th and Locust Streets, Philadelphia, Pennsylvania, in such room as may be designated at that time by the hearing Room Clerk in Room 318. All persons desiring to be heard or otherwise wishing to participate in the proceedings shall notify the Commission in the manner provided by its rules of practice, Rule XVII, on or before August 25, 1945.

It is further ordered, That William W. Swift or any other officer o. officers of the Commission designated by it for that purpose shall preside at the hearings in such matter. The officer so designated to preside at any such hearing is hereby authorized to exercise all powers granted to the Commission under section 18 (c) of said act and to a trial examiner under the Commission's rules of practice.

It is further ordered, That the hearing to be convened on August 27 shall be confined to a consideration of Plan I. At such times as amendments are filed with respect to Plans II and III setting forth in complete detail the steps therein contemplated, hearings will be reconvened and appropriate notice thereof will be duly given.

It is further ordered, That, without limiting the scope of the issues presented in the consolidated proceedings, particular attention will be directed at the hearing to be held on Plan I on August 27, 1945 to the following matters and questions:

1. Whether the proposed retirement of the preferred stock is necessary to effectuate the provisions of section 11 (b) and whether an order should be entered by the Commission, pursuant to section 11 (b), directing such retirement.

2. Whether the pro rata payment of $30 per share on the $5 and $6 preferred stock proposed in Plan I is necessary to effectuate the provisions of section 11 (b) and fair and equitable to the persons affected thereby.

3. Whether the proposed limitation on the period of time for which the designated paying agent will hold funds to make the pro rata payment to preferred stockholders meets the standards of section 11 (c).

4. Whether in general Plan I as submitted or as hereafter modified is necessary to effectuate the provisions of section 11 (b) of the act and is fair and equitable to the persons affected thereby.

5. Whether, if the transactions proposed are authorized by the Commission, it is appropriate in the public interest and in the interest of investors and consumers that any terms and conditions be imposed in connection with such authorization and, if so, what such terms and conditions should be.

6. Whether the fees and expenses proposed to be paid in connection with the consummation of Plan I and all transactions incidental thereto are for necessary services and are reasonable in amount and whether the plan should be modified to include further provision for the payment of any fees and expenses in connection with said plan or the proceedings with respect thereto which the Commission may determine, award, allow, or allocate.

7. Whether the accounting entries in connection with the proposed transactions are in conformity with the standards of the act and the rules promulgated thereunder.

8. Generally, whether the proposed transactions are in all respects in the public interest and in the interest of investors and consumers and consistent with all applicable requirements of the act and rules thereunder.

It is further ordered, That jurisdiction be reserved to separate, either for hearing, in whole or in part, or for disposition, in whole or in part, any of the issues, questions or matters herein set forth or which may arise in these proceedings or to consolidate with these proceedings other filings or matters pertaining to the subject matter of these proceedings, and to take such other action as may appear conducive to an orderly, prompt, and economical disposition of the matters involved; and

It is further ordered, That notice of this hearing be given to Bond and Share, National, American, Electric, and to all other persons, said notice to be given by registered mail to Bond and Share, National, American, Electric, and to all persons previously granted intervention or participation in any of the proceedings consolidated herein, and to all other persons by publication in the FEDERAL REGISTER; and

It is further ordered, That Bond and Share shall give notice of this hearing to all its security holders (insofar as the identity of such security holders is known or available to it) by mailing to each of said persons a copy of this notice and order for hearing at his last known address at least 10 days prior to the date of this hearing.

By the Commission.

LEE RUG CO.

CONSENT ORDER

Morris Typlin and Joseph Levy, co-partners, doing business as Lee Rug Company, 1410 South Michigan Avenue, Chicago, Illinois, are engaged in the retail sale of floor coverings. The partners are charged by the War Production Board that during the year 1944 they extended preference ratings to their suppliers to acquire approximately 45,000 square feet of linoleum in excess of the amount of linoleum which they delivered on customers' orders, placed with them, bearing preference ratings. This constituted a violation of Priorities Regulation No. 3. The partners admit the violation as charged, do not desire to contest the charge, and have consented to the issuance of this order.

Wherefore, upon the agreement and consent of Morris Typlin and Joseph Levy, co-partners, doing business as Lee Rug Company; of J. C. Baker, Regional Manager, Compliance Division; of James R. Bryant, Regional Counsel; and upon the approval of Palmer Edmunds, Esq., Compliance Commissioner; *It is hereby ordered*, That:

(a) Morris Typlin and Joseph Levy shall deduct rated orders covering 11,250 square feet of linoleum, each calendar quarter, during the third and fourth calendar quarters of the year 1945 and the first and second calendar quarters of the year 1946, from their available rated orders given them by their customers, and the preference ratings on total rated orders covering 45,000 square feet of linoleum, computed as aforesaid, shall not be extended by them at any time hereafter. In the event that Morris Typlin and Joseph Levy do not have available rated orders in an amount of at least 11,250 square feet of linoleum during each of aforesaid calendar quarters, then the remaining portion of said 11,250 square feet of linoleum not deducted in any of said calendar quarters shall be carried forward to the succeeding calendar quarter, and such remaining portion, as aforesaid, shall be deducted from available rated orders in such succeeding calendar quarter. In addition to the 11,250 square feet of linoleum already required to be deducted in such succeeding calendar quarter from their available rated orders.

(b) Nothing contained in this order shall be deemed to relieve Morris Typlin and Joseph Levy from any restriction, prohibition or provision contained in any other order or regulation of the War Production Board except insofar as the same may be inconsistent with the provisions hereof.

(c) The restrictions and prohibitions contained herein shall apply to Morris Typlin and Joseph Levy as individuals and as co-partners doing business as Lee Rug Company, their successors and assigns, or persons acting on their behalf. Prohibitions against the taking of any action include the taking indirectly as well as directly of any such action.

[RMPR 208, Order 41]

N. & W. OVERALL CO., ET AL.

AUTHORIZATION OF MAXIMUM PRICES

For the reasons set forth in an opinion issued simultaneously herewith and pursuant to section 2.6 of Revised Maximum Price Regulation 208, it is ordered:

(a) *Scope of this order.* This order establishes ceiling prices for sales by certain manufacturers and by wholesalers and retailers of thirty-three yard minimum boys' bib overalls. Any boys' bib overall which consumes an average of at least thirty-three yards of eight ounce shrunk denim per dozen when cut in a

range of sizes from 10–16 may be designated by these manufacturers as a "thirty-three yard minimum boys' bib overall" and may be priced under paragraph (b) of this order: *Provided*, That such purchaser is offered a range of sizes from 10–16 and is notified according to the requirements of paragraph (d) that the overalls are being priced under this order. Wholesalers and retailers receiving such notice must then price thirty-three yard minimum boys' bib overalls under paragraph (c).

(b) *Ceiling prices for sales by N. & W. Overall Co. (Virginia), N. & W. Overall Co. (Mississippi), High Point Overall Company, and Pollock's Key Work Clothes.* (1) On and after August 4, 1945, N. & W. Overall Co., Lynchburg, Virginia, N. & W. Overall Co., Jackson, Mississippi, High Point Overall Co., High Point, North Carolina, and Pollock's Key Work Clothes, Ft. Scott, Kansas, may sell and deliver and any person may buy and receive from them, thirty-three yard minimum boys' bib overalls at or below the following maximum prices:

	Per dozen
To group II retail sellers	$15.42½
To all other purchasers including wholesalers and group I retail sellers	13.20

(2) The prices set forth in subparagraph (1) are f. o. b. seller's place of business, net 30 days.

(c) *Ceiling prices for sales at retail and sales at wholesale.* (1) On and after August 4, 1945, the maximum price for sales at retail and regular sales at wholesale of "thirty-three yard minimum boys' bib overalls" shall be determined as follows:

(i) Take the highest price at which the seller delivered a boys' bib overall during March 1942 and divide that price by the net invoice cost of that garment. (If the seller did not deliver any boys' bib overalls during March 1942, he shall take the highest price at which he delivered a men's bib overall during March 1942 and divide that price by the net invoice cost of that garment. If the seller did not deliver any bib overalls during March 1942, his maximum price is determined under (iii) below.)

(ii) Multiply the percentage obtained in (i) above by the net invoice cost (not to exceed the supplier's ceiling price) of the garment being priced under this paragraph. The resultant figure shall be the maximum price of the boys' overall being priced, but in no event shall the maximum price for a retailer be higher than $1.64 a garment in the East and Central region; and $1.67 a garment in the Mountain and Pacific region. The maximum price for a wholesaler shall be in no case higher than $15.70 per dozen where the seller's place of business is in the East and Central region; and $16.05 per dozen where the seller's place of business is in the Mountain and Pacific region.

(iii) If the seller did not deliver any boys' or men's bib overalls during March 1942, the maximum price for sales at retail shall be $1.64 a garment in the East and Central region and $1.67 a garment in the Mountain and Pacific region; for sales at wholesale the maximum price shall be $15.70 per dozen in the East and Central region, and $16.05 per dozen in the Mountain and Pacific region.

(iv) "Net invoice cost" means the price on the face of the invoice less all discounts available, but adding transportation or delivery charges.

(2) Ceiling prices for "special sales" (this term is defined in Section 3.3 of Revised Maximum Price Regulation 208) are found under section 3.3. Moreover, if the retailer buys a garment at a "special sale", it should be priced under section 4.5 of the regulation, instead of under (1) above.

(3) "East and Central" and "Mountain and Pacific" regions are defined in Instruction 4 of Appendix C of Revised Maximum Price Regulation 208.

(d) *Notice which manufacturer must send to wholesalers and retailers.* On and after August 4, 1945, the manufacturer shall transmit to each retailer to whom it makes delivery of a thirty-three yard minimum boys' bib overall, at the time of delivery of such garment to the purchaser thereof, a statement in the following form:

> This notice is sent to you as required by Order No. 41 under Revised Maximum Price Regulation 208, which establishes maximum prices for our sales to you of certain boys' bib overalls. We have been allowed to price these overalls, Lot No. —— under that order since they conform to the prescribed yardage requirements. Whether you are a wholesaler or retailer, this notice tells you how to find your maximum prices. You must be certain to follow the method set forth below in order to comply with the law.
>
> *How to compute your maximum prices.* Take the highest price you charged for a boys' bib overall, which you delivered in March 1942 and divide that price by the net invoice cost of that garment to you. If you did not deliver any boys' overalls during March 1942 take the highest price you charged for a man's bib overall which you delivered during March 1942 and divide that price by the net invoice cost of that garment.
>
> Multiply the percentage so obtained by the net invoice cost of the garment being priced. The resultant figure shall be the maximum price of the boys' overall being priced, but in no event shall the maximum price for a retailer be higher than $1.64 a garment in the East and Central region (refers to sales in which the seller's place of business is in a state east of New Mexico, Colorado, Wyoming, Montana, and the following counties of Texas: Loving, Ward, Reeves, Pecos, Brewster, Presidio, Jeff Davis, Culberson, Hudspeth and El Paso) and $1.67 a garment in the Mountain and Pacific (refers to sales in which the seller's place of business is in the states or counties previously enumerated, or farther west). The maximum price for a wholesaler shall in no case be higher than $15.70 per dozen for sales in the East and Central region, and $16.05 per dozen for sales in the Mountain and Pacific region.
>
> "Net invoice cost" means the price on the face of the invoice less all discounts available, but adding transportation or delivery charges.
>
> If you did not deliver any bib overalls during March 1942, your maximum price shall be:
>
> Sales at wholesale:
> $15.70 per dozen in the East and Central region.
> $16.05 per dozen in the Mountain and Pacific region.
> Sales at retail:
> $1.64 per garment in the East and Central region.
> $1.67 per garment in the Mountain and Pacific region.
>
> The pricing method outlined above does not apply to "special sales". Sections 3.3 and 4.5 of Revised Maximum Price Regulation 208 tell you how to determine ceiling prices when there is a "special sale."

(e) *Notice which wholesalers must send to retailers.* Any seller at wholesale purchasing a thirty-three yard minimum boys' bib overall must furnish his retailers with the applicable portion of the notice set forth in paragraph (d) either by forwarding separate printed, typewritten or mimeographed copies attached to the invoice to accompany each shipment of overalls priced under this order, or have the notice stamped on the invoice if that is more convenient.

(f) The definitions in Revised Maximum Price Regulation 208 shall apply to this order.

(g) The maximum prices established in paragraph (b) of this order are subject to the special quota rule on deliveries set forth in section 2.7 of Revised Maximum Price Regulation 208, and to the disclosure, record keeping and marking provisions of the regulation.

(h) All prayers of the applications not granted herein are hereby denied.

This order shall become effective August 4, 1945.
